

⚠ Safety Precautions

- Important Notes on exporting this product or equipment containing this product;
If the end-user or application of this product is related to military affairs or weapons, its export may be controlled by "Foreign Exchange and Foreign Trade Control Law" of Japan where export license will be required before product can be exported from Japan.
- This product is designed and manufactured for use in General Purpose Industrial Equipment and it is not intended to be used in equipment or system that may cause personal injury or death.
- All servicing such as installation, wiring, operation, maintenance and etc., should be performed by qualified personnel only.
- Tighten mounting screws with an adequate torque by taking into consideration strength of the screws and the characteristics of material to which the product will be mounted. Over tightening can damage the screw and/or material; under tightening can result in loosening.
*Example: apply 2.7 N·m – 3.3 N·m torque when tightening steel screw (M5) to steel surface.
- Install safety equipment to prevent serious accidents or loss that is expected in case of failure of this product.
- Consult us before using this product under such special conditions and environments as nuclear energy control, aerospace, transportation, medical equipment, various safety equipments or equipments which require a lesser air contamination.
- We have been making the best effort to ensure the highest quality of our products, however, some applications with exceptionally large external noise disturbance and static electricity, or failure in input power, wiring and components may result in unexpected action. It is highly recommended that you make a fail-safe design and secure the safety in the operative range.
- If the motor shaft is not electrically grounded, it may cause an electrolytic corrosion to the bearing, depending on the condition of the machine and its mounting environment, and may result in the bearing noise. Checking and verification by customer is required.
- Failure of this product depending on its content may generate smoke of about one cigarette. Take this into consideration when the application of the machine is clean room related.
- Please be careful when using the product in an environment with high concentrations of sulfur or sulfuric gases, as sulfuration can lead to disconnection from the chip resistor or a poor contact connection.
- Do not input a supply voltage which significantly exceeds the rated range to the power supply of this product. Failure to heed this caution may lead to damage of the internal parts, causing smoke and/or fire and other troubles.
- The user is responsible for matching between machine and components in terms of configuration, dimensions, life expectancy, characteristics, when installing the machine or changing specification of the machine. The user is also responsible for complying with applicable laws and regulations.
- Manufacturer's warranty will be invalid if the product has been used outside its stated specifications.
- Component parts are subject to minor change to improve performance.
- Read and observe the instruction manual to ensure correct use of the product.

Repair Consult to the dealer from whom you have purchased this product for details of repair work.
When the product is incorporated to the machine you have purchased, consult to the machine manufacturer or its dealer.

Catalog

AC Servo <MINAS A5I / A5 series, E series>

MINAS A5 Family

2017 / 10

This product is for industrial equipment. Don't use this product at general household.

Servo motor that brings out potential of the machine. MINAS A5 Family

Two-degree-of-freedom control system All-in-one type

A5II series

Rated output: 50 W to 15.0 kW

- 20 bit incremental encoder, 17 bit absolute/ incremental encoder
- All-in-one: Speed, Position, Torque^{*1}, Full-closed^{*1} control type

^{*1} Not applicable to two-degree-of-freedom control system.

All-in-one type

A5 series

Rated output: 50 W to 15.0 kW

- 20 bit incremental encoder, 17 bit absolute/ incremental encoder
- All-in-one: Speed, Position, Torque, Full-closed control type

Two-degree-of-freedom control system Position control type

A5IIE series

Rated output: 50 W to 5.0 kW

- 20 bit incremental encoder
- Position control (pulse train commands)

Position control type

A5E series

Rated output: 50 W to 5.0 kW

- 20 bit incremental encoder
- Position control (pulse train commands)

Slim design and position control type

E series

Rated output: 50 W to 400 W

- Ultra-small design and pulse train command type only
- Real-time auto gain tuning
- DIN-rail mountable (using mounting Kit)

High-speed communication "Realtime Express" support model

Ultra high-speed Network type

A5IIN series [Special Order Product]

Rated output:

50 W to 15.0 kW

- Synchronized motion and precise CP control up to 32 axes with 100 Mbps communication
- Standard Ethernet cable^{*2} using
- Two-degree-of-freedom control system

Linear motor and DD motor control type

A5IINL series [Special Order Product]

Capacity of applying Linear motor:

Compatible with 15.0 kW rotary AC servo motor

- Position, Speed and Thrust control
- Automatic setup function & Automatic magnetic pole detection function
- Two-degree-of-freedom control system

DC 24 V type

A5IIMN series [Special Order Product]

Rated output:

10 W, 20 W, 30 W

- Synchronized motion and precise CP control up to 32 axes with 100 Mbps communication
- Standard Ethernet cable^{*2} using
- Two-degree-of-freedom control system

Linear motor control, DC 24 V type

A5IIMNL series [Special Order Product]

Capacity of applying Linear motor:

Compatible with 30 W rotary AC servo motor

- Position, Speed and Thrust control
- Automatic setup function & Automatic magnetic pole detection function
- Two-degree-of-freedom control system

Linear motor and DD motor control type

A5L series [Special Order Product]

Capacity of applying Linear motor:

Compatible with 15.0 kW rotary AC servo motor

- Position, Speed, Thrust control
- Drastically reduced setup time by automatic setup
- Automatic magnetic pole detection function will detect the magnetic pole position of the linear motor.

EtherCAT communication driver type

A5B series [Special Order Product]

Rated output:

50 W to 15.0 kW

- Supports PC-based controller
- Passed Official EtherCAT Conformance Test
- Standard Ethernet cable^{*2} using
- Two-degree-of-freedom control system

General-purpose RS485 communication AE-LINK support type

A5A series [Special Order Product]

Rated output:

50 W to 5.0 kW

- Positioning is possible by built-in NC function
- Can connect up to 31 axes
- Standard Ethernet cable^{*2} using
- Two-degree-of-freedom control system

^{*} AE-LINK is a registered trade mark of Asahi Engineering.

[Special Order Product]: For details, see the website or request for information. ^{*2} Shielded twisted pair cable (CAT5e or higher)

Quicker, Wiser and Friendlier A5II series

Two-degree-of-freedom control system All-in-one type

• Full-closed control and torque control are not applicable to 2DOF control system.

A5II series

Ball screw settling time
0 ms

Belt device settling time
4 ms

• The above is a measure based on our test environment.

Two-degree-of-freedom control system Only for position control type

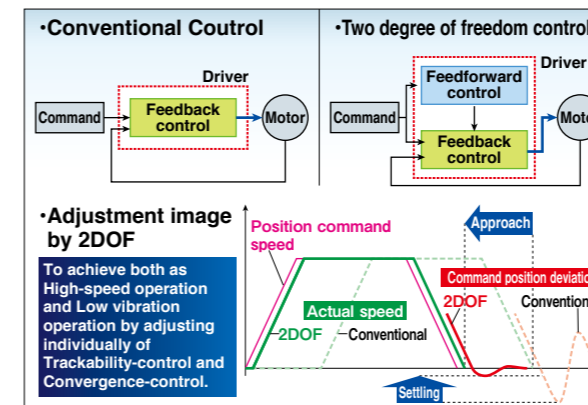

A5IIE series

Realizes quick and accurate movement. Fast response & High-precision positioning

Adopted New Algorithm "Two-degree-of-freedom control" (2DOF) to improve productivity and machining accuracy.

In the conventional model, because we could not adjust separately feedforward control and feedback controls, in other words even if we only adjust "Approach" of feedforward, it had connection with "Settling" of

• Full-closed control and torque control are not applicable to 2DOF control system.

feedback control, mutual adjustment was required. In 2DOF adopted A5II series, feedforward and feedback controls are adjusted separately, meaning "Approach" reaction to the given command, and the "Settling" can be adjusted separately. Realized low vibration and reduction of settling time. Realizes tact speed of the electronic component mounting machines, improves the accuracy of surface treatment of metal processing machines, allows for smooth operation and High speed industrial robots.

Waveform of PANATERM (the case of the ball screw: 0 ms / waveform measured settling time)

Easy and quick adjusting time. 5 times faster* than conventional

Greatly improved "operability", easy-to-use software "PANATERM".

We have upgraded setup support software PANATERM, the convenient tool for parameter setting and monitoring often required during start-up of the machine for adjustment motor and driver. Improved to more easy-understandable screen.

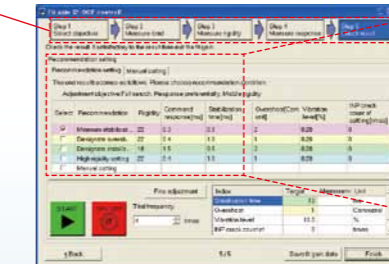

Equipped with "Fit Gain" function to realize speedy setup.

Newly developed feature "Fit Gain" maximizes the characteristics of A5II series. And adaptive notch filter function can reduce the vibration that occurs when the rigidity of the device is low, you can set and adjust automatically the best variety of gain.

Adjustment is completed in only 3 processes

Fit gain adjustment window

Automatically proposes various settings

| Select | Recommendation | Rigidity | Command response(ms) | Stabilization time(ms) |
|-------------------------------------|-----------------------|----------|----------------------|------------------------|
| <input checked="" type="checkbox"/> | Minimum stabilized | 22 | 0.3 | 0.0 |
| <input checked="" type="checkbox"/> | Designate overshoot | 22 | 0.4 | 1.0 |
| <input checked="" type="checkbox"/> | Designate stabilize | 18 | 1.5 | 0.5 |
| <input checked="" type="checkbox"/> | High rigidity setting | 22 | 0.4 | 1.0 |
| <input type="checkbox"/> | Manual setting | | | |

Realized 2.3 kHz frequency response to improve productivity

Comparison* 1.15 times faster than conventional

Realized 2.3 kHz response makes possible high-speed operation and improves productivity.

* Comparison with conventional product A5-series.

1 Quick

2.0 kHz Frequency Response A5 A5E

Example application Semiconductor production equipment, packaging, etc.

Achieves the industry's leading frequency response of 2.0 kHz.

Operation speed up by new developed LSI and high responsible control. **By the industry's leading speed and positioning response, a highly advanced system can be created. What's more, the shorter response delay will realize an extremely lower vibration.**

20 bits/revolution, 1.04 million pulses (At incremental type) A5II A5 A5IIE A5E

Example application Machine tools, textile machinery, etc.

Ensures smoother operation and reduced vibration at stopping.

Ensures accurate positioning in a short time.

New proprietary signal processing technology achieves 1.04 million pulses with a 20-bit incremental encoder.

Low Cogging Torque (Excluding MSMD, MHMD, MDME 11.0 kW, 15.0 kW) A5II A5 A5IIE A5E

Example application Semiconductor production equipment, textile machinery, etc.

For the industry's most stable speed and lowest cogging

We've achieved the industry's lowest cogging by minimizing the pulse width by a new design incorporating a 10-pole rotor for the motor and a magnetic field parsing technique. **Positioning and stability are greatly improved by the minimal torque variation. This results to improved speed stability and positioning of motor rotation.**

The Input/Output Pulse 4 Mpps A5II A5 A5IIE A5E

Example application Semiconductor production equipment, machine tools, etc.

Accommodates the industry's leading positioning resolution commands (with pulse train commands).

The command input and feedback output operate at the high speed of 4 Mpps. Accommodates high-resolution and high-speed operation, including standard full closed operation. (Provided with A5II, A5 only.)

2 Smart

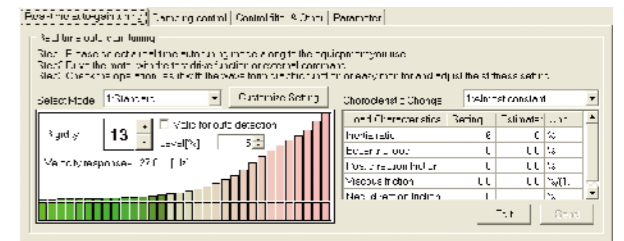

Highly Functional Real-time Auto-Gain Tuning A5II A5 A5IIE A5E

Example application Semiconductor production equipment, food processing machinery, etc.

High-performance real-time auto-gain tuning featuring simple setup.

After installation, tuning will be completed automatically after several operations. When the response is adjusted, **simple tuning** is supported with a change of one parameter value. Use of the gain adjustment mode in the setup support software contributes to optimum adjustment. **The built-in auto vibration suppression function reduces equipment damage.** Appropriate modes are provided for various machines such as **vertical axis machines and high friction machines with belts.**

This makes it possible to perform simple optimal adjustments simply by selecting the mode and stiffness.

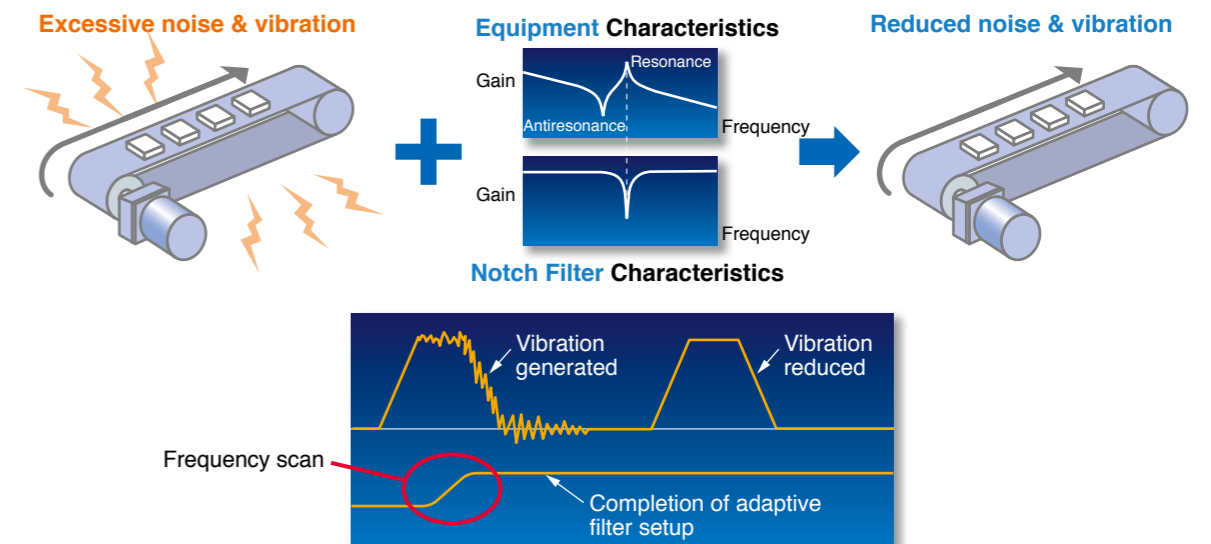

Manual/Auto Notch Filters A5II A5 A5IIE A5E

Example application Semiconductor production equipment, food processing machinery, etc.

Equipped with auto-setting notch filters for greater convenience.

Now there is no need to measure troublesome vibration frequencies. Our notch filters automatically detect vibration and provide simple auto-setting. These notch filters greatly reduce noise and vibration caused by equipment resonance and respond quickly

during operation. The A5II, A5 series features an industry-largest total of four notch filters with setup frequencies of 50 Hz to 5000 Hz. This approach enables depth adjustment within this frequency range. (Two of the filters share the auto set-up.)

Manual/Auto Damping Filter

A5II A5 A5IIE A5E

Example application Chip mounters, food processing machinery, robots, general production machinery, etc.

Equipped with a damping filter featuring simplified automatic setup.

The setup software features automatic setup of the damping filter. This filter removes the natural vibration frequency component from the command input, greatly reducing vibration of the axis when stopping. The number of filters has been increased to four from the conventional two filters (two for simultaneous use). The adaptive frequency has also been significantly expanded from 1 Hz to 200 Hz.

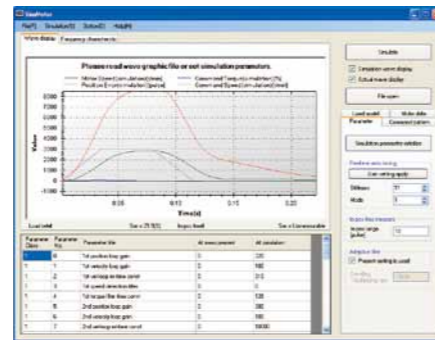

Motion Simulation

A5II A5 A5IIE A5E

Example application General production machinery, etc.

Equipped with a simplified machine simulation function.

The setup software uses frequency response data acquired from the actual machine. In addition, it features a machine simulation function for performing simulated operation. This allows you to easily confirm the effects of gain and various filters without adjusting the actual equipment.

New Structure/ Innovative Core/ Innovative Encoder

A5II A5 A5IIE A5E

Example application Robots, chip mounters, general production machinery, etc.

Featuring significantly reduced weight and a more compact motor

We've developed new designs for both compact motors and large motors. The new design used for the core has succeeded in compact. The addition of an innovative compact encoder has contributed to a 10% to 25% (1 kg to 6 kg) reduction in motor weight in the 1 kW and larger class when compared with conventional motors.

[Examples for MSM or MDM]

| Series | A4 | A5II A5 | Weight Reduction |
|----------|---------|---------|------------------|
| MSM 1 kW | 4.5 kg | 3.5 kg | ▲1 kg |
| MSM 2 kW | 6.5 kg | 5.3 kg | ▲1.2 kg |
| MDM 1 kW | 6.8 kg | 5.2 kg | ▲1.6 kg |
| MDM 2 kW | 10.6 kg | 8.0 kg | ▲2.6 kg |

Complies with European Safety Standards.

A5II A5

Example application Semiconductor and LCD production equipment, etc.

Compliance with EU safety standards.

Features non-software-based independent redundant circuitry for motor power isolation. independent redundant circuitry for motor power isolation. This obviates the need for magnetic contactors to isolate

the required motor in order to accommodate low-voltage machinery commands. (The final safety compliance must be applied as machine.)

Low noise

A5II A5 A5IIE A5E

Example application Semiconductor and LCD production equipment, etc. general production machinery for export to the European market

Complies with the European EMC Directive

By incorporating the latest circuit technology, A5II, A5 series achieves a further noise reduction of 3 dB compared with the conventional A4 series, which also features noise suppression. (The A4 series also conforms to the EMC Directive.)

IP67 Enclosure Rating (Products are build to order items.)

A5II A5 A5IIE A5E

Example application Machine tools, robots, printing machines, etc.

IP67 enclosure rating for increased environmental resistance

Our improved motor seals and direct-mount connectors in the motor power supply and encoder input-output areas contribute to this unit's IP67 enclosure rating.

Adoption of direct-mount connector

IP67

- Protection against water
 - Protection against temporary immersion in water
- Protection against dust
 - Protected against dust penetration when in full contact

- Motors of MSMD and MHMD series and 0.9 kW or higher standard stock items have IP65 rating.
- Motors of IP67 have smaller encoder connector that requires cable compatible with IP67 motor.
- * IP67 motor is build to order items.

5 Easy

PANATERM Set-up Support Software

A5II A5 A5IIE A5E

The PANATERM Set-up Support Software, with many added features.

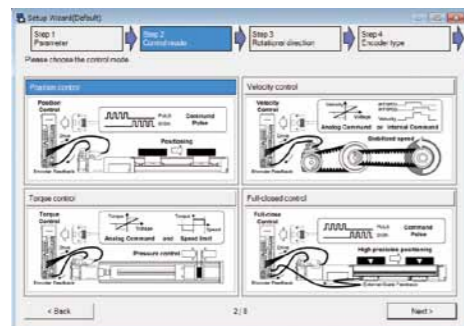

The PANATERM assists users in setting parameters, monitoring control conditions, setup support, and analyzing mechanical operation data on the PC screen, when installed in a commercially available personal computer, and connected to the MINAS A5 Family through the USB interface.

Localized in 4 languages

Choose either English, Japanese, Chinese, or Korean-language display.

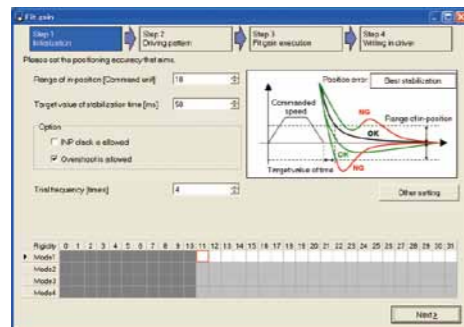

Setup Wizard

This wizard supports fundamental settings in each control mode step by step, including reading of default setting. In on-line condition, input data related to each step can be monitored in real time.

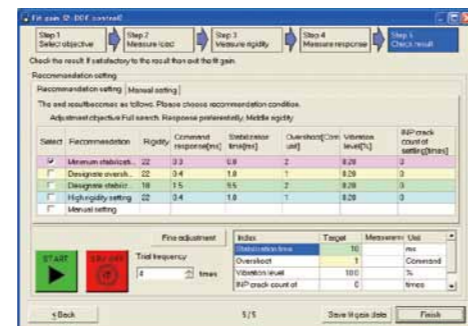

Fit gain

This function automatically searches the best suitable stiffness setting and mode and adjusts the gain once the target in-position range and setting time are set.

The fit gain function for setting two-degree-of-freedom control.

- 1) Select the adjustment method
- 2) Load measurement
- 3) Adjust gain to meet your needs by confirming results. (for A5II, A5IIE)

Service Life Prediction

The service life prediction function considers the internal temperature for main components such as the fan and condenser. If the rated value is exceeded, an alarm is displayed. This approach prevents unexpected suspension of operation and allows for planning of systemized maintenance.

| Name | Value | Unit | Status |
|---|-------|--------|--------|
| Power supply on integrated time | 3.0 | h | |
| Converter temperature | 34 | degree | |
| Number of times of impulsive resistance | 0 | times | |
| Number of times of DB relay changing | 0 | times | |
| Fan operation time | 0.0 | h | |
| Fan life time integrated value | 0.0 | % | |
| Condenser life time integrated value | 0.0 | % | |
| Maker users | 0 | - | |

Note: The life span prediction value should be considered as a guide only.

Encoder Temperature Monitor

The Encoder Temperature Monitor is a new function capable of real-time measurement of the interior temperature of the encoder, something that has been difficult to achieve in the past. It is valuable for monitoring the motor and can be used as a diagnostic in the event of a malfunction (provided with 20-bit encoder only).

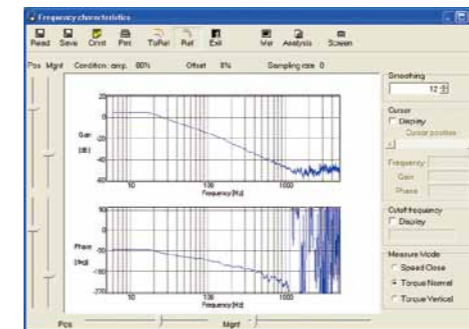

Other New Function

The software offers a wide range of convenient features including motor and driver data such as load factor, voltage, and driver temperature. Moreover, the logging function records the interface history. As well, a non-rotating contributing factor display function.

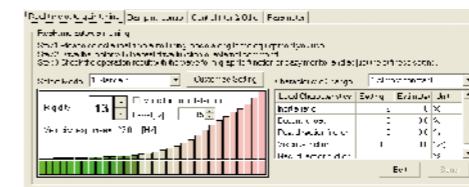

Frequency characteristics measurement function

Can check frequency response characteristics of the mechanism and motor. Since resonance frequency of the mechanism is measurable, it is effective for start-up time reduction.

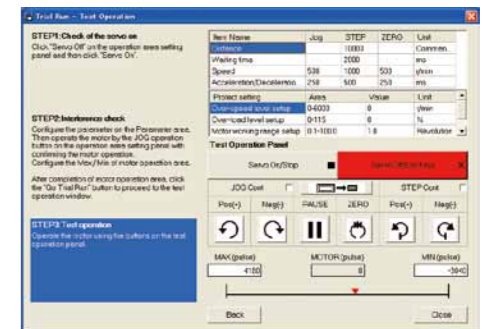

Added New screen for gain adjustment, equipped with stiffness oscillation auto-reduction function

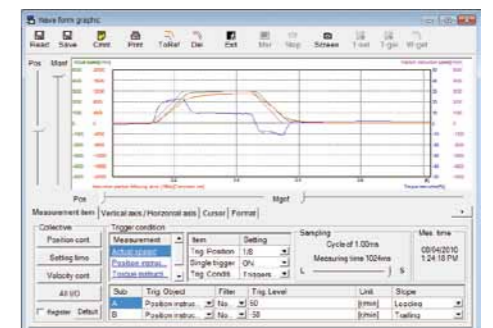

Trial run

This function supports positioning with the Z-phase search and software limit.

Significant increase of measuring objects Multi-functional waveform graphic

CAUTION

This software is applicable only to A5II, A5, A5IIE, A5E series. To apply this software to conventional product (A, AIII, E or A4 series), consult our distributors.

Hardware configuration

| | | |
|-------------------|---------------------------|---|
| Personal computer | CPU | Pentium III 512MHz or more |
| | Memory | 256MB or more (512MB recommended) |
| | Hard disk capacity | Vacancy of 512MB or more recommended |
| | OS | Windows® XP SP3 (32-bit Ver.), Windows® VISTA SP1 (32-bit Ver.), Windows® 7 (32-bit Ver., 64-bit Ver.) [English, Japanese, Chinese or Korean version] |
| Display | Serial communication port | USB port |
| | Resolution | 1024 x 768pix or more (desirably 1024 x 768) |
| | Number of colors | 24bit colors (TrueColor) or more |

Please download from our web site and use after install to the PC.

<http://industrial.panasonic.com/ww/products/motors-compressors/fa-motors>

Other Functions

Command Control Mode A5II A5 A5IIE A5E

- Command control mode is available for Position, Speed (including eight internal velocities) and Torque.
- Using parameter settings, you can set up one optional command control mode or two command control modes by switching.
- According to suitable application utility, proper optional command control mode can be chosen.

Full-closed Control A5II A5 A5IIE A5E

AB-phase linear scale (for general all-purpose products) or serial scale (for products with Panasonic's exclusive format) scales can be used (P.14).

SEMI F47 A5II A5 A5IIE A5E

- Includes a function in compliance with the SEMI F47 standard for voltage sag immunity under no load or light load.
 - Ideal for the semiconductor and LCD industries.
- Notes:
- 1) Excluding the single-phase 100-V type.
 - 2) Please verify the actual compliance with your machine checking the F47 standard for voltage sag immunity.

Inrush Current Preventive Function A5II A5 A5IIE A5E

- This driver is equipped with a rush current preventive resistor to prevent the circuit breaker from shutting off the power supply as a result of inrush current occurring at power-on.

Regenerative Energy Discharge A5II A5 A5IIE A5E

- A regenerative resistor is used to discharge regenerative energy, which is the energy generated when stopping a load with a large moment of inertia or when using this unit in vertical operation. This energy is returned to the driver from the motor.
- Frame A, B, G and frame H model drivers do not contain a regenerative resistor. Optional regenerative resistors are recommended.
- Frame C to frame F model drivers contain one regenerative resistor; however, adding an optional regenerative resistor provides additional regeneration capability.

6000-rpm capability A5II A5 A5IIE A5E
(build to order item)

The MSME motor (under 750 W) can accommodate a maximum speed of 6000 r/min.

[Comparison of new and conventional 200 W]

- **Gear head**
Gear heads for 6000 r/min and 5000 r/min motors are available. Set 5000 r/min gear head only to 5000 r/min motor, and set 6000 r/min gear head only to 6000 r/min motor.
When customers prepare a gear head, use it as follows:
MSME → 6000 r/min
MSMD } → 5000 r/min
MHMD }

Dynamic Braking A5II A5 A5IIE A5E

- With parameter settings, you can select dynamic braking, which shorts servomotor windings U, V and W at Servo-OFF, during positive direction/ negative direction, and during power shutdown and tripping of the circuit breaker for over travel inhibition.
* The dynamic brake circuit of H-frame is external.
- The desired action sequence can be set up to accommodate your machine requirements.

Parameter Initialization A5II A5 A5IIE A5E

Using the front panel or by connecting a PC, you can restore the parameters to the factory settings.

Disturbance Observer A5II A5 A5IIE A5E

By using a disturbance observer to add an estimated disturbance torque value to the torque canceling command, this function diminishes the impact of the disturbance torque, reduces vibration, and offsets any speed decline.

Disturbance observer function not in effect

Disturbance observer function in effect

Torque Feed Forward A5II A5 A5IIE A5E

The Torque Feed Forward function performs a comparison with feedback and calculates the amount of torque to add to the necessary torque command in the command for actuation.

Friction Torque Compensation A5II A5 A5IIE A5E

This function reduces the effect of machine-related friction and improves responsiveness. Two kinds of friction compensation can be set up: unbalanced load compensation, which compensates with a constant operational offset torque; and kinetic friction, which changes direction in response to the direction of movement.

3-Step Gain A5II A5 A5IIE A5E

A 3-step gain switch is available in addition to the normal gain switch. This chooses appropriate gain tunings at both stopping and running. The 3-step gain switch gives you choices of 3 different tunings for normal running, stopping for faster positioning and at stopping. The right gaining tunings achieve lower vibration and quicker positioning time of your application.

Inertia Ratio Conversion A5II A5 A5IIE A5E

You can adjust right inertia ratio by Inertia Ratio Conversion input(J-SEL). When you have significant load inertia changes, it can adjust unbalanced speed and position gain turning combination. It ends up quicker response of your system.

Input/Output Signal Assignment A5II A5 A5IIE A5E

You can use the parameters to arbitrarily allocate the universal 10 inputs and 6 outputs. (Inputs can be selected as either A contacts or B contacts). The Panatorm setup software provides an exclusive screen for a more simplified setup.

Torque Limiter Switching A5II A5 A5IIE A5E

You can use the I/Os to set up torque limits. These can be used for applications such as simplified pressure, tension control, and sensor-less homing.

[Connector type (100/200 V: A-frame to E-frame)]

<Caution>
Apply adequate tightening torque to the product mounting screw by taking into consideration strength of the screw and the characteristics of material to which the product is installed. Overtightening can damage the screw and/or material; undertightening can result in loosening.
Example) Steel screw (M5) into steel section: 2.7 N·m to 3.3 N·m.

[Connector type (400 V: D, E-frame)]

<Note>
Initial setup of rotational direction: positive = CCW and negative = CW.
Pay an extra attention.

- *1 Select peripheral equipments for single/3phase common specification according to the power source.
- *2 For the external dynamic brake resistor, use the magnetic contactor with the same rating as that for the main circuit.
- *3 When use the external regenerative resistor of the option (DV0PM20058, DV0PM20059), use the cable with the same diameter as the main circuit cable.
- *4 For the ground screw, use the same crimp terminal as that for the main circuit terminal block.
- *5 The diameter of the ground cable and the external dynamic brake resistor cable must be equal to, or larger than that of the motor cable.
The motor cable is a shield cable, which conforms to the EC Directives and UL Standards. (G, H-frame only)
- *6 Use these products to suit an international standard.

• About circuit breaker and magnetic contactor

To comply to EC Directives, install a circuit breaker between the power and the noise filter without fail, and the circuit breaker should conform to IEC Standards and UL recognized (Listed and marked). Suitable for use on a circuit capable of delivering not more than 5000 Arms symmetrical amperes, below the maximum input voltage of the product. If the short-circuit current of the power supply exceeds this value, install a current limit device (current limiting fuse, current limiting circuit breaker, transformer, etc.) to limit the short-circuit current.

<Remarks>

- Select a circuit breaker and noise filter which match to the capacity of power supply (including a load condition).
- Terminal block and protective earth terminals
 - Use a copper conductor cables with temperature rating of 75 °C or higher.
 - Use the attached exclusive connector for A-frame to E-frame, and maintain the peeled off length of 8 mm to 9 mm.

| F(400 V) | 24V, 0V L1, L2, L3, B1, B2, B3, NC, U, V, W | M3 M4 | 0.4 to 0.6 0.7 to 1.0 | | |
| G | L1C, L2C, 24V, 0V, DB1, DB2, DB3, DB4, NC | M5 | 1.0 to 1.7 | M3 | 0.3 to 0.5 |
| | L1, L2, L3, B1, B2, NC, U, V, W | M5 | 2.0 to 2.4 | | |
| H | L1C, L2C, 24V, 0V, DB1, DB2 | M4 | 0.7 to 1.0 | M5 | 2.0 to 2.5 |
| | L1, L2, L3, B1, B2, NC, U, V, W | M6 | 2.2 to 2.5 | | |

Fastening torque list (Ground terminal screw/Connector to host controller [X4])

| Driver frame | Ground screw | | Connector to host controller (X4) | |
|--------------|--------------|------------------------|-----------------------------------|------------------------|
| | Nominal size | Fastening torque (N•m) | Nominal size | Fastening torque (N•m) |
| A to E | M4 | 0.7 to 0.8 | M2.6 | 0.3 to 0.35 |
| G | M5 | 1.4 to 1.6 | | |
| H | M6 | 2.4 to 2.6 | | |

<Caution>

- Applying fastening torque larger than the maximum value may result in damage to the product.
- Do not turn on power without tightening all terminal block screws properly, otherwise, loose contacts may generate heat (smoking, firing).

<Remarks>

- To check for looseness, conduct periodic inspection of fastening torque once a year.

Note) 1 Rotary encoder specifications: □ Motor specification: * (refer to P.16)

Note) 2 ◇ : Drivers series K: A5II series H: A5 series

Note) 3 ◇ : Drivers series K: A5IE series H: A5E series

Note) 4 Because A5IE, A5E series drivers (dedicated for position control) do not support the 17-bit absolute specification, only 20-bit incremental type can be used in combination.

Note) 5 Cable length: ** (03: 3 m, 05: 5 m, 10: 10 m, 20: 20 m) (Example. 3 m: MFECA0030EAM)

Note) 6 Cables for opposite to output shaft cannot be used with 50 W or 100 W motor.

Note) 7 When you use a 17-bit absolute encoder as an incremental encoder, please use the encoder cable MFECA0**0EAD.

Note) 8 Please note that a battery is not supplied together with 17-bit absolute encoder cable (with battery box). Please buy the battery part number "DV0P2990" separately.

• Selection of cable for MSME motor (Movable: For application where the cable is movable.) (Fixed: For application where the cable is fixed.)

• Encoder cable

Example: MFECA0**0 ◇ △ □

| Symbol | Specifications | △ : Cable direction | □ : Encoder Specifications |
|--------|----------------|---------------------|-----------------------------------|
| M | Movable | J | Direction of motor shaft |
| T | Fixed | K | Opposite direction of motor shaft |
| | | D | 20-bit Incremental |
| | | E | 17-bit Absolute |

• Motor cable

Example: MFMCA0**0 ◇ △ D

| Symbol | Specifications | △ : Cable direction | |
|--------|----------------|---------------------|-----------------------------------|
| N | Movable | J | Direction of motor shaft |
| R | Fixed | K | Opposite direction of motor shaft |

• Brake cable

Example: MFMCB0**0 ◇ △ T

| Symbol | Specifications | △ : Cable direction | |
|--------|----------------|---------------------|-----------------------------------|
| P | Movable | J | Direction of motor shaft |
| S | Fixed | K | Opposite direction of motor shaft |

Note) 1 Rotary encoder specifications: □ Motor specification: * (refer to P.16)

Note) 2 ◇ : Drivers series K: A5II series H: A5 series Note) 3 ◇ : Drivers series K: A5IE series H: A5E series

Note) 4 Because A5IE, A5E series drivers (dedicated for position control) do not support the 17-bit absolute specification, only 20-bit incremental type can be used in combination.

Note) 5 Cable length: ** (03: 3 m, 05: 5 m, 10: 10 m, 20: 20 m), (Example. 3 m: MFECA0030EAM)

Note) 6 Other combinations exist, and refer to P.210 for details.

Note) 7 Reactor should be prepared by the user.

Note) 8 Please note that a battery is not supplied together with 17-bit absolute encoder cable (with battery box).

Please buy the battery part number "DV0P2990" separately.

|----------------------|-------------------------|--|---|--|--------------------------------|----------------|-------------|--|
| Basic Specifications | Input power | 100 V | Main circuit | Single phase, 100 V to 120 V | +10 % -15 % | 50 Hz/60 Hz | | |
| | | | Control circuit | Single phase, 100 V to 120 V | +10 % -15 % | 50 Hz/60 Hz | | |
| | | 200 V | Main circuit | A-frame to D-frame | Single/3-phase, 200 V to 240 V | +10 % -15 % | 50 Hz/60 Hz | |
| | | | | E-frame to H-frame | 3-phase, 200 V to 230 V | +10 % -15 % | 50 Hz/60 Hz | |
| | | | Control circuit | A-frame to D-frame | Single phase, 200 V to 240 V | +10 % -15 % | 50 Hz/60 Hz | |
| | | | | E-frame to H-frame | Single phase, 200 V to 230 V | +10 % -15 % | 50 Hz/60 Hz | |
| | | 400 V | Main circuit | D-frame to H-frame | 3-phase, 380 V to 480 V | +10 % -15 % | 50 Hz/60 Hz | |
| | | | Control circuit | D-frame to H-frame | DC 24 V ± 15 % | | | |
| | | Environment | temperature | Ambient temperature: 0 °C to 55 °C (free from freezing) Storage temperature: -20 °C to 65 °C (Max.temperature guarantee: 80 °C for 72 hours free from condensation ^{*1}) | | | | |
| | | | humidity | Both operating and storage : 20 % to 85 %RH (free from condensation ^{*1}) | | | | |
| | | | Altitude | Lower than 1000 m | | | | |
| | | | Vibration | 5.88 m/s ² or less, 10 Hz to 60 Hz (No continuous use at resonance frequency) | | | | |
| | Control method | | IGBT PWM Sinusoidal wave drive | | | | | |
| | Encoder feedback | | 17-bit (131072 resolution) absolute encoder, 7-wire serial 20-bit (1048576 resolution) incremental encoder, 5-wire serial | | | | | |
| | Feedback scale feedback | A/B phase | A/B phase, initialization signal differential input. | | | | | |
| | | serial | Manufacturers that support serial communication scale: DR. JOHANNES HEIDENHAIN GmbH Fagor Automation S.Coop. Magnescale Co., Ltd. Mitutoyo Corporation Nidec Sankyo Corporation Renishaw plc | | | | | |
| | Parallel I/O connector | Control signal | Input | General purpose 10 inputs The function of general-purpose input is selected by parameters. | | | | |
| | | | Output | General purpose 6 outputs The function of general-purpose output is selected by parameters. | | | | |
| | | Analog signal | Input | 3 inputs (16Bit A/D : 1 input, 12Bit A/D : 2 inputs) | | | | |
| | | | Output | 2 outputs (Analog monitor: 2 output) | | | | |
| | | Pulse signal | Input | 2 inputs (Photo-coupler input, Line receiver input) | | | | |
| | | | Output | 4 outputs (Line driver: 3 output, open collector: 1 output) | | | | |
| | Communication function | USB | Connection with PC etc. | | | | | |
| | | RS232 | 1 : 1 communication | | | | | |
| RS485 | | 1 : n communication up to 31 axes to a host. | | | | | | |
| Safety function | | Used for functional safety. | | | | | | |
| Front panel | | (1) 5 keys (2) LED (6-digit) (3) Connector for monitor (Analog monitor output (2ch), Digital monitor output (1ch)) | | | | | | |
| Regeneration | | A, B, G and H-frame: no built-in regenerative resistor (external resistor only) C-frame to F-frame: Built-in regenerative resistor (external resistor is also enabled.) | | | | | | |
| Dynamic brake | | A-frame to G-frame: Built-in (external resistor is also available to G-frame) H-frame: External only | | | | | | |
| Control mode | | Switching among the following 7 mode is enabled, (1) Position control (2) Speed control (3) Toque control (4) Position/Speed control (5) Position/Torque control (6) Speed/Torque control (7) Full-closed control | | | | | | |

*1 Air containing water vapor will become saturated with water vapor as the temperature falls, causing dew.

*2 Not applicable to 2DOF control system.

| | | | | | | |
|--|------------------------------------|--|---|--|---|--|
| Function | Position control | Control input | | (1) Deviation counter clear (2) Command pulse inhibition (3) Electric gear (4) Damping control switching etc. | | |
| | | Control output | | Positioning complete (In-position) etc. | | |
| | | Pulse input | Max. command pulse frequency | Exclusive interface for Photo-coupler: 500 kpps Exclusive interface for line driver : 4 Mpps | | |
| | | | Input pulse signal format | Differential input (1) Positive and Negative direction, (2) A and B-phase, (3) Command and direction) | | |
| | | | Electronic gear (Division/Multiplication of command pulse) | 1/1000 times to 1000 times | | |
| | | | Smoothing filter | Primary delay filter or FIR type filter is adaptable to the command input | | |
| | | Analog input | Torque limit command input | Individual torque limit for both positive and negative direction is enabled. | | |
| | | | Torque feed forward input | Analog voltage can be used as torque feed forward input. | | |
| | | Instantaneous Speed Observer | | Available | | |
| | | Damping Control | | Available | | |
| | | 2DOF settings | | Only available at A5II Series | | |
| | | Speed control | Control input | | (1) Selection of internal velocity setup 1 (2) Selection of internal velocity setup 2 (3) Selection of internal velocity setup 3 (4) Speed zero clamp etc. | |
| | Control output | | Speed arrival etc. | | | |
| | Analog input | | Velocity command input | Speed command input can be provided by means of analog voltage. Parameters are used for scale setting and command polarity. (6 V/Rated rotational speed Default) | | |
| | | | Torque limit command input | Individual torque limit for both positive and negative direction is enabled. | | |
| | | | Torque feed forward input | Analog voltage can be used as torque feed forward input. | | |
| | Internal velocity command | | Switching the internal 8speed is enabled by command input. | | | |
| | Soft-start/down function | | Individual setup of acceleration and deceleration is enabled, with 0 s to 10 s/1000 r/min. Sigmoid acceleration/deceleration is also enabled. | | | |
| | Zero-speed clamp | | Speed zero clamp input is enabled. | | | |
| | Instantaneous Speed Observer | | Available | | | |
| | Speed Control filter | | Available | | | |
| | 2DOF settings | | Only available at A5II Series | | | |
| | Torque control ^{*2} | | Control input | | Speed zero clamp, Torque command sign input etc. | |
| | | Control output | | Speed arrival etc. | | |
| Analog input | | Torque command input | Speed command input can be provided by means of analog voltage. Parameters are used for scale setting and command polarity. (3 V/rated torque Default) | | | |
| | | Speed limit function | | Speed limit value with parameter is enabled. | | |
| Control input | | (1) Deviation counter clear (2) Command pulse inhibition (3) Command dividing gradual increase switching (4) Damping control switching etc. | | | | |
| Control output | | Full-closed positioning complete etc. | | | | |
| Full-closed control ^{*2} | Pulse input | Max. command pulse frequency | Exclusive interface for Photo-coupler: 500 kpps Exclusive interface for line driver : 4 Mpps | | | |
| | | Input pulse signal format | Differential input | | | |
| | | Electronic gear (Division/Multiplication of command pulse) | 1/1000 times to 1000 times | | | |
| | | Smoothing filter | Primary delay filter or FIR type filter is adaptable to the command input | | | |
| | Analog input | Torque limit command input | Individual torque limit for both positive and negative direction is enabled. | | | |
| | | Torque feed forward input | Analog voltage can be used as torque feed forward input. | | | |
| Setup range of division/multiplication of feedback scale | | 1/40 times to 160 times | | | | |
| Damping Control | | Available | | | | |
| Common | Auto tuning | | The load inertia is identified in real time by the driving state of the motor operating according to the command given by the controlling device and set up support software "PANATERM". The gain is set automatically in accordance with the rigidity setting. | | | |
| | Division of encoder feedback pulse | | Set up of any value is enabled (encoder pulses count is the max.). | | | |
| | Protective function | Hard error | Over-voltage, under-voltage, over-speed, over-load, over-heat, over-current and encoder error etc. | | | |
| | | Soft error | Excess position deviation, command pulse division error, EEPROM error etc. | | | |
| | Traceability of alarm data | | The alarm data history can be referred to. | | | |

| | | | | | | | | |

Wiring to the Connector, X3 (Excluding A5IIE, A5E Series)

Connecting the host controller can configure a safety circuit that controls the safety functions. When not constructing the safety circuit, use the supplied safety bypass plug.

Outline Description of Safe Torque Off (STO)

The safe torque off (STO) function is a safety function that shuts the motor current and turns off motor output torque by forcibly turning off the driving signal of the servo driver internal power transistor. For this purpose, the STO uses safety input signal and hardware (circuit).

When STO function operates, the servo driver turns off the servo ready output signal (S-RDY) and enters safety state.

This is an alarm condition and the 7-seg LED on the front panel displays the error code number.

Safety Precautions

- When using the STO function, be sure to perform equipment risk assessment to ensure that the system conforms to the safety requirements.
- Even while the STO function is working, the following potential safety hazards exist. Check safety in risk assessment.
 - The motor may move when external force (e.g. gravity force on vertical axis) is exerted on it. Provide an external brake, etc., as necessary to secure the motor. Note that the purpose of motor with brake is holding and it cannot be used for braking application.
 - When parameter Pr5.10 Sequence at alarm is set to free run (disable dynamic brake), the motor is free run state and requires longer stop distance even if no external force is applied. Make sure that this does not cause any problem.
 - When power transistor, etc., becomes defective, the motor will move to the extent equivalent of 180 electrical angle (max.). Make sure that this does not cause any problem.
 - The STO turns off the current to the motor but does not turn off power to the servo driver and does not isolate it. When starting maintenance service on the servo driver, turn off the driver by using a different disconnecting device.
- External device monitor (EDM) output signal is not a safety signal. Do not use it for an application other than failure monitoring.
- Dynamic brake and external brake release signal output are not related to safety function. When designing the system, make sure that the failure of external brake release during STO condition does not result in danger condition.
- When using STO function, connect equipment conforming to the safety standards.

Applicable External Scale

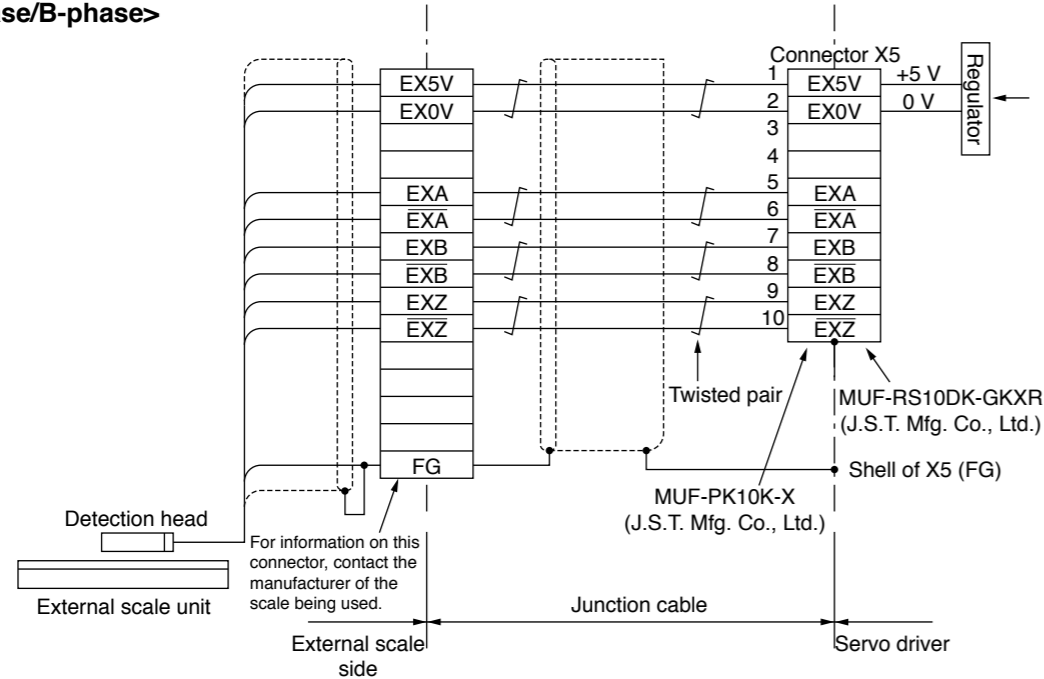

The manufacturers applicable external scales for this product are as follows.

- DR. JOHANNES HEIDENHAIN GmbH
- Fagor Automation S.Coop.
- Magnescale Co., Ltd.
- Mitutoyo Corporation
- Nidec Sankyo Corporation
- Renishaw plc

* For the details of the external scale product, contact each company.

Wiring Diagram of X5

<A-phase/B-phase>

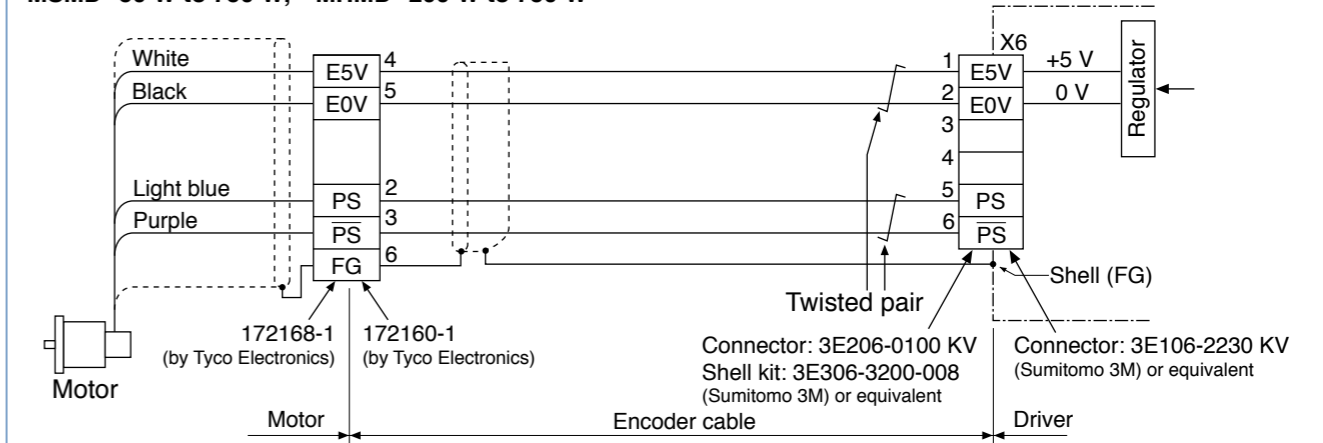

<Serial>

In Case of 20-bit Incremental Encoder

MSMD 50 W to 750 W, MHMD 200 W to 750 W

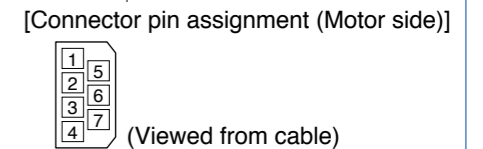

MSME 50 W to 750 W (200 V)

<Caution>

- Tighten the motor connector mounting screw (M2) with a torque between 0.19 N·m and 0.21 N·m. To avoid damage, be sure to use only the screw supplied with the connector.
- Do not remove the gasket supplied with the junction cable connector. Securely install the gasket in place. Otherwise, the degree of protection of IP67 will not be guaranteed.

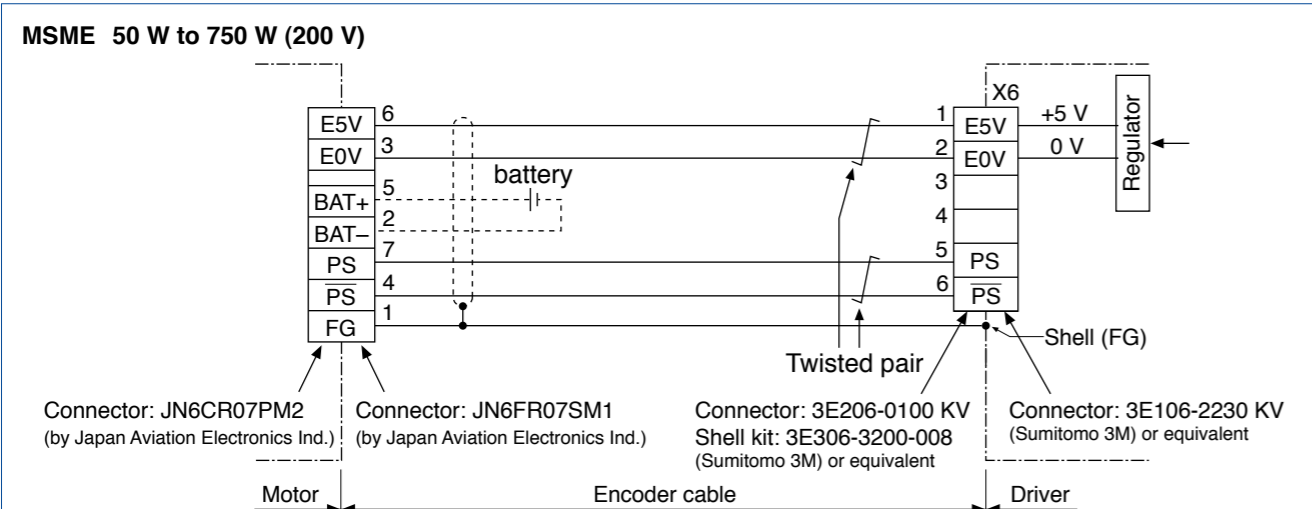

MSME 750 W (400 V), 1.0 kW to 5.0 kW, MDME 400 W to 15.0 kW, MFME 1.5 kW to 4.5 kW
MGME 0.9 kW to 6.0 kW, MHME 1.0 kW to 7.5 kW

[Connector pin assignment] Refer to P.186, P.187 "Specifications of Motor connector".

In Case of 17-bit Absolute Encoder (A5IE, A5E series does not correspond.)

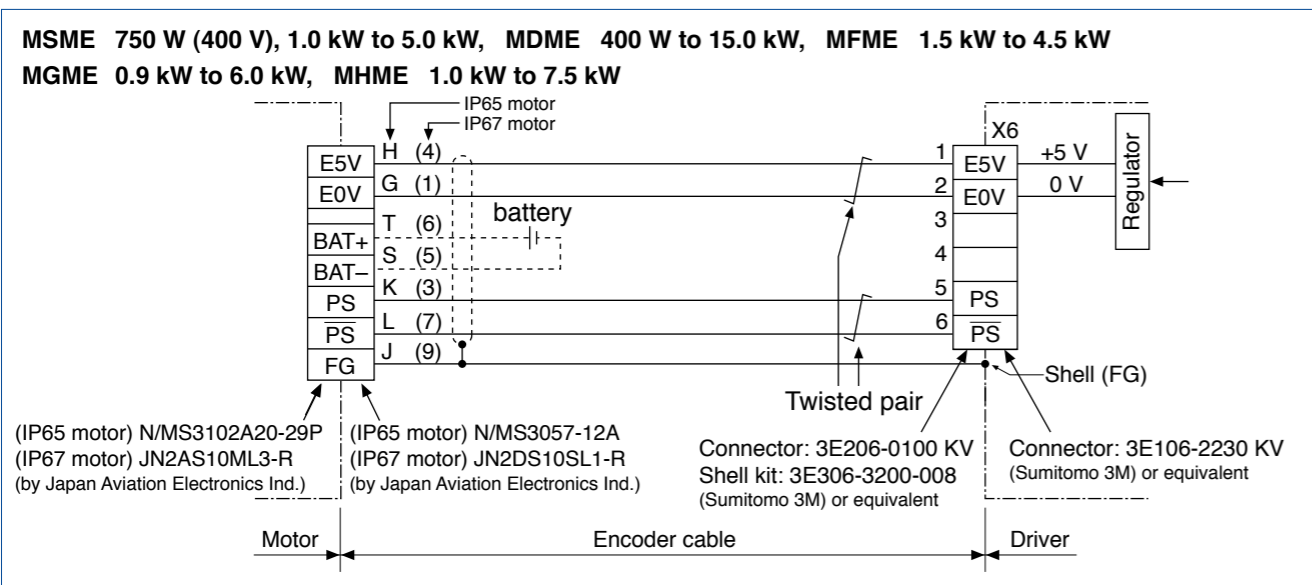

<Caution>

- Tighten the motor connector mounting screw (M2) with a torque between 0.19 N·m and 0.21 N·m. To avoid damage, be sure to use only the screw supplied with the connector.
- Do not remove the gasket supplied with the junction cable connector. Securely install the gasket in place. Otherwise, the degree of protection of IP67 will not be guaranteed.

[Connector pin assignment (Motor side)]

(Viewed from cable)

[Connector pin assignment] Refer to P.186, P.187 "Specifications of Motor connector".

• The size of A5II, A5 series and A5IE, A5E series is same.

*1 The height of the safety by-pass provided plug is one of the 14 mm or 24 mm to connector X3.

A-frame

B-frame

• The size of A5II, A5 series and A5IE, A5E series is same.
 *1 The height of the safety by-pass provided plug is one of the 14 mm or 24 mm to connector X3.

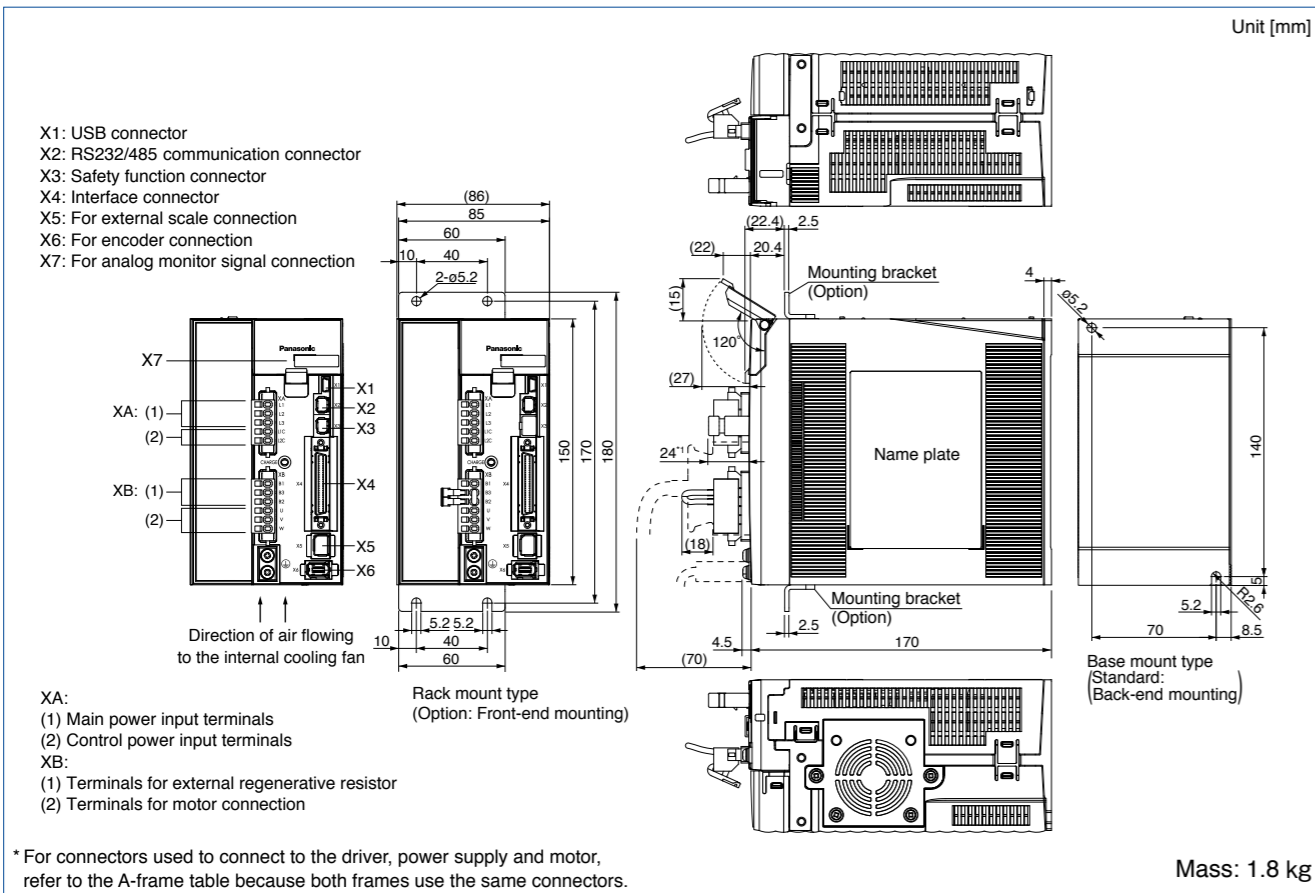

C-frame

D-frame (400 V)

D-frame (200 V)

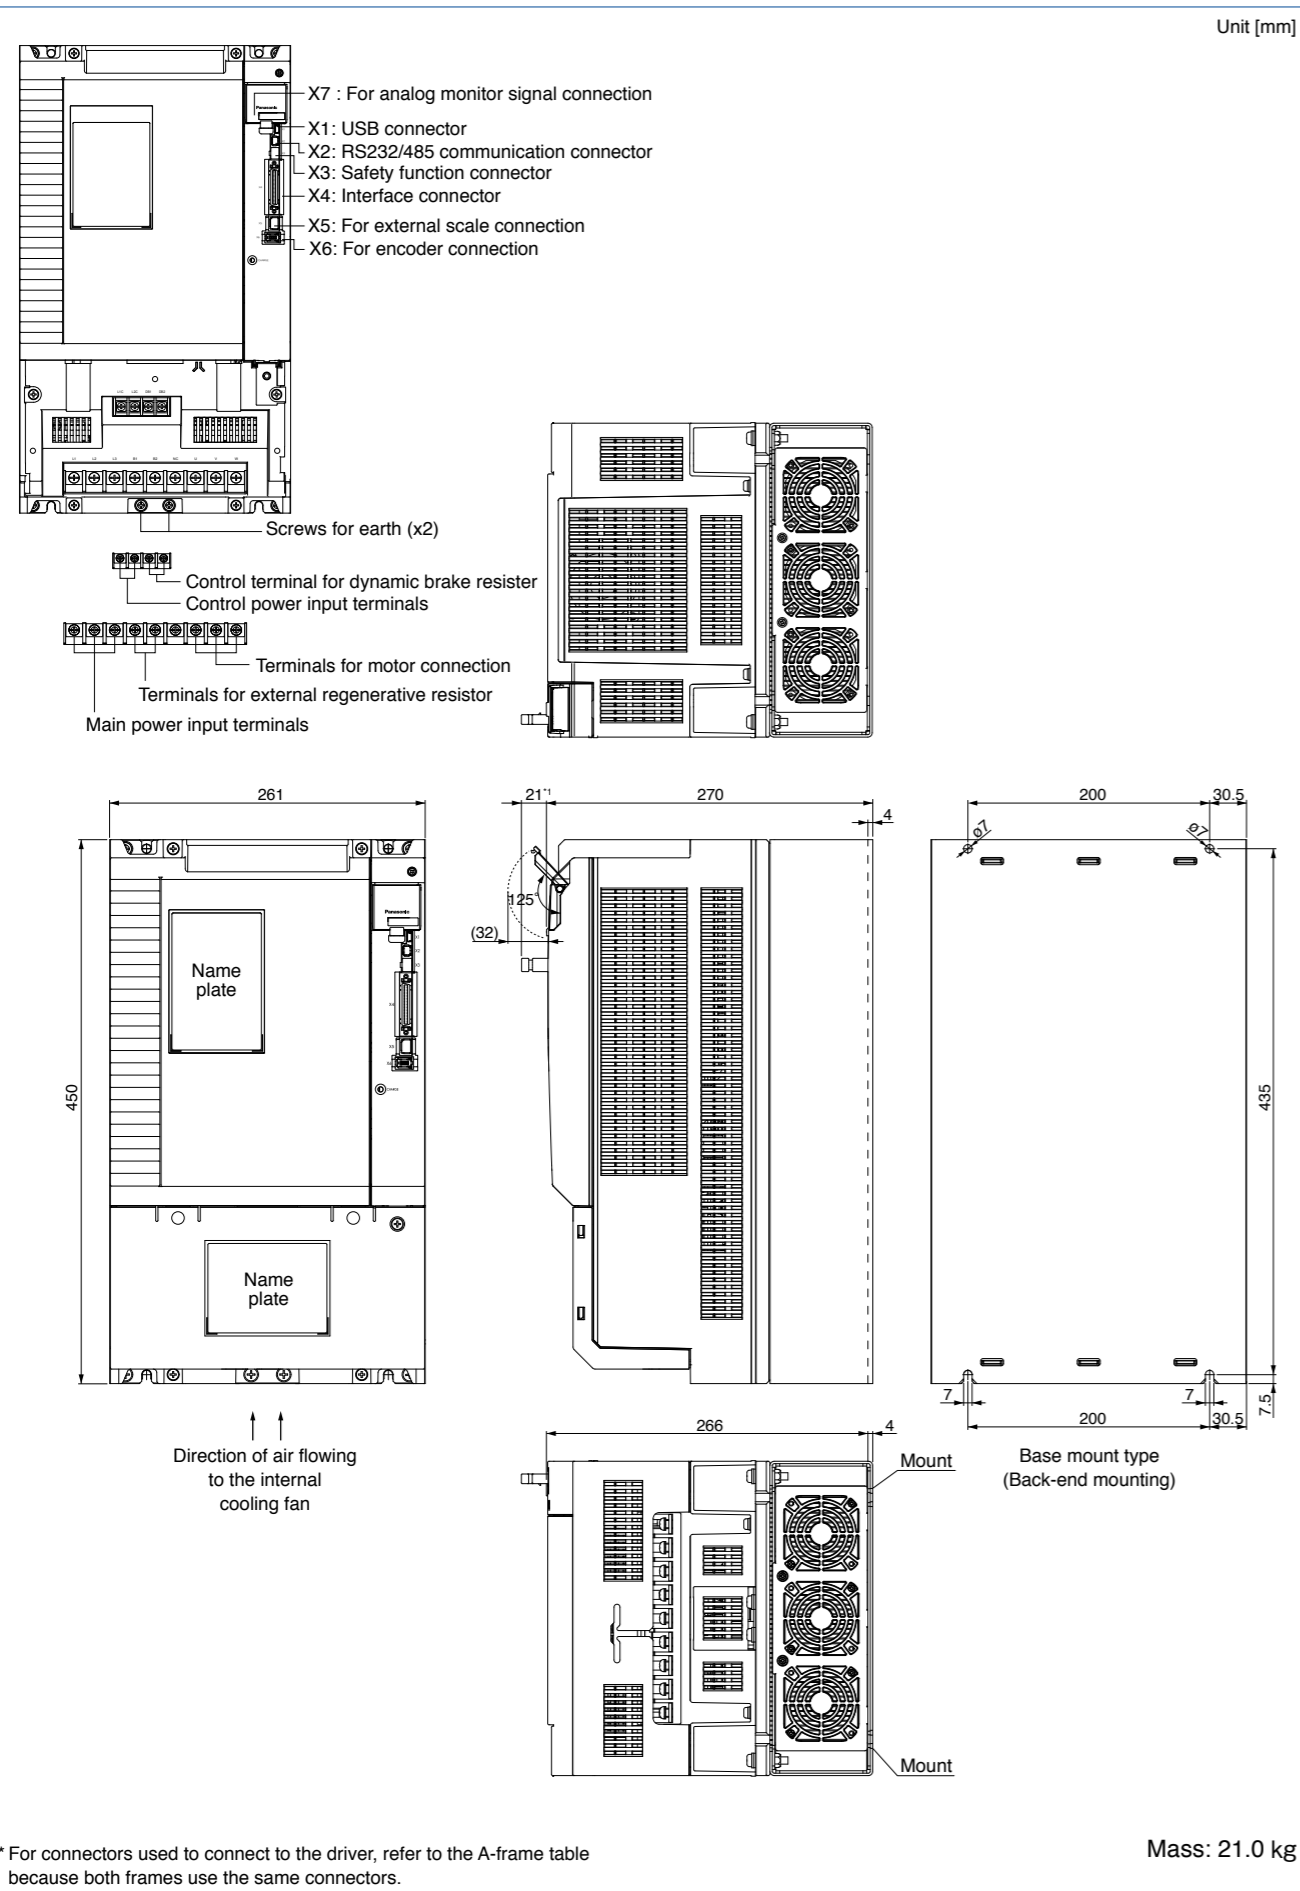

E-frame (200 V)

● A5IE, A5E series is out of the lineup.

*1 The height of the safety by-pass provided plug is one of the 11 mm or 21 mm to connector X3.

H-frame (200 V/400 V)

* For connectors used to connect to the driver, refer to the A-frame table because both frames use the same connectors.

Features/ Lineup

Features

- Line-up IP65 motor: 50 W to 5.0 kW
 IP67 motor: 50 W to 15.0 kW
- Max speed: 6000r/min (MSME 50 W to 750 W)
- Low inertia (MSME) to High inertia (MHME).
- Low cogging torque: Rated torque ratio 0.5 % (typical value).
- 20-bit incremental encoder (1048576 pulse)
- 17-bit absolute encoder (131072 pulse).

<Without Brake> <IP65> Mass: 1.4 kg

* For the dimensions with brake, refer to the right page. [Unit: mm]

<Cautions> Reduce the moment of inertia ratio if high speed response operation is required. Dimensions are subject to change without notice. Contact us or a dealer for the latest information. Read the Instruction Manual carefully and understand all precautions and remarks before using the products.

Specifications

| | | AC200 V | |
|---|----------------------------|------------------|------------|
| Motor model *1 | IP65 | MHMD042G1□ | MHMD042S1□ |
| | IP67 | - | - |
| Applicable driver *2 | Model No. | A5I, A5 series | MBD◇T2510 |
| | | A5IE, A5E series | MBD◇T2510E |
| Frame symbol | | B-frame | |
| Power supply capacity (kVA) | 0.9 | | |
| Rated output (W) | 400 | | |
| Rated torque (N·m) | 1.3 | | |
| Momentary Max. peak torque (N·m) | 3.8 | | |
| Rated current (A(rms)) | 2.6 | | |
| Max. current (A(o-p)) | 11.0 | | |
| Regenerative brake frequency (times/min) Note1 | Without option | No limit | Note2 |
| | DV0P4283 | No limit | Note2 |
| Rated rotational speed (r/min) | 3000 | | |
| Max. rotational speed (r/min) | 5000 | | |
| Moment of inertia of rotor (×10 ⁻⁴ kg·m ²) | Without brake | 0.67 | |
| | With brake | 0.70 | |
| Recommended moment of inertia ratio of the load and the rotor Note3 | 30 times or less | | |
| Rotary encoder specifications Note5 | 20-bit Incremental | 17-bit Absolute | |
| | Resolution per single turn | 1048576 | 131072 |

• **Brake specifications** (For details, refer to P.183)
 (This brake will be released when it is energized.)
 (Do not use this for braking the motor in motion.)

| | |
|------------------------------|--------------|
| Static friction torque (N·m) | 1.27 or more |
| Engaging time (ms) | 50 or less |
| Releasing time (ms) Note4 | 15 or less |
| Exciting current (DC) (A) | 0.36 |
| Releasing voltage (DC) (V) | 1 or more |
| Exciting voltage (DC) (V) | 24±1.2 |

• **Permissible load** (For details, refer to P.183)

| | | |
|------------------|--------------------------------|-----|
| During assembly | Radial load P-direction (N) | 392 |
| | Thrust load A-direction (N) | 147 |
| | Thrust load B-direction (N) | 196 |
| During operation | Radial load P-direction (N) | 245 |
| | Thrust load A, B-direction (N) | 98 |

• For details of Note 1 to Note 5, refer to P.182, P.183.
 • Dimensions of Driver, refer to P.42.

- *1 Motor specifications: □
- *2 The product that the end of driver model designation has "E" is "Position control type". Detail of model designation, refer to P.16.
- *3 ◇ in number of applicable driver represents the series. For more information about the part number, please refer to P.16.

Torque characteristics (at AC200 V of power voltage <Dotted line represents the torque at 10 % less supply voltage.>)

Dimensions

<With Brake> <IP65> Mass: 1.8 kg

* For the dimensions without brake, refer to the left page. [Unit: mm]

<Cautions> Reduce the moment of inertia ratio if high speed response operation is required. Dimensions are subject to change without notice. Contact us or a dealer for the latest information. Read the Instruction Manual carefully and understand all precautions and remarks before using the products.

Specifications

Specifications

| | | AC200 V | |
|---|----------------------------|------------------|-----------------|
| Motor model *1 | IP65 | - | - |
| | IP67 | MSME042G1□ | MSME042S1□ |
| Applicable driver *2 | Model No. A5II, A5 series | MBD◇T2510 | |
| | A5IE, A5E series | MBD◇T2510E | - |
| Frame symbol | | B-frame | |
| Power supply capacity (kVA) | | 0.9 | |
| Rated output (W) | | 400 | |
| Rated torque (N·m) | | 1.3 | |
| Momentary Max. peak torque (N·m) | | 3.8 | |
| Rated current (A(rms)) | | 2.4 | |
| Max. current (A(o-p)) | | 10.2 | |
| Regenerative brake frequency (times/min) Note1 | Without option | No limit | Note2 |
| | DV0P4283 | No limit | Note2 |
| Rated rotational speed (r/min) | | 3000 | |
| Max. rotational speed (r/min) | | 6000 | |
| Moment of inertia of rotor (×10 ⁻⁴ kg·m ²) | Without brake | 0.26 | |
| | With brake | 0.28 | |
| Recommended moment of inertia ratio of the load and the rotor Note3 | | 30 times or less | |
| Rotary encoder specifications Note5 | 20-bit Incremental | | 17-bit Absolute |
| | Resolution per single turn | 1048576 | 131072 |

• **Brake specifications** (For details, refer to P.183)
 (This brake will be released when it is energized.)
 (Do not use this for braking the motor in motion.)

| | |
|------------------------------|--------------|
| Static friction torque (N·m) | 1.27 or more |
| Engaging time (ms) | 50 or less |
| Releasing time (ms) Note4 | 15 or less |
| Exciting current (DC) (A) | 0.36 |
| Releasing voltage (DC) (V) | 1 or more |
| Exciting voltage (DC) (V) | 24±1.2 |

• **Permissible load** (For details, refer to P.183)

| | | |
|------------------|--------------------------------|-----|
| During assembly | Radial load P-direction (N) | 392 |
| | Thrust load A-direction (N) | 147 |
| | Thrust load B-direction (N) | 196 |
| During operation | Radial load P-direction (N) | 245 |
| | Thrust load A, B-direction (N) | 98 |

• For details of Note 1 to Note 5, refer to P.182, P.183.
 • Dimensions of Driver, refer to P.42.

- *1 Motor specifications: □
- *2 The product that the end of driver model designation has "E" is "Position control type". Detail of model designation, refer to P.16.
- *3 ◇ in number of applicable driver represents the series. For more information about the part number, please refer to P.16.

Torque characteristics (at AC200 V of power voltage <Dotted line represents the torque at 10 % less supply voltage.>)

Dimensions <In Case of With Brake, Cable direction to output shaft.>

Mass: 1.6 kg

* For the dimensions without brake, refer to the left page.

[Unit: mm]

<Cautions> Reduce the moment of inertia ratio if high speed response operation is required. Dimensions are subject to change without notice. Contact us or a dealer for the latest information. Read the Instruction Manual carefully and understand all precautions and remarks before using the products.

Read the Instruction Manual carefully and understand all precautions and remarks before using the products.

Specifications

| | | AC200 V | |
|---|----------------------------|-----------------|------------|
| Motor model *1 | IP65 | MDME102GC□ | MDME102SC□ |
| | IP67 | MDME102G1□ | MDME102S1□ |
| Applicable driver *2 | Model No. A5II, A5 series | MDD◇T3530 | |
| | A5IE, A5E series | MDD◇T3530E | - |
| Frame symbol | | D-frame | |
| Power supply capacity (kVA) | 1.8 | | |
| Rated output (W) | 1000 | | |
| Rated torque (N·m) | 4.77 | | |
| Momentary Max. peak torque (N·m) | 14.3 | | |
| Rated current (A(rms)) | 5.7 | | |
| Max. current (A(o-p)) | 24 | | |
| Regenerative brake frequency (times/min) Note1 | Without option | No limit Note2 | |
| | DV0P4284 | No limit Note2 | |
| Rated rotational speed (r/min) | 2000 | | |
| Max. rotational speed (r/min) | 3000 | | |
| Moment of inertia of rotor (×10 ⁻⁴ kg·m ²) | Without brake | 4.60 | |
| | With brake | 5.90 | |
| Recommended moment of inertia ratio of the load and the rotor Note3 | 10 times or less | | |
| Rotary encoder specifications Note5 | 20-bit Incremental | 17-bit Absolute | |
| | Resolution per single turn | 1048576 | 131072 |

• **Brake specifications** (For details, refer to P.183)
 (This brake will be released when it is energized.)
 (Do not use this for braking the motor in motion.)

| | |
|------------------------------|-------------|
| Static friction torque (N·m) | 4.9 or more |
| Engaging time (ms) | 80 or less |
| Releasing time (ms) Note4 | 70 or less |
| Exciting current (DC) (A) | 0.59±10 % |
| Releasing voltage (DC) (V) | 2 or more |
| Exciting voltage (DC) (V) | 24±2.4 |

• **Permissible load** (For details, refer to P.183)

| | | |
|------------------|--------------------------------|-----|
| During assembly | Radial load P-direction (N) | 980 |
| | Thrust load A-direction (N) | 588 |
| | Thrust load B-direction (N) | 686 |
| During operation | Radial load P-direction (N) | 490 |
| | Thrust load A, B-direction (N) | 196 |

• For details of Note 1 to Note 5, refer to P.182, P.183.
 • Dimensions of Driver, refer to P.43.

- *1 Motor specifications: □
- *2 The product that the end of driver model designation has "E" is "Position control type". Detail of model designation, refer to P.16.
- *3 ◇ in number of applicable driver represents the series. For more information about the part number, please refer to P.16.

Torque characteristics (at AC200 V of power voltage <Dotted line represents the torque at 10 % less supply voltage.>)

Dimensions

(For IP67 motor, refer to P.138.)

(a) Encoder connector
 (b) Motor/Brake connector
 * Figures in [] represent the dimensions with brake. [Unit: mm]

| Applicable driver *2 | Model No. | A5II, A5 series | MGD◇TC3B4 |
| | | A5IE, A5E series | - |
| Frame symbol | | G-frame | |
| Power supply capacity (kVA) | 9.0 | | |
| Rated output (W) | 6000 | | |
| Rated torque (N·m) | 57.3 | | |
| Momentary Max. peak torque (N·m) | 143 | | |
| Rated current (A(rms)) | 38.8 | | |
| Max. current (A(o-p)) | 149 | | |
| Regenerative brake frequency (times/min) Note1 | Without option | No limit Note2 | |
| | DV0P4285×4 | No limit Note2 | |
| Rated rotational speed (r/min) | 1000 | | |
| Max. rotational speed (r/min) | 2000 | | |
| Moment of inertia of rotor (×10 ⁻⁴ kg·m ²) | Without brake | 101 | |
| | With brake | 107 | |
| Recommended moment of inertia ratio of the load and the rotor Note3 | 10 times or less | | |
| Rotary encoder specifications Note5 | 20-bit Incremental | 17-bit Absolute | |
| | Resolution per single turn | 1048576 | 131072 |

• **Brake specifications** (For details, refer to P.183)
 (This brake will be released when it is energized.)
 (Do not use this for braking the motor in motion.)

| | |
|------------------------------|--------------|
| Static friction torque (N·m) | 58.8 or more |
| Engaging time (ms) | 150 or less |
| Releasing time (ms) Note4 | 50 or less |
| Exciting current (DC) (A) | 1.4±10 % |
| Releasing voltage (DC) (V) | 2 or more |
| Exciting voltage (DC) (V) | 24±2.4 |

• **Permissible load** (For details, refer to P.183)

| | | |
|------------------|--------------------------------|------|
| During assembly | Radial load P-direction (N) | 2058 |
| | Thrust load A-direction (N) | 980 |
| | Thrust load B-direction (N) | 1176 |
| During operation | Radial load P-direction (N) | 1764 |
| | Thrust load A, B-direction (N) | 588 |

• For details of Note 1 to Note 5, refer to P.182, P.183.
 • Dimensions of Driver, refer to P.46.

- *1 Motor specifications: □
- *2 The product that the end of driver model designation has "E" is "Position control type". Detail of model designation, refer to P.16.
- *3 ◇ in number of applicable driver represents the series. For more information about the part number, please refer to P.16.

Torque characteristics (at AC200 V of power voltage <Dotted line represents the torque at 10 % less supply voltage.>)

Dimensions

Specifications

| | | AC400 V | |
|---|----------------------------|-----------------|------------|
| Motor model *1 | IP65 | - | - |
| | IP67 | MDMEC14G1□ | MDMEC14S1□ |
| Applicable driver *2 | Model No. A5II, A5 series | MHD◇TB4A2 | |
| | A5IE, A5E series | - | - |
| Frame symbol | | H-frame | |
| Power supply capacity (kVA) | 17 | | |
| Rated output (W) | 11000 | | |
| Rated torque (N·m) | 70 | | |
| Momentary Max. peak torque (N·m) | 175 | | |
| Rated current (A(rms)) | 27.1 | | |
| Max. current (A(o-p)) | 101 | | |
| Regenerative brake frequency (times/min) Note1 | Without option | No limit Note2 | |
| | DV0PM20059 | No limit Note2 | |
| Rated rotational speed (r/min) | 1500 | | |
| Max. rotational speed (r/min) | 2000 | | |
| Moment of inertia of rotor (x10 ⁻⁴ kg·m ²) | Without brake | 212 | |
| | With brake | 220 | |
| Recommended moment of inertia ratio of the load and the rotor Note3 | 10 times or less | | |
| Rotary encoder specifications Note5 | 20-bit Incremental | 17-bit Absolute | |
| | Resolution per single turn | 1048576 | 131072 |

• **Brake specifications** (For details, refer to P.183)
 (This brake will be released when it is energized.)
 (Do not use this for braking the motor in motion.)

| | |
|------------------------------|-------------|
| Static friction torque (N·m) | 100 or more |
| Engaging time (ms) | 300 or less |
| Releasing time (ms) Note4 | 140 or less |
| Exciting current (DC) (A) | 1.08±10 % |
| Releasing voltage (DC) (V) | 2 or more |
| Exciting voltage (DC) (V) | 24±2.4 |

• **Permissible load** (For details, refer to P.183)

| | | |
|------------------|--------------------------------|------|
| During assembly | Radial load P-direction (N) | 4508 |
| | Thrust load A-direction (N) | 1470 |
| | Thrust load B-direction (N) | 1764 |
| During operation | Radial load P-direction (N) | 2254 |
| | Thrust load A, B-direction (N) | 686 |

• For details of Note 1 to Note 5, refer to P.182, P.183.
 • Dimensions of Driver, refer to P.46.

- *1 Motor specifications: □
- *2 The product that the end of driver model designation has "E" is "Position control type". Detail of model designation, refer to P.16.
- *3 ◇ in number of applicable driver represents the series. For more information about the part number, please refer to P.16.

Torque characteristics (at AC200 V of power voltage <Dotted line represents the torque at 10 % less supply voltage.>)

Dimensions

Specifications

| | | AC400 V | |
|---|----------------------------|-----------------|------------|
| Motor model *1 | IP65 | - | - |
| | IP67 | MGME454G1□ | MGME454S1□ |
| Applicable driver *2 | Model No. | A5II, A5 series | MFD◇TA464 |
| | A5IE, A5E series | MFD◇TA464E | - |
| Frame symbol | | F-frame | |
| Power supply capacity (kVA) | 7.5 | | |
| Rated output (W) | 4500 | | |
| Rated torque (N·m) | 43.0 | | |
| Momentary Max. peak torque (N·m) | 107 | | |
| Rated current (A(rms)) | 14.8 | | |
| Max. current (A(o-p)) | 55 | | |
| Regenerative brake frequency (times/min) Note1 | Without option | No limit Note2 | |
| | DV0PM20049x2 | No limit Note2 | |
| Rated rotational speed (r/min) | 1000 | | |
| Max. rotational speed (r/min) | 2000 | | |
| Moment of inertia of rotor (x10 ⁻⁴ kg·m ²) | Without brake | 79.1 | |
| | With brake | 84.4 | |
| Recommended moment of inertia ratio of the load and the rotor Note3 | 10 times or less | | |
| Rotary encoder specifications Note5 | 20-bit Incremental | 17-bit Absolute | |
| | Resolution per single turn | 1048576 | 131072 |

• **Brake specifications** (For details, refer to P.183)
 (This brake will be released when it is energized.)
 (Do not use this for braking the motor in motion.)

| | |
|------------------------------|--------------|
| Static friction torque (N·m) | 58.8 or more |
| Engaging time (ms) | 150 or less |
| Releasing time (ms) Note4 | 50 or less |
| Exciting current (DC) (A) | 1.4±10 % |
| Releasing voltage (DC) (V) | 2 or more |
| Exciting voltage (DC) (V) | 24±2.4 |

• **Permissible load** (For details, refer to P.183)

| | | |
|------------------|--------------------------------|------|
| During assembly | Radial load P-direction (N) | 2058 |
| | Thrust load A-direction (N) | 980 |
| | Thrust load B-direction (N) | 1176 |
| During operation | Radial load P-direction (N) | 1470 |
| | Thrust load A, B-direction (N) | 490 |

• For details of Note 1 to Note 5, refer to P.182, P.183.
 • Dimensions of Driver, refer to P.45.

- *1 Motor specifications: □
- *2 The product that the end of driver model designation has "E" is "Position control type". Detail of model designation, refer to P.16.
- *3 ◇ in number of applicable driver represents the series. For more information about the part number, please refer to P.16.

Torque characteristics (at AC200 V of power voltage <Dotted line represents the torque at 10 % less supply voltage.>)

Dimensions

Mass: Without brake/ 29.4 kg
 With brake/ 33.0 kg

(a) Encoder connector
 (b) Motor/Brake connector

* Figures in [] represent the dimensions with brake.

[Unit: mm]

(For IP67 motor, refer to P.140.)

(a) Encoder connector (b) Motor/Brake connector * Figures in [] represent the dimensions with brake. [Unit: mm]

<Cautions> Reduce the moment of inertia ratio if high speed response operation is required. Dimensions are subject to change without notice. Contact us or a dealer for the latest information. Read the Instruction Manual carefully and understand all precautions and remarks before using the products.

Specifications

| | | AC400 V | |
|---|----------------------------|-----------------|-----------------|
| Motor model *1 | IP65 | - | - |
| | IP67 | MHME754G1□ | MHME754S1□ |
| Applicable driver *2 | Model No. A5II, A5 series | MGD◇TB4A2 | |
| | A5IE, A5E series | - | - |
| Frame symbol | | G-frame | |
| Power supply capacity (kVA) | | 9.0 | |
| Rated output (W) | | 7500 | |
| Rated torque (N·m) | | 47.8 | |
| Momentary Max. peak torque (N·m) | | 119 | |
| Rated current (A(rms)) | | 22.0 | |
| Max. current (A(o-p)) | | 83 | |
| Regenerative brake frequency (times/min) Note1 | Without option | No limit Note2 | |
| | DV0PM20049x3 | No limit Note2 | |
| Rated rotational speed (r/min) | | 1500 | |
| Max. rotational speed (r/min) | | 3000 | |
| Moment of inertia of rotor (x10 ⁻⁴ kg·m ²) | Without brake | 273 | |
| | With brake | 279 | |
| Recommended moment of inertia ratio of the load and the rotor Note3 | | 5 times or less | |
| Rotary encoder specifications Note5 | 20-bit Incremental | | 17-bit Absolute |
| | Resolution per single turn | 1048576 | 131072 |

• **Brake specifications** (For details, refer to P.183)
 (This brake will be released when it is energized.)
 (Do not use this for braking the motor in motion.)

| | |
|------------------------------|--------------|
| Static friction torque (N·m) | 58.8 or more |
| Engaging time (ms) | 150 or less |
| Releasing time (ms) Note4 | 50 or less |
| Exciting current (DC) (A) | 1.4±10 % |
| Releasing voltage (DC) (V) | 2 or more |
| Exciting voltage (DC) (V) | 24±2.4 |

• **Permissible load** (For details, refer to P.183)

| | | |
|------------------|--------------------------------|------|
| During assembly | Radial load P-direction (N) | 2058 |
| | Thrust load A-direction (N) | 980 |
| | Thrust load B-direction (N) | 1176 |
| During operation | Radial load P-direction (N) | 1176 |
| | Thrust load A, B-direction (N) | 490 |

• For details of Note 1 to Note 5, refer to P.182, P.183.
 • Dimensions of Driver, refer to P.46.

*1 Motor specifications: □
 *2 The product that the end of driver model designation has "E" is "Position control type". Detail of model designation, refer to P.16.
 *3 ◇ in number of applicable driver represents the series. For more information about the part number, please refer to P.16.

Torque characteristics (at AC400 V of power voltage <Dotted line represents the torque at 10 % less supply voltage.>)

Dimensions

(a) Encoder connector (b) Motor/ connector (c) Brake connector (only with brake) * Figures in [] represent the dimensions with brake. [Unit: mm]

<Cautions> Reduce the moment of inertia ratio if high speed response operation is required. Dimensions are subject to change without notice. Contact us or a dealer for the latest information. Motor Types with Gear Reducer

| Reduction ratio | Motor output (W) | | | | Type of reducer |
|-----------------|------------------|-----|-----|-----|--------------------|
| | 100 | 200 | 400 | 750 | |
| 1/5 | ● | ● | ● | ● | For high precision |
| 1/9 | ● | ● | ● | ● | |
| 1/15 | ● | ● | ● | ● | |
| 1/25 | ● | ● | ● | ● | |

* MHMD 100 W is not prepared.

Efficiency of the gear reducer show the following inclination in relation to output torque and rotational speed.

Specifications of Motor with Gear Reducer

| Items | Specifications | |
|--------------|---|---|
| Gear reducer | Backlash | 3 minutes or smaller (initial value) at output shaft of the reducer |
| | Composition of gear | Planetary gear |
| | Gear efficiency | 65 % to 85 % |
| | Lubrication | Grease lubrication |
| | Rotational direction at output shaft | Same direction as the motor output shaft |
| | Mounting method | Flange mounting |
| | Permissible moment of inertia of the load (conversion to the motor shaft) | 10 times or smaller than rotor moment of inertia of the motor |
| Environment | Protective structure | IP44 (at gear reducer) |
| | Ambient temperature | 0 °C to 40 °C (free from condensation) |
| | Ambient humidity | 85 %RH (free from condensation) or less |
| | Vibration resistance | 49 m/s ² or less (at motor frame) |
| | Impact resistance | 98 m/s ² or less |

* For combination of elements of model number, refer to Index.

Model Designation

M S M E 0 1 1 G 3 1 N

| Symbol | Type |
|--------|--------------------------------|
| MSMD | Low inertia 100 W to 750 W |
| MSME | Low inertia 100 W to 750 W |
| MHMD | High inertia 200 W to 750 W |

Motor rated output

| Symbol | Specifications |
|--------|----------------|
| 01 | 100 W |
| 02 | 200 W |
| 04 | 400 W |
| 08 | 750 W |

Voltage specifications

| Symbol | Rated output |
|--------|--------------|
| 1 | 100 V |
| 2 | 200 V |

Rotary encoder specifications

| Symbol | Format | Pulse counts | Resolution | Wire |
|--------|-------------|--------------|------------|------|
| G | Incremental | 20-bit | 1048576 | 5 |
| S | Absolute | 17-bit | 131072 | 7 |

* S: can be used in incremental.

Motor types with gear reducer

| Symbol | Reduction ratio | Motor output (W) | | | | Type of reducer |
|--------|-----------------|------------------|-----|-----|-----|--------------------|
| | | 100 | 200 | 400 | 750 | |
| 1N | 1/5 | ● | ● | ● | ● | For high precision |
| 2N | 1/9 | ● | ● | ● | ● | |
| 3N | 1/15 | ● | ● | ● | ● | |
| 4N | 1/25 | ● | ● | ● | ● | |

* MHMD 100 W is not prepared.

Motor structure

| Symbol | Shaft | Holding brake | |
|--------|---------|---------------|------|
| | Key way | without | with |
| 3 | ● | ● | |

Upper column: without brake
 Lower column: with brake

Features

- Line-up IP65 motor: 200 W to 5.0 kW
- Max speed: 5000 r/min (MSMJ, MHMJ)
- Low inertia (MSME) to High inertia (MHME).
- 20-bit incremental encoder (1048576 pulse)
- 17-bit absolute encoder (131072 pulse).

[Please note]

Motors displayed at P.151 to P.181 are Special Order Product. Please contact us for more information.

Motor Lineup

| | | |
|-----------------|--|---|
| Small capacity |  <p>MSMJ Low inertia</p> <p>Max. speed : 5000 r/min : 4500 r/min (750 W) Rated speed: 3000 r/min Rated output: 200 W to 750 W Enclosure : IP65</p> |  <p>MHMJ High inertia</p> <p>Max. speed : 5000 r/min : 4500 r/min (750 W) Rated speed: 3000 r/min Rated output: 200 W to 750 W Enclosure : IP65</p> |
| |  <p>MSME Low inertia</p> <p>Max. speed : 5000 r/min : 4500 r/min (from 4.0 kW) Rated speed: 3000 r/min Rated output: 1.0 kW to 5.0 kW Enclosure : IP65</p> |  <p>MDME Middle inertia</p> <p>Max. speed : 3000 r/min Rated speed : 2000 r/min Rated output: IP65 1.0 kW to 5.0 kW Enclosure : IP65</p> |
| Middle capacity |  <p>MGME (Low speed/ High torque type) High inertia</p> <p>Max. speed : 2000 r/min Rated speed : 1000 r/min Rated output: IP65 0.9 kW to 3.0 kW Enclosure : IP65</p> |  <p>MHME High inertia</p> <p>Max. speed : 3000 r/min Rated speed : 2000 r/min Rated output: IP65 1.0 kW to 5.0 kW Enclosure : IP65</p> |

Note) 1 Rotary encoder specifications: □ Motor specification: * (refer to P.152)
 Note) 2 Because A5IE series drivers (dedicated for position control) do not support the 17-bit absolute specification, only 20-bit incremental type can be used in combination.
 Note) 3 Cable length: ** (03: 3 m, 05: 5 m, 10: 10 m, 20: 20 m), (Example. 3 m: MFECA0030EAM)
 Note) 4 When you use a 17-bit absolute encoder as an incremental encoder, please use the encoder cable MFECA0**0EAD.
 Note) 5 Other combinations exist, and refer to P.210 for details.

Note) 6 Please note that a battery is not supplied together with 17-bit absolute encoder cable (with battery box). Please buy the battery part number "DV0P2990" separately.

Environmental Conditions

| Item | Conditions |
|-------------------------------|--|
| Ambient temperature *1 | 0 °C to 40 °C (free from freezing) |
| Ambient humidity | 20 % to 85 % RH (free from condensation) |
| Storage temperature *2 | -20 °C to 65 °C (Max.temperature guarantee: 80 °C for 72 hours free from condensation ⁵) |
| Storage humidity | 20 % to 85 % RH (free from condensation ⁵) |
| Vibration | Motor only 5.0 kW or less, MGME 3.0 kW or less: Lower than 49 m/s ² (5 G) at running, 24.5 m/s ² (2.5 G) at stall 6.0 kW or more, MGME 4.5 kW or more: Lower than 24.5 m/s ² (2.5 G) at running, 24.5 m/s ² (2.5 G) at stall |
| Impact | Motor only Lower than 98 m/s ² (10 G) |
| Enclosure rating (Motor only) | IP65 *3 MSMD, MHMD, MSMJ, MHMJ (except rotating portion of output shaft and readwire end.) M * ME (IP65 motor: 0.9 kW or more) (except rotating portion of output shaft and connecting pin part of the motor connector and the encoder connector) |
| | IP67 *3*4 M * ME IP67 motor (except rotating portion of output shaft and connecting pin part of the motor connector and the encoder connector) |
| Altitude | Lower than 1000 m |

*1 Ambient temperature to be measured at 5 cm away from the motor.

*2 Permissible temperature for short duration such as transportation.

*3 These motors conform to the test conditions specified in EN standards (EN60529, EN60034-5). Do not use these motors in application where water proof performance is required such as continuous wash-down operation.

*4 This condition is applied when the connector mounting screw are tightened to the recommended tightening torque.

*5 Air containing water vapor will become saturated with water vapor as the temperature falls, causing dew.

<Note>

Initial setup of rotational direction:
positive = CCW and negative = CW.
Pay an extra attention.

Notes on [Motor specification] page

Note) 1. [At AC100 V of power voltage]

Regenerative brake frequency represents the frequency of the motor's stops from the rated speed with deceleration without load.

- If the load is connected, frequency will be defines as 1/(m+1), where m=load moment of inertia/ rotor moment of inertia.
- When the motor speed exceeds the rated speed, regenerative brake frequency is in inverse proportion to the square of (running speed/rated speed).
- Power supply voltage is AC115 V (at 100 V of the main voltage).
If the supply voltage fluctuates, frequency is in inverse proportion to the square of (Running supply voltage/115) relative to the value in the table.
- When regeneration occurs continuously such cases as running speed frequently changes or vertical feeding, consult us or a dealer.

[At AC200 V of power voltage]

Regenerative brake frequency represents the frequency of the motor's stops from the rated speed with deceleration without load.

- If the load is connected, frequency will be defines as 1/(m+1), where m=load moment of inertia/ rotor moment of inertia.
- When the motor speed exceeds the rated speed, regenerative brake frequency is in inverse proportion to the square of (running speed/rated speed).
- Power supply voltage is AC230 V (at 200 V of the main voltage).
If the supply voltage fluctuates, frequency is in inverse proportion to the square of (Running supply voltage/230) relative to the value in the table.
- When regeneration occurs continuously such cases as running speed frequently changes or vertical feeding, consult us or a dealer.

[At AC400 V of power voltage]

Regenerative brake frequency represents the frequency of the motor's stops from the rated speed with deceleration without load.

- If the load is connected, frequency will be defined as $1/(m+1)$, where m =load moment of inertia/rotor moment of inertia.
- When the motor speed exceeds the rated speed, regenerative brake frequency is in inverse proportion to the square of (running speed/rated speed).
- Power supply voltage is AC460 V (at 400 V of the main voltage).
If the supply voltage fluctuates, frequency is in inverse proportion to the square of (Running supply voltage/460) relative to the value in the table.
- When regeneration occurs continuously such cases as running speed frequently changes or vertical feeding, consult us or a dealer.

Note) 2. If the effective torque is within the rated torque, there is no limit in generative brake.

Note) 3. Consult us or a dealer if the load moment of inertia exceeds the specified value.

Note) 4. Releasing time values represent the ones with DC-cutoff using a varistor.

Note) 5. The 17-bit absolute encoder can also be used as a 17-bit incremental encoder.

Permissible Load at Output Shaft

The radial load is defined as a load applied to the output shaft in the right-angle direction. This load is generated when the gear head is coupled to the machine using a chain, belt, etc., but not when the gear head is directly connected to the coupling. As shown in the right figure, the permissible value is determined based on the load applied to the L/2 position of the output shaft. The thrust load is defined as a load applied to the output shaft in the axial direction.

Because the radial load and thrust load significantly affect the life of the bearing, take care not to allow the load during operation to exceed the permissible radial load and thrust load shown in the table below.

Built-in Holding Brake

In the applications where the motor drives the vertical axis, this brake would be used to hold and prevent the work (moving load) from falling by gravity while the power to the servo is shut off.

Use this built-in brake for "Holding" purpose only, that is to hold the stalling status. Never use this for "Brake" purpose to stop the load in motion.

• Output Timing of BRK-OFF Signal

- For the brake release timing at power-on, or braking timing at Servo-OFF/Servo-Alarm while the motor is in motion, refer to the Operating Instructions (Overall).
- With the parameter, Pr4.38 (Setup of mechanical brake action while the motor is in motion), you can set up a time between when the motor enters to a free-run from energized status and when BRK-OFF signal turns off (brake will be engaged), when the Servo-OFF or alarm occurs while the motor is in motion. For details, download a copy of the instruction manual from our website.

<Note>

1. The lining sound of the brake (chattering and etc.) might be generated while running the motor with built-in brake, however this does not affect any functionality.
2. Magnetic flux might be generated through the motor shaft while the brake coil is energized (brake is open). Pay an extra attention when magnetic sensors are used nearby the motor.

• Specifications of Built-in Holding Brake

- Releasing time values represent the ones with DC-cutoff using a varistor. Values in () represent those measured by using a diode (V03C by Hitachi, Ltd.)
- Above values (except static friction torque, releasing voltage and excitation current) represent typical values.
- Backlash of the built-in holding brake is kept $\pm 1^\circ$ or smaller at ex-factory point.
- Service life of the number of acceleration/deceleration with the above permissible angular acceleration is more than 10 million times. (Life end is defined as when the brake backlash drastically changes.)

Encoder Cable

Motor Cable, Brake Cable

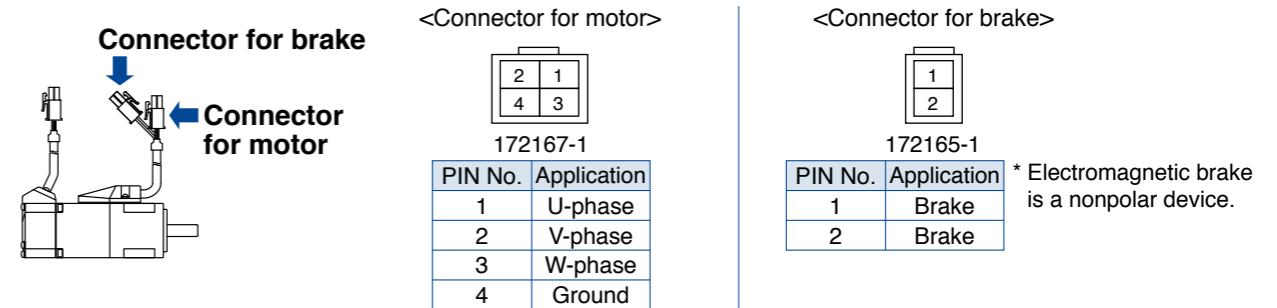

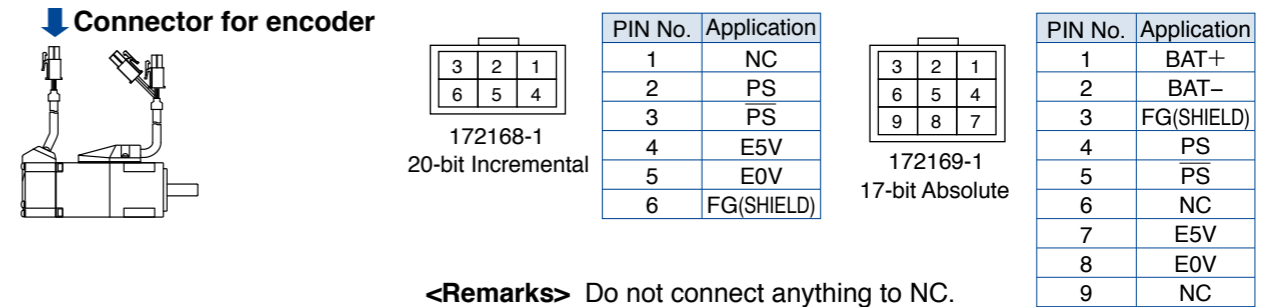

ROBO-TOP® is a trade mark of DYDEN CORPORATION

Specifications of Motor connector

• When the motors of <MSMD, MHMD, MSMJ, MHMJ> are used, they are connected as shown below.

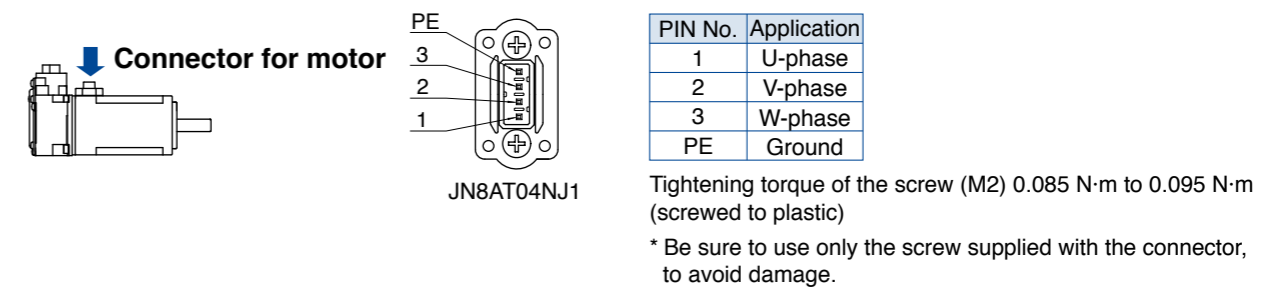

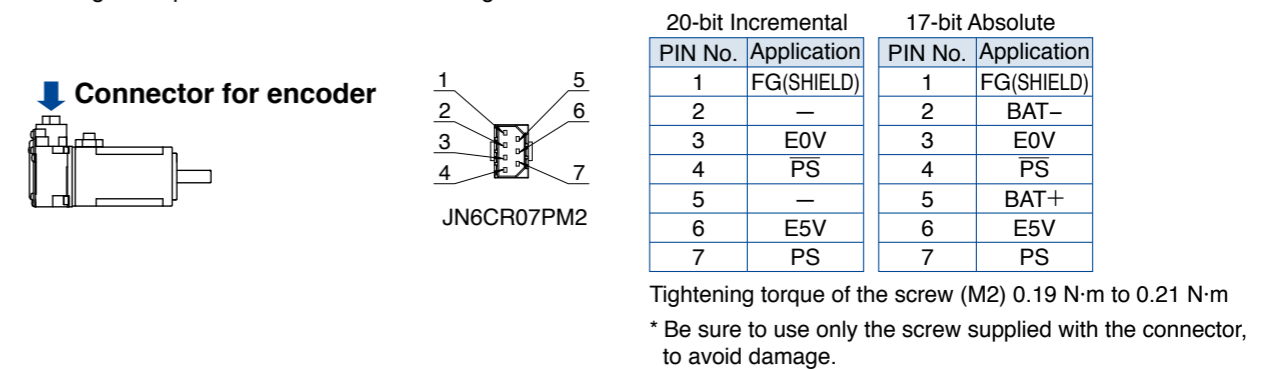

Connector: Made by Tyco Electronics (The figures below show connectors for the motor.)

• When the motors of <MSME (50 W to 750 W (200 V))> are used, they are connected as shown below.

Connector: Made by Japan Aviation Electronics Industry, Ltd. (The figures below show connectors for the motor.)

* Do not remove the gasket supplied with the junction cable connector. Securely install the gasket in place. Otherwise, the degree of protection of IP67 will not be guaranteed.

• When the motors of <MSME (750 W(400 V), 1.0 kW to 5.0 kW), MDME, MGME, MHME> are used, they are connected as shown below.

Connector: Made by Japan Aviation Electronics Industry, Ltd. (The figures below show connectors for the motor.)

Cable for Interface

| | |
|----------|----------|
| Part No. | DV0P4360 |
|----------|----------|

This 2 m connector cable contains AWG28 conductors.

• Table for wiring

| Pin No. | color | Pin No. | color | Pin No. | color | Pin No. | color | Pin No. | color |
|---------|-----------------|---------|------------------------|---------|-----------------|---------|-----------------|---------|-----------------|
| 1 | Orange (Red1) | 11 | Orange (Black2) | 21 | Orange (Red3) | 31 | Orange (Red4) | 41 | Orange (Red5) |
| 2 | Orange (Black1) | 12 | Yellow (Black1) | 22 | Orange (Black3) | 32 | Orange (Black4) | 42 | Orange (Black5) |
| 3 | Gray (Red1) | 13 | Gray (Red2) | 23 | Gray (Red3) | 33 | Gray (Red4) | 43 | Gray (Red5) |
| 4 | Gray (Black1) | 14 | Gray (Black2) | 24 | Gray (Black3) | 34 | White (Red4) | 44 | White (Red5) |
| 5 | White (Red1) | 15 | White (Red2) | 25 | White (Red3) | 35 | White (Black4) | 45 | White (Black5) |
| 6 | White (Black1) | 16 | Yellow (Red2) | 26 | White (Black3) | 36 | Yellow (Red4) | 46 | Yellow (Red5) |
| 7 | Yellow (Red1) | 17 | Yel (Blk2)/Pink (Blk2) | 27 | Yellow (Red3) | 37 | Yellow (Black4) | 47 | Yellow (Black5) |
| 8 | Pink (Red1) | 18 | Pink (Red2) | 28 | Yellow (Black3) | 38 | Pink (Red4) | 48 | Pink (Red5) |
| 9 | Pink (Black1) | 19 | White (Black2) | 29 | Pink (Red3) | 39 | Pink (Black4) | 49 | Pink (Black5) |
| 10 | Orange (Red2) | 20 | - | 30 | Pink (Black3) | 40 | Gray (Black4) | 50 | Gray (Black5) |

<Remarks>

Color designation of the cable e.g.) Pin-1 Cable color : Orange (Red1) : One red dot on the cable
The shield of this cable is connected to the connector shell but not to the terminal.

Interface Conversion Cable

| | |
|----------|----------------------------------|
| Part No. | DV0P4120, 4121, 4130, 4131, 4132 |
|----------|----------------------------------|

Interface cables for old product (XX series or V series) can be connected to the current product by using the connector conversion cable shown below.

| | |
|----------|--|
| DV0P4120 | MINAS XX → A5II, A5 series (A4, A series) for position control/ velocity control |
| DV0P4121 | MINAS XX → A5II, A5 series (A4, A series) for torque control |
| DV0P4130 | MINAS V → A5II, A5 series (A4, A series) for position control |
| DV0P4131 | MINAS V → A5II, A5 series (A4, A series) for velocity control |
| DV0P4132 | MINAS V → A5II, A5 series (A4, A series) for torque control |

* For details of wiring, contact our sales department.

Converts 36-pin configuration to 50-pin.

Connector Kit

Connector Kit for Communication Cable (for RS485, RS232) (Excluding A5IE, A5E Series)

| | |
|----------|------------|
| Part No. | DV0PM20102 |
|----------|------------|

• Components

| Title | Part No. | Manufacturer | Note |
|-----------|-------------------|----------------------|---------------------------|
| Connector | CIF-PCNS08KK-072R | J.S.T Mfg. Co., Ltd. | For Connector X2 (8-pins) |

• Pin disposition of connector, connector X2

<Remarks>
Do not connect anything to NC.

• Dimensions

Recommended wire size: ø5.8 mm (MAX)
Note: No wires are supplied with the connector kit.

Connector Kit for Safety (Excluding A5IE, A5E Series)

| | |
|----------|------------|
| Part No. | DV0PM20103 |
|----------|------------|

• Components

| Title | Part No. | Manufacturer | Note |
|-----------|-------------------|----------------------|---------------------------|
| Connector | CIF-PCNS08KK-071R | J.S.T Mfg. Co., Ltd. | For Connector X3 (8-pins) |

• Pin disposition of connector, connector X3

<Remarks>
Do not connect anything to NC.

• Dimensions

Recommended wire size: ø5.8 mm (MAX)
Note: No wires are supplied with the connector kit.

Safety bypass plug (Excluding A5IE, A5E Series)

| | |
|----------|------------|
| Part No. | DV0PM20094 |
|----------|------------|

• Components

| Title | Part No. | Manufacturer | Note |
|-----------|-----------------|----------------------|------------------|
| Connector | CIF-PB08AK-GF1R | J.S.T Mfg. Co., Ltd. | For Connector X3 |

• Internal wiring

(Wiring of the following has been applied inside the plug.)

• Dimensions (Resin color : black) (Unit: mm)

A design and color may vary from the plug provided together with driver. There is no difference in function.

Connector Kit for Interface

| | |
|----------|----------|
| Part No. | DV0P4350 |
|----------|----------|

• Components

| Title | Part No. | Number | Manufacturer | Note |
|-----------------|----------------|--------|-----------------|----------------------------|
| Connector | 10150-3000PE | 1 | Sumitomo 3M | For Connector X4 (50-pins) |
| Connector cover | 10350-52A0-008 | 1 | (or equivalent) | |

• Pin disposition (50 pins) (viewed from the soldering side)

- 1) Check the stamped pin-No. on the connector body while making a wiring.
- 2) For the function of each signal title or its symbol, refer to the operating manual.
- 3) Do not connect anything to NC pins in the above table.

<Remarks>

• For crimp tool etc., necessary to produce a cable, access the web site of the manufacturer or consult with the manufacturer for details. For inquiries of manufacturer, refer to P.213 "List of Peripheral Equipments".

Connector Kit for External Scale (Excluding A5II E, A5E Series)

Part No. DV0PM20026

• Components

| Title | Part No. | Manufacturer | Note |
|-----------|-------------|----------------------|----------------------------|
| Connector | MUF-PK10K-X | J.S.T Mfg. Co., Ltd. | For Connector X5 (10-pins) |

• Pin disposition of connector, connector X5

• Dimensions

Connector Kit for Encoder

Part No. DV0PM20010

• Components

| Title | Part No. | Manufacturer | Note |
|-------------------------|----------------|--------------------------------|------------------|
| Connector (Driver side) | 3E206-0100 KV | Sumitomo 3M (or equivalent) | For Connector X6 |
| Shell kit | 3E306-3200-008 | | |

• Pin disposition of connector, connector X6

• Dimensions

Connector Kit for Analog Monitor Signal

Part No. DV0PM20031

• Components

| Title | Part No. | Number | Manufacturer | Note |
|---------------|-----------|--------|--------------|---------------------------|
| Connector | 510040600 | 1 | Molex Inc | For Connector X7 (6-pins) |
| Connector pin | 500118100 | 6 | | |

• Pin disposition of connector, connector X7

• Dimensions

<Remarks>

Connector X1: use with commercially available cable.

• Configuration of connector X1: USB mini-B

Connector Kit for Power Supply Input

Part No. DV0PM20032 (For A-frame to C-frame 100 V, A-frame to D-frame 200 V: Single row type)

• Components

| Title | Part No. | Number | Manufacturer | Note |
|--------------|--------------|--------|----------------------|------------------|
| Connector | 05JFAT-SAXGF | 1 | J.S.T Mfg. Co., Ltd. | For Connector XA |
| Handle lever | J-FAT-OT | 2 | | |

Part No. DV0PM20033 (For A-frame to D-frame 200 V: Double row type)

• Components

| Title | Part No. | Number | Manufacturer | Note |
|--------------|-----------------|--------|----------------------|------------------|
| Connector | 05JFAT-SAXGSA-C | 1 | J.S.T Mfg. Co., Ltd. | For Connector XA |
| Handle lever | J-FAT-OT | 2 | | |

• Dimensions

* When connection multiple axes in series, make sure the sum of the current value does not exceed the rated current (11.25 A) of DV0PM20033.

Remarks

When using drivers MDDKT5540 *** or MDDHT5540 *** in single-phase power supply, do not use DV0PM20033.

| Driver part No. | Power supply | Rated input current |
|--------------------------------|-------------------------------|---------------------|
| MADHT1105 *** MADKT1105 *** | Single phase 100 V | 1.7 A |
| MADHT1107 *** MADKT1107 *** | Single phase 100 V | 2.6 A |
| MADHT1505 *** MADKT1505 *** | Single phase/3-phase 200 V | 1.6 A/0.9 A |
| MADHT1507 *** MADKT1507 *** | Single phase/3-phase 200 V | 2.4 A/1.3 A |
| MBDHT2110 *** MBDKT2110 *** | Single phase 100 V | 4.3 A |
| MBDHT2510 *** MBDKT2510 *** | Single phase/3-phase 200 V | 4.1 A/2.4 A |
| MCDHT3120 *** MCDKT3120 *** | Single phase 100 V | 7.6 A |
| MCDHT3520 *** MCDKT3520 *** | Single phase/3-phase 200 V | 6.6 A/3.6 A |
| MDDHT3530 *** MDDKT3530 *** | Single phase/3-phase 200 V | 9.1 A/5.2 A |
| MDDHT5540 *** MDDKT5540 *** | Single phase/3-phase 200 V | 14.2 A/8.1 A |

Part No. DV0PM20044 (For E-frame 200 V)

• Components

Connector Kit

* When IP65 or IP67 are necessary, the customer must give appropriate processing.

Connector Kit for Motor/Encoder Connection

| | | | |
|----------|----------|------------------|---|
| Part No. | DV0P4290 | Applicable model | MSMD 50 W to 750 W, MHMD 200 W to 750 W (absolute encoder type) |
|----------|----------|------------------|---|

• Components

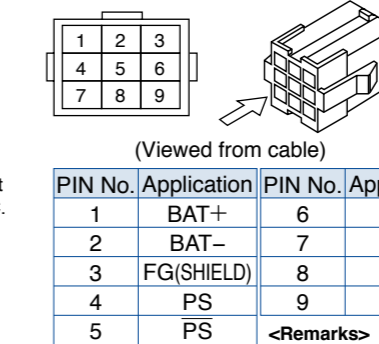

| Title | Part No. | Number | Manufacturer | Note |
|-------------------------|----------------|--------|-----------------------------|----------------------------|
| Connector (Driver side) | 3E206-0100 KV | 1 | Sumitomo 3M (or equivalent) | For Connector X6 (6-pins) |
| Shell kit | 3E306-3200-008 | 1 | | |
| Connector | 172161-1 | 1 | Tyco Electronics | For Encoder cable (9-pins) |
| Connector pin | 170365-1 | 9 | | |
| Connector | 172159-1 | 1 | Tyco Electronics | For Motor cable (4-pins) |
| Connector pin | 170366-1 | 4 | | |

• Pin disposition of connector, connector X6

<Remarks>
Do not connect anything to NC.

• Pin disposition of connector for encoder cable

<Remarks>
Do not connect anything to NC.

• Pin disposition of connector for motor cable

* When you connect the battery for absolute encoder, refer to P.207, "When you make your own cable for 17-bit absolute encoder"

| | | | |
|----------|----------|------------------|--|
| Part No. | DV0P4380 | Applicable model | MSMD 50 W to 750 W, MHMD 200 W to 750 W, MSMJ 200 W to 750 W, MHMJ 200 W to 750 W (incremental encoder type) |
|----------|----------|------------------|--|

• Components

[Opposite direction of motor shaft]

<Remarks>

- Secure the gasket in place without removing it from the connector. Otherwise, the degree of protection of IP67 will not be guaranteed.

Battery for Absolute Encoder

Part No. DV0P2990

• Lithium battery: 3.6 V 2000 mAh

<Caution>

This battery is categorized as hazardous substance, and you may be required to present an application of hazardous substance when you transport by air (both passenger and cargo airlines).

Battery Box for Absolute Encoder *

* Battery is not included. Please buy the absolute encoder battery "DV0P2990" separately.

Part No. DV0P4430

When making a cable for 17-bit absolute encoder by yourself

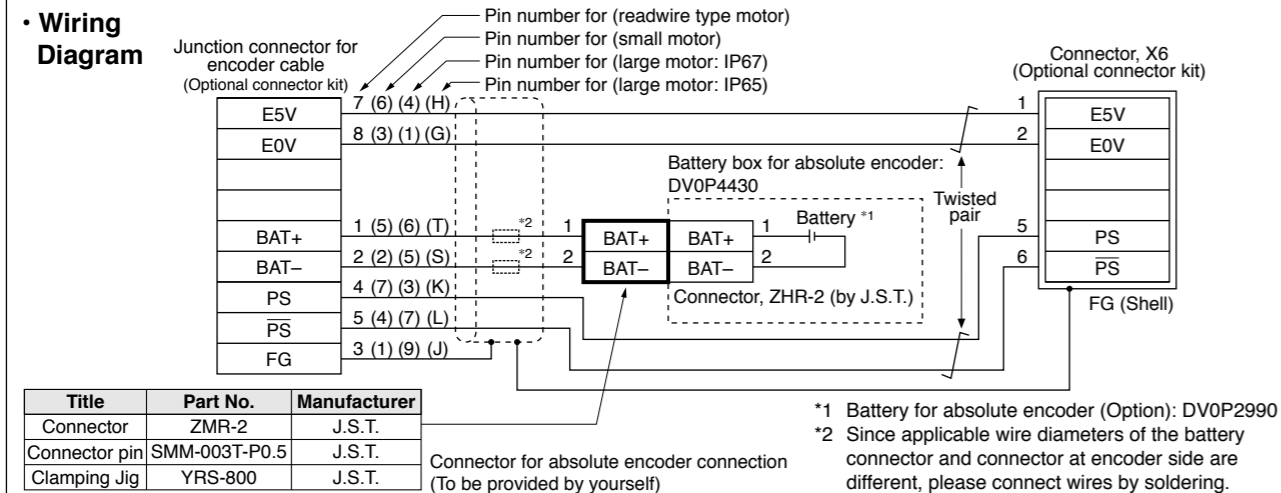

When you make your own cable for 17-bit absolute encoder, connect the optional battery for absolute encoder, DV0P2990 as per the wiring diagram below. Connector of the battery for absolute encoder shall be provided by customer as well.

<Caution>

Install and fix the battery securely. If the installation and fixing of the battery is not appropriate, it may cause the wire breakdown or damage of the battery. Refer to the instruction manual of the battery for handling the battery.

• Installation Place of Battery

- 1) Indoors, where the products are not subjected to rain or direct sun beam.
- 2) Where the products are not subjected to corrosive atmospheres such as hydrogen sulfide, sulfurous acid, chlorine, ammonia, chloric gas, sulfuric gas, acid, alkaline and salt and so on, and are free from splash of inflammable gas, grinding oil, oil mist, iron powder or chips and etc.
- 3) Well-ventilated and humid and dust-free place.
- 4) Vibration-free place

Mounting Bracket

* For application, refer to P.21 to P.28 and P.153 to P.154 "Table of Part Numbers and Options".

Harmonic restraint

Harmonic restraint measures are not common to all countries. Therefore, prepare the measures that meet the requirements of the destination country.

With products for Japan, on September, 1994, "Guidelines for harmonic restraint on heavy consumers who receive power through high voltage system or extra high voltage system" and "Guidelines for harmonic restraint on household electrical appliances and general-purpose articles" established by the Agency for Natural Resources and Energy of the Ministry of Economy, Trade and Industry (the ex-Ministry of International Trade and Industry). According to those guidelines, the Japan Electrical Manufacturers' Association (JEMA) have prepared technical documents (procedure to execute harmonic restraint: JEM-TR 198, JEM-TR 199 and JEM-TR 201) and have been requesting the users to understand the restraint and to cooperate with us. On January, 2004, it has been decided to exclude the general-purpose inverter and servo driver from the "Guidelines for harmonic restraint on household electrical appliances and general-purpose articles". After that, the "Guidelines for harmonic restraint on household electrical appliances and general-purpose articles" was abolished on September 6, 2004.

We are pleased to inform you that the procedure to execute the harmonic restraint on general-purpose inverter and servo driver was modified as follows.

- All types of the general-purpose inverters and servo drivers used by specific users are under the control of the "Guidelines for harmonic restraint on heavy consumers who receive power through high voltage system or extra high voltage system". The users who are required to apply the guidelines must calculate the equivalent capacity and harmonic current according to the guidelines and must take appropriate countermeasures if the harmonic current exceeds a limit value specified in a contract demand. (Refer to JEM-TR 210 and JEM-TR 225.)
- The "Guidelines for harmonic restraint on household electrical appliances and general-purpose articles" was abolished on September 6, 2004. However, based on conventional guidelines, JEMA applies the technical documents JEM-TR 226 and JEM-TR 227 to any users who do not fit into the "Guidelines for harmonic restraint on heavy consumers who receive power through high voltage system or extra high voltage system" from a perspective on enlightenment on general harmonic restraint. The purpose of these guidelines is the execution of harmonic restraint at every device by a user as usual to the utmost extent.

<Remarks> When using a reactor, be sure to install one reactor to one servo driver.

Manufacturer : Iwaki Musen Kenkyusho

*1 Power with which the driver can be used without activating the built-in thermal protector.

A built-in thermal fuse and a thermal protector are provided for safety.

The circuit should be so designed that the power supply will be turned off as the thermal protector operates.

The built-in thermal fuse blows depending on changes in heat dissipation condition, operating temperature limit, power supply voltage or load.

Mount the regenerative resistor on a machine operating under aggressive regenerating condition (high power supply voltage, large load inertia, shorter deceleration time, etc.) and make sure that the surface temperature will not exceed 100 °C.

Attach the regenerative resistor to a nonflammable material such as metal.

Cover the regenerative resistor with a nonflammable material so that it cannot be directly touched.

Temperatures of parts that may be directly touched by people should be kept below 70 °C.

*2 Terminal block with screw tightening torque as shown below.

T1, T2, 24 V, 0 V, E : M4 : 1.2 N·m to 1.4 N·m

R1, R2 : M5 : 2.0 N·m to 2.4 N·m

Use the cable with the same diameter as the main circuit cable. (Refer to P.19).

*3 With built-in fan which should always be operated with the power supply connected across 24 V and 0 V.

<Caution when using external regenerative resistor>

Regenerative resistor gets very hot.

Configure a circuit so that a power supply shuts down when built-in thermal protector of the regenerative resistor works. Because it is automatic reset thermal protector, please apply a self-holding circuit to the outside in order to maintain safety in case of sudden activation. During the failure of the driver, the surface temperature of the regenerative resistor may exceed the operating temperature before thermal protector starts to work.

Built-in thermal fuse of regenerative resistor is intended to prevent from ignition during the failure of the driver and not intended to suppress the surface temperature of the resistor.

- Be attached the regenerative resistance to non-combustible material such as metal.
- Built-in thermal fuse of regenerative resistor is intended to prevent from ignition during the failure of the driver and not intended to suppress the surface temperature of the resistor.
- Do not install the regenerative resistor near flammable materials.

Compact Servo Only for Position Control.

Ultra compact
position control type

MINAS E Series

1 Best Fit to Small Drives

- Further evolution in down-sizing, by 47 % in size. (Note)
- Exclusively designed for position control.

(Note) Compared to MUDS043A1

2 Easy to Handle, Easy to Use

- DIN-rail mounting unit (option) improves handling/installation.
- User-friendly Console makes the setup easy.
- High functionality Real-Time Auto-Gain Tuning enables adjustment-free operation.

3 High-Speed Positioning with Resonance Suppression Filters

- Built-in notch filter suppresses resonance of the machine.
- Built-in adaptive filter detect resonance frequency and suppress vibration.

4 Smoother operation for Low Stiffness Machine

- Damping control function suppresses vibration during acceleration/deceleration

1. Easy to Handle, Easy to Use

High-functionality Real-Time Auto-Gain Tuning (Note 1)

- Offers real automatic gain tuning for low and high stiffness machines with a combination of an adaptive filter.
- Supports the vertical axis application where the load torque is different in rotational direction.

DIN-rail mounting unit (option)

- DIN-rail mounting unit allows parallel mounting with small control devices such as PLC.
- Easy to mount and easy to dismount.

2. Further Reduction of Vibration

Adaptive filter (Note1)

- Makes the notch filter frequency automatically follow the machine resonance frequency in real-time auto-gain tuning.
- Suppression of "Judder" noise of the machine, which is caused by variation of the machines or resonance frequency due to aging, can be expected.

Notch filter (Note1)

- 1-channel notch filter is equipped in the driver independent from adaptive filter.
- Each of 2 filters can set up frequency and notch width, and frequency in 1Hz unit. Suppression of "Judder" noise of the machine which has multiple resonance points can be expected.

Damping control (Note1)

- You can suppress vibration occurring at both starting and stopping in low stiffness machine, by manually setting up vibration frequency in 0.1 Hz unit. Note) Only applies to manual adjustment

(Note1) Select at positioning action mode.
 • At high speed positioning mode (Pr02=0) Select either one of notch filter, damping control or high-functionality real-time auto-gain tuning. Not possible to use them all at the same time. Adaptive filter cannot be used.
 • At high-functionality positioning mode (Pr02=1) All of notch filter, damping control, high-functionality real-time auto-gain tuning and adaptive filter can be used at the same time.

3. Further Flexibility and Multiplicity

Console (Option)

- You can set up parameters, copy and make a JOG run.
- Convenient for maintenance at site.
- Refer to P.241, Options.

Command control modes

- Offers 2 command modes, "Position control" and "Internal velocity control".
- You can make a 4-speed running at preset values with parameter at internal velocity control mode.

Inrush current suppressing function

- Inrush suppressing resistor, which prevent the circuit breaker shutdown of the power supply caused by inrush current at power-on, is equipped in this driver.
- Prevents unintentional shutdown of the power supply circuit breaker in multi axis application and does not give load to the power line.

Regeneration discharging function

- Discharges the regenerative energy with external resistor, where energy is generated while stopping the load with large moment of inertia, or use in up-down operation, and is returned to the driver from the motor.
- No regenerative resistor is installed in the driver.
- It is highly recommended to install an external regenerative resistor (option).

Built-in dynamic brake

- You can select the dynamic brake action which short the servo motor windings of U, V and W, at Servo-OFF, CW/CCW over-travel inhibition, power shutdown and trip.
- You can select the action sequence depending on the machine requirement.

Setup support software (Option)

- With the setup support software, "PANATERM" via RS232 / RS485 communication port, you can monitor the running status of the driver and set up parameters. Note) Refer to P.236 for setup support software.

Key-way shaft and tapped shaft end

- Easy pulley attachment and easy maintenance
- Attache screw to the tapped shaft to prevent key or pulley from being pulled out.

Wave-form graphic function

- With the setup support software, "PANATERM", you can monitor the "Command speed", "Actual speed", "Torque", "Position deviation" and "Positioning complete signal".
- Helps you to analyze the machine and shorten the setup time. Note) Refer to P.236 for setup support software.

Frequency analyzing function

- You can confirm the response frequency characteristics of total machine mechanism including the servo motor with the setup support software, "PANATERM".
- Helps you to analyze the machine and shorten the setup time. Note) Refer to P.236 for setup support software.

Torque limit switching function

- You can select 2 preset torque limit value from external input.
- Use this function for tension control or press-hold control.

Conformity to CE and UL Standards

| Subject | Standard conformed | |
|--|---|--|
| Motor | IEC60034-1 IEC60034-5 UL1004 CSA22.2 No.100 | Conforms to Low-Voltage Directives |
| | EN50178 UL508C CSA22.2 No.14 | |
| Motor and driver | EN55011 Radio Disturbance Characteristics of Industrial, Scientific and Medical (ISM) Radio-Frequency Equipment | Conforms to references by EMC Directives |

See P.223 for driver specifications

• Wiring of main circuit

Circuit Breaker (MCCB)
Protects the power lines. Shuts off the circuit when overcurrent passes.

Noise Filter (NF)
Prevents external noise from the power lines. And reduces an effect of the noise generated by the servo driver.

Magnetic Contactor (MC)
Turns on/off the main power of the servo driver. Surge absorber to be used together with this.

Reactor (L)
Reduces harmonic current of the main power.

Pin-5 and Pin-3 of CN POWER

• Connect an external regenerative resistor (option) between P(pin-5) and B(pin-3) of connector, CN X1, when regenerative energy is large. (Refer to P.242 for regenerative resistor.)

- Motor to P.227
- Driver to P.223
- Option to P.236
- Recommended equipments
- Parts customer to prepare

■ List of recommended peripheral equipments

| Power supply | Motor | | Power capacity (at rated output) | Circuit Breaker (Rated current) | Noise Filter | Magnetic Contactor (Contact Composition) | Wire diameter (L1, L2, L3, U, V and W) |
|---------------------|--------|--------|----------------------------------|---------------------------------|--------------|--|--|
| | Series | Output | | | | | |
| Single phase, 100 V | MUMA | 50 W | 0.3 kVA | (5 A) | DV0P4160 | 10 A (3P+1a) | 0.75 mm ² to 0.85 mm ² AWG18 |
| | | 100 W | 0.4 kVA | | | | |
| | | 200 W | 0.5 kVA | | | | |
| Single phase, 200 V | MUMA | 50 W | 0.3 kVA | (5 A) | DV0P4160 | 15 A (3P+1a) | 0.75 mm ² to 0.85 mm ² AWG18 |
| | | 100 W | 0.4 kVA | | | | |
| | | 200 W | 0.5 kVA | | | | |
| 3-phase 200 V | MUMA | 50 W | 0.3 kVA | (5 A) | DV0P4160 | 10 A (3P+1a) | 0.75 mm ² to 0.85 mm ² AWG18 |
| | | 100 W | 0.4 kVA | | | | |
| | | 200 W | 0.5 kVA | | | | |

- * Select the single and 3-phase common specifications corresponding to the power supplies.
- To conform to EC Directives, install a circuit breaker which conforms to IEC and UL Standards (Listed, Ⓢ marked) between noise filter and power supply.
- For details of the noise filters, refer to P.256.

<Remarks>

- Use a copper conductor cables with temperature rating of 60 °C or higher for main power connector and ground terminal wiring. Use a cable for ground with diameter of 2.0 mm² (AWG14) or larger.

- Note) 1 Motor model number suffix: □
 S : Key way with center tap, without brake
 T : Key way with center tap, with brake
- Note) 2 * * represents cable length. For details, refer to P.237.

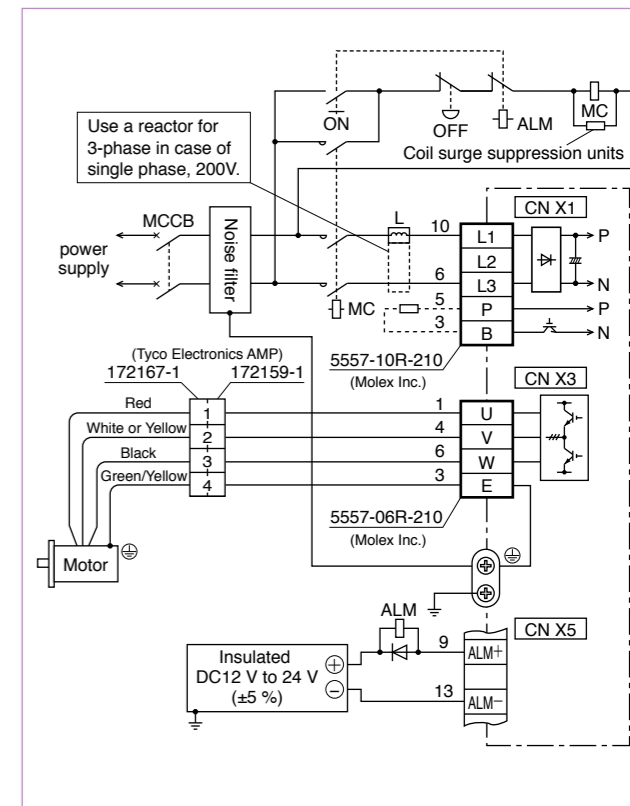

| | | | | | |
|------------------------|---|--|--|-------------|--|
| Basic Specifications | Input power | Single phase, 100 V | Single phase, 100 V to 115 V +10 % -15 % | 50 Hz/60 Hz | |
| | | Single phase, 200 V | Single phase, 200 V to 240 V +10 % -15 % | 50 Hz/60 Hz | |
| | | 3-phase, 200 V | 3-phase, 200 V to 240 V +10 % -15 % | 50 Hz/60 Hz | |
| | Environment | Temperature | Operating : 0 °C to 55 °C, Storage : -20 °C to 65 °C (Max.temperature guarantee 80 °C for 72 hours <Nomal temperature>) | | |
| | | Humidity | Both operating and storage : 90 %RH or less (free from condensation) | | |
| | | Altitude | 1000 m or lower | | |
| | | Vibration | 5.88 m/s ² or less, 10 Hz to 60 Hz (No continuous use at resonance frequency) | | |
| | Withstand voltage | Should be 1500 VAC (Sensed current: 20 mA) for 1 minute between Primary and Ground. | | | |
| | Control method | IGBT PWM Sinusoidal wave drive | | | |
| | Encoder feedback | 2500 P/r (10000 resolution) incremental encoder | | | |
| | Control signal | Input | 7 inputs (1) Servo-ON, (2) Alarm clear and other inputs vary depending on the control mode. | | |
| | | Output | 4 outputs (1) Servo alarm, (2) Alarm, (3) Release signal of external brake and other outputs vary depending on the control mode. | | |
| | Pulse signal | Input | 2 inputs Supports both line driver I/F and open collector I/F. | | |
| | | Output | 4 outputs Feed out the encoder pulse (A, B and Z-phase) in line driver. Z-phase pulse is also feed out in open collector. | | |
| | Communication function | RS232 | 1 : 1 communication to a host with RS232 interface is enabled. | | |
| Display LED | (1) Status LED (STATUS), (2) Alarm code LED (ALM-CODE) | | | | |
| Regeneration | No built-in regenerative resistor (external resistor only) | | | | |
| Dynamic brake | Built-in | | | | |
| Control mode | 3 modes of (1) High-speed position control, (2) Internal velocity control and (3) High-functionality positioning control are selectable with parameter. | | | | |
| Position control | Control input | (1) CW over-travel inhibition, (2) CCW over-travel inhibition, (3) Deviation counter clear, (4) Gain switching, (5) Electronic gear switching | | | |
| | Control output | (1) Positioning complete (In-position) | | | |
| | Pulse input | Max. command pulse frequency | Line driver : 500 kpps, Open collector : 200 kpps | | |
| | | Type of input pulse train | Differential input. Selectable with parameter, ((1) CW/CCW, (2) A and B-phase, (3) Command and Direction) | | |
| | | Electronic gear (Division/Multiplication of command pulse) | Setup of electronic gear ratio Setup range of (1-10000) × 2 ⁽⁰⁻¹⁷⁾ /(1-10000) | | |
| | | Smoothing filter | Primary delay filter or FIR type filter is selectable to the command input. | | |
| Internal speed control | Control input | (1) CW over-travel inhibition, (2) CCW over-travel inhibition, (3) Selection 1 of internal command speed, (4) Selection 2 of internal command speed, (5) Speed zero clamp | | | |
| | Control output | (1) Speed arrival (at-speed) | | | |
| | Internal speed command | Internal 4-speed is selectable with control input. | | | |
| | Soft-start/down function | Individual setup of acceleration and deceleration are enabled, with 0 s to 10 s/1000 r/min. Sigmoid acceleration/deceleration is also enabled. | | | |
| | Zero-speed clamp | 0-clamp of internal speed command with speed zero clamp input is enabled. | | | |
| Auto-gain tuning | Real-time | Estimates the load inertia in real-time in actual operation and sets up the gain automatically corresponding to the machine stiffness. Useable at (1) High-response position control, (2) Internal speed control and (3) High-functionality position control. | | | |
| | Normal mode | Estimates the load inertia with an action command inside of the driver, and sets up the gain automatically corresponding to setup of the machine stiffness. Useable at (1) High-response position control, (2) Internal speed control and (3) High-functionality position control. | | | |
| Common | Masking of unnecessary input | Masking of the following input signal is enabled. (1) Over-travel inhibition, (2) Speed zero clamp, (3) Torque limit switching | | | |
| | Division of encoder feedback pulse | 1 P/r to 2500 P/r (encoder pulses count is the max.). | | | |
| | Protective function | Hardware error | Over-voltage, under-voltage, over-speed over-load, over-heat, over-current and encoder error etc. | | |
| | | Software error | Excess position deviation, command pulse division error, EEPROM error etc. | | |
| | Traceability of alarm data | Traceable up to past 14 alarms including the present one. | | | |
| | Damping control function | Manual setup with parameter | | | |
| | Setup | Manual | Console | | |
| Setup support software | | PANATERM (Supporting OS : Windows98, Windows ME, Windows2000, and WindowsXP) | | | |

Standard Wiring Example of Main Circuit

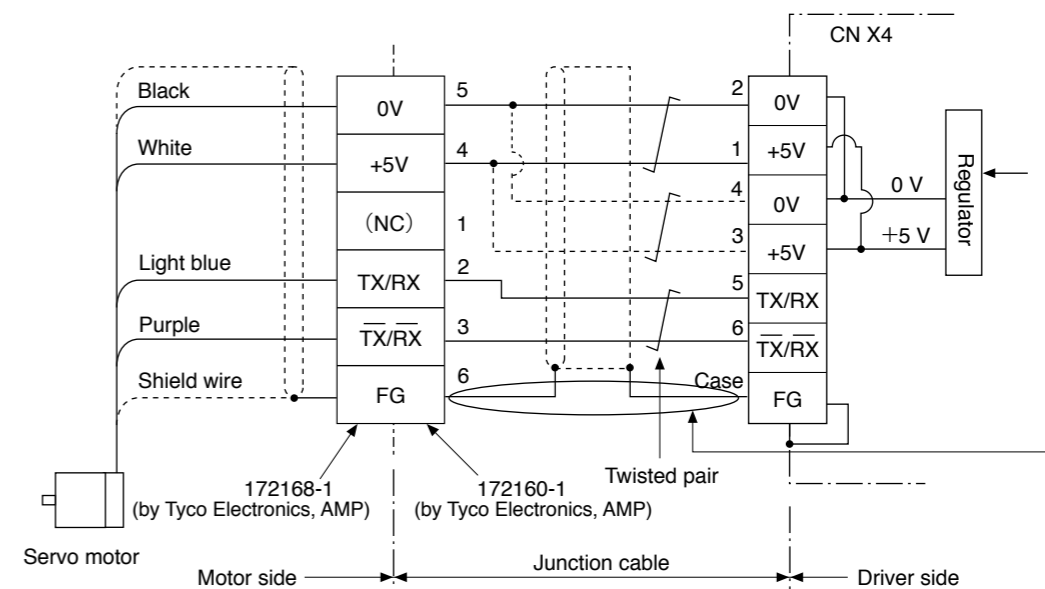

3-Phase, 200 V

Single Phase, 100 V / 200 V

Encoder Wiring Diagram

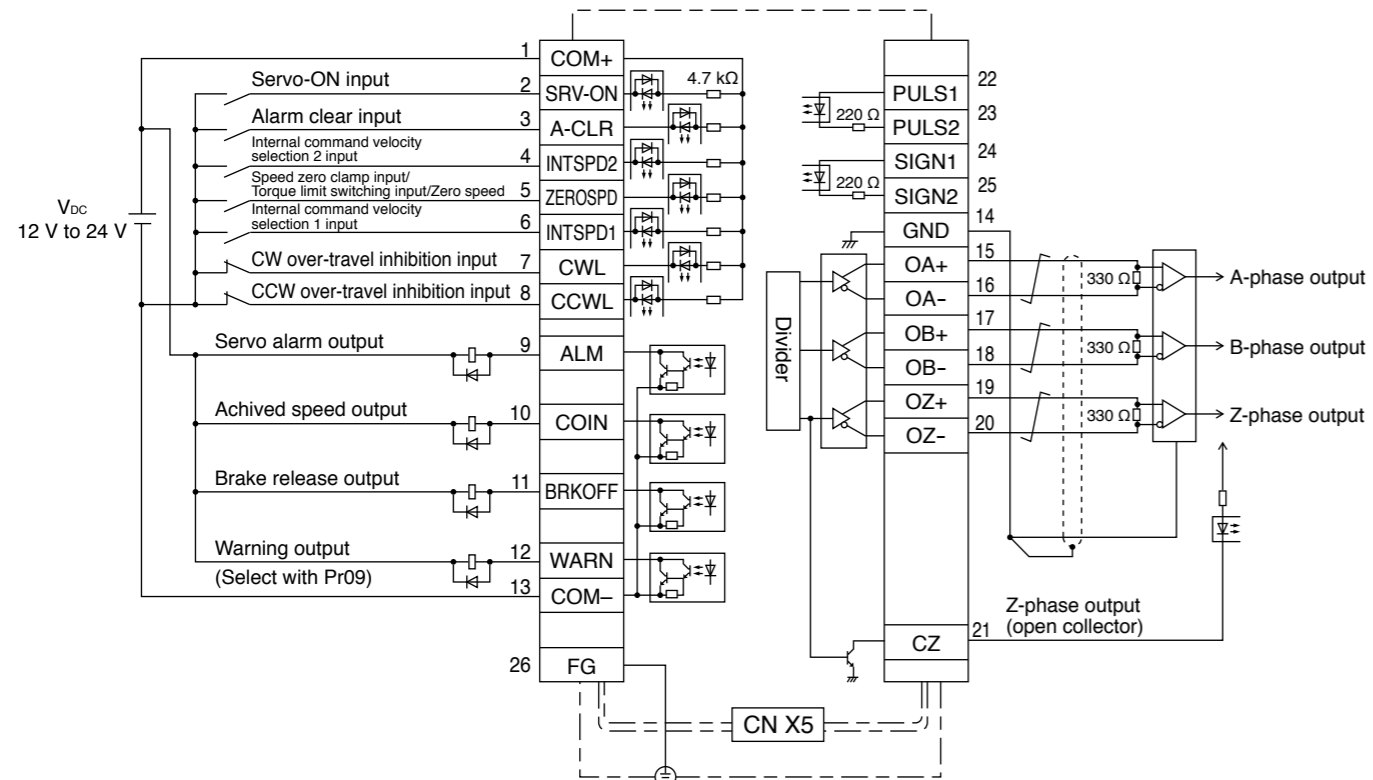

When you make your own junction cable for encoder (Refer to P.239, P.240 "Options" for connector.)

- 1) Refer the wiring diagram.
- 2) Use the twisted pair wire with shield, with core diameter of 0.18 mm² (AWG24) or larger, with higher bending resistance.
- 3) Use the twisted pair wire for the corresponding signal and power supply.
- 4) Shielding
Connect the shield of the driver to the case of CN X4.
Connect the shield of the motor to Pin-6.

*When you lower the torque limit setup (Pr5E and 5F), running range at high speed might be lowered as well.

- Note) 1. Regenerative brake frequency represents the frequency of the motor's stops from the rated speed with deceleration without load.
- If the load is connected, frequency will be defined as $1/(m+1)$, where $m = (\text{load moment of inertia}) / (\text{rotor moment of inertia})$.
 - When the motor speed exceeds the rated speed, regenerative brake frequency is in inverse proportion to the square of (running speed/rated speed).
 - Power supply voltage is AC115 V (at 100 V of the main voltage). If the supply voltage fluctuates, frequency is in inverse proportion to the square of (Running supply voltage/115) relative to the value in the table.
 - When regeneration occurs continuously such cases as running speed frequently changes or vertical feeding, consult us or a dealer.
2. If the effective torque is within the rated torque, there is no limit in regenerative brake.
3. Consult us or a dealer if the load moment of inertia exceeds the specified value.
4. Specified releasing time is obtained with the use of surge absorber for brake (Z15D151 by SEMITEC Corporation or equivalent). () represents the actually measured value using a diode (200 V, 1 A or equivalent)

<Cautions>

Reduce the moment of inertia ratio if high speed response operation is required.
Read the Instruction Manual carefully and understand all precautions and remarks before using the products.

MINAS E Series Motors with Gear Reducer

Motor Types with Gear Reducer

| Reduction ratio | Motor output (W) | | | Type of reducer |
|-----------------|------------------|-----|-----|--------------------|
| | 100 | 200 | 400 | |
| 1/5 | ● | ● | ● | For high precision |

Specifications of Motor with Gear Reducer

| Motor type | MUMA | |
|--------------|---|---|
| Gear reducer | Backlash | 3 minutes or smaller (initial value) at output shaft of the reducer |
| | Composition of gear | Planetary gear |
| | Gear efficiency | 65 % to 85 % |
| | Rotational direction at output shaft (of reducer) | Same direction as the motor output shaft |
| | Composition of gear | Planetary gear |
| | Mounting method | Flange mounting |
| | Permissible moment of inertia of the load (conversion to the motor shaft) | 10 times or smaller than rotor moment of inertia of the motor |
| Environment | Protective structure | IP44 (at gear reducer) |
| | Ambient temperature | 0 °C to 40 °C |
| | Ambient humidity | 85 %RH (free from condensation) or less |
| | Vibration resistance | 49 m/s ² or less (at motor frame) |
| | Impact resistance | 98 m/s ² or less |

Setup Support Software

Setup Support Software "PANATERM" for MINAS series AC Servo Motor & Driver

Part No. DV0P4460 (Japanese/English version)

The PANATERM assists users in setting parameters, monitoring control conditions, setup support, and analyzing mechanical operation data on the PC screen, when installed in a commercially available personal computer, and connected to the MINAS A4 series, E series through the RS232 serial interface.

If your PC does not have RS232 port, use RS232-USB converter.

Basic Function

Parameter setup

- After a parameter is defined on the screen, it will be sent to the driver immediately.
- Once you register parameters you frequently use, they can be easily set up on the screen.

Monitoring Control Conditions

Monitor

- Control conditions: Control mode, velocity, torque, error and warning
- Driver input signal
- Load conditions: Total count of command/feedback pulses, Load ratio, Regenerative resistor load ratio

Alarm

- Displays the numbers and contents of the current alarm and up to 14 error events in the past.
- Clears the numbers and contents of the current alarm and up to 14 error events in the past.

Setup

Auto tuning

- Gain adjustment and inertia ratio measurement

Graphic waveform display

- The graphic display shows command velocity, actual velocity, torque, and error waveforms.

Absolute encoder setup

- Clears absolute encoder at the origin.
- Displays single revolution/multi-revolution data.
- Displays absolute encoder status.

Analysis of Mechanical Operation Data

Frequency analysis

- Measures frequency characteristics of the machine, and displays Bode diagram.

Can not use with A5 family.

Hardware configuration

- [Personal computer] • CPU : Pentium 100MHz or more • Memory : 16 MB or more (32 MB recommended)
- Hard disk capacity (vacancy of 25 MB or more recommended) • OS : Windows® 98, Windows® Me, Windows® 2000, Windows® XP (US version)
- Communication speed of serial communication port : 2400 bps or more (The software may not operate normally using USB-to-Serial adapter.)
- [Display] • Resolution : 640*480 (VGA) or more (desirably 1024*768) • Number of colors : 256 colors or more
- [CD-ROM drive] • CD-ROM drive operable on the above-mentioned personal computer

Parameter

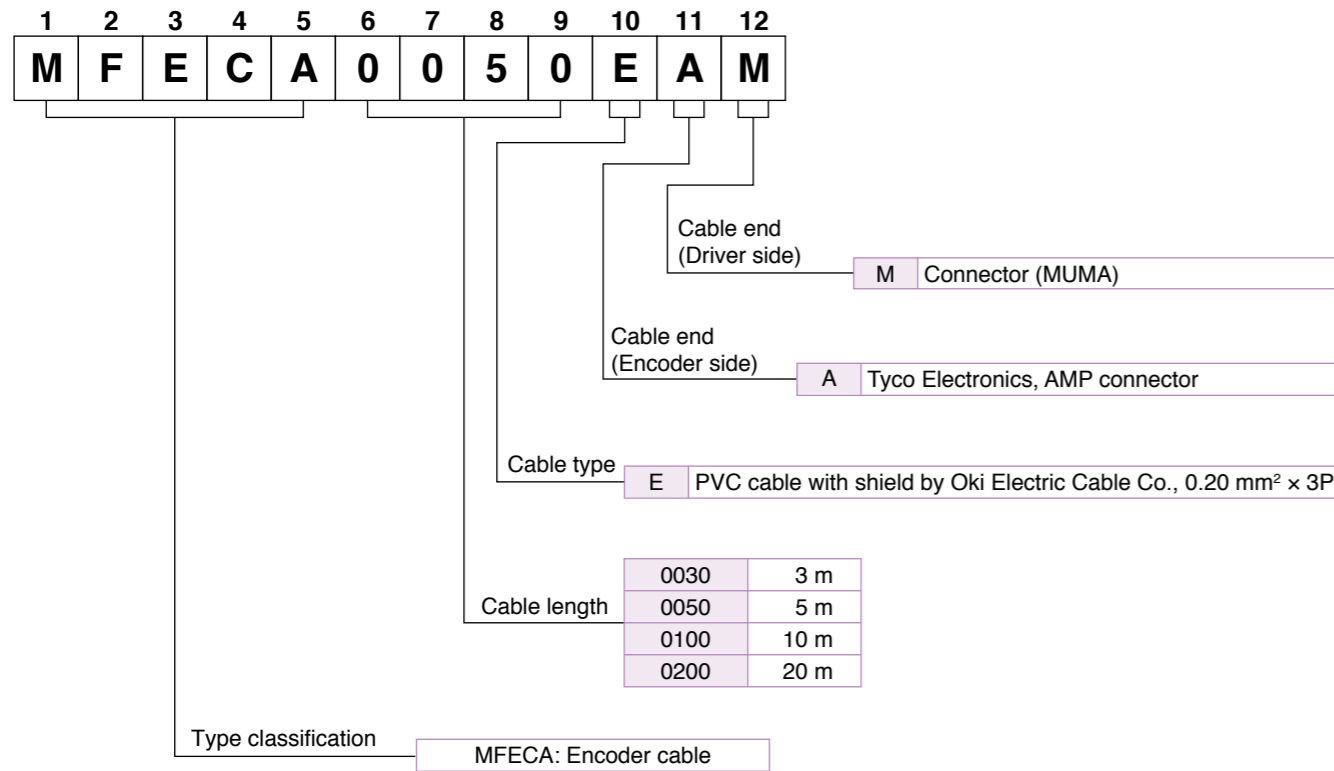

Monitor

Graphic waveform display

Connector Kit for Power Supply Connection

| | |
|----------|----------|
| Part No. | DV0P2870 |
|----------|----------|

● Parts composition

| Title | Part No. | Number | Manufacturer | Note |
|---------------------|--------------|--------|--------------|--------------------------------|
| Connector (10 pins) | 5557-10R-210 | 1 | Molex Inc. | For connector, CN X1 (10 pins) |
| Connector pin | 5556PBTLL | 6 | | |

● Pin configuration of connector CN X1

● Recommended manual crimping tool (to be prepared by customer)

| Part No. | Cable material |
|------------|----------------|
| 57026-5000 | UL1007 |
| 57027-5000 | UL1015 |

<Cautions>

1. The above pin disposition is shown when viewed from the terminal inserting direction. Make a correct wiring by checking the stamped pin numbers on the connector itself.
2. Refer to P.224 for wiring and connection.
3. Do not connect anything to pins marked "NC".

Connector Kit for Motor/Encoder Connection

| | |
|----------|---|
| Part No. | DV0P3670 (Incremental 2500 pulse, 5-wire) |
|----------|---|

This option is required when you make your own encoder cable and motor cable. (Brake cable is required for brake.)

● Parts composition

| Title | Part No. | Number | Manufacturer | Note |
|-------------------------|----------------|--------|---------------------------|--|
| Connector (Driver side) | 3E206-0100 KV | 1 | Sumitomo 3M or equivalent | For connector, CN X4 (6 pins) |
| Shell kit | 3E306-3200-008 | 1 | | |
| Connector (6 pins) | 172160-1 | 1 | Tyco Electronics | For junction to encoder cable (6 pins) |
| Connector pin | 170365-1 | 6 | | |
| Connector (4 pins) | 172159-1 | 1 | Tyco Electronics | For junction to motor power cable (4 pins) |
| Connector pin | 170366-1 | 4 | | |
| Connector (6 pins) | 5557-06R-210 | 1 | Molex Inc. | For connector, CN X3 (6 pins) |
| Connector pin | 5556PBTLL | 4 | | |

<Remarks>

We may use parts equivalent to the above for shell and connector cover.

● Pin configuration of connector CN X4 plug

● Recommended manual crimping tool (to be prepared by customer)

| Title | Part No. | Manufacturer | Cable material |
|--------------------------------|------------|------------------|----------------|
| For encoder cable junction | 755330-1 | Tyco Electronics | — |
| For motor power cable junction | 755331-1 | | |
| For Connector CN X3 | 57026-5000 | Molex Inc. | UL1007 |
| | 57027-5000 | | UL1015 |

<Remarks>

1. The above pin configuration is shown when viewed from the pin-soldering direction. Make a correct wiring by checking the stamped pin numbers on the connector itself.
2. Connect the shield of the wire to the case (FG) without fail.
3. For wiring and connection, refer to P.224.

● Pin configuration of encoder cable junction

● Pin configuration of motor power cable junction

● Pin configuration of mating connector to CN X3 connector

<Cautions>

1. The above pin configuration is shown when viewed from the terminal inserting direction. Make a correct wiring by checking the stamped pin numbers on the connector itself.
2. Refer to P.224 for wiring and connection.

Connector Kit for External Peripheral Equipment

| | |
|----------|----------|
| Part No. | DV0P0770 |
|----------|----------|

● Parts composition

| Title | Part No. | Number | Manufacturer | Note |
|-----------------|----------------|--------|---------------------------|--------------------------------|
| Connector | 10126-3000PE | 1 | Sumitomo 3M or equivalent | For connector, CN X5 (26 pins) |
| Connector cover | 10326-52A0-008 | 1 | | |

● Pin configuration of connector CN X5 (26 pins) (viewed from the soldering side)

<Cautions>

1. Make a correct wiring by checking the stamped pin numbers on the connector itself.
2. Refer to P.225 for symbols and functions of the above signals.

Interface Cable

| | | |
|----------|----------|----------------------------|
| Part No. | DV0P0800 | Cable of 2 m is connected. |
|----------|----------|----------------------------|

● Dimensions

● Wiring table

| Pin No. | Title of signal | Color or cable | Pin No. | Title of signal | Color or cable | Pin No. | Title of signal | Color or cable |
|---------|-----------------|------------------|---------|-----------------|------------------|---------|-----------------|------------------|
| 1 | COM+ | Orange (Red 1) | 10 | COIN | Pink (Black 1) | 19 | OZ+ | Pink (Red 2) |
| 2 | SRV-ON | Orange (Black 1) | 11 | BRK-OFF | Orange (Red 2) | 20 | OZ- | Pink (Black 2) |
| 3 | A-CLR | Gray (Red 1) | 12 | WARN | Orange (Black 2) | 21 | CZ | Orange (Red 3) |
| 4 | CL/INTSPD2 | Gray (Black 1) | 13 | COM- | Gray (Red 2) | 22 | PULS1 | Gray (Red 3) |
| 5 | GAIN/ZEROSPD | White (Red 1) | 14 | GND | Gray (Black 2) | 23 | PULS2 | Gray (Black 3) |
| 6 | DIV/INTSPD1 | White (Black 1) | 15 | OA+ | White (Red 2) | 24 | SIGN1 | White (Red 3) |
| 7 | CWL | Yellow (Red 1) | 16 | OA- | White (Black 2) | 25 | SIGN2 | White (Black 3) |
| 8 | CCWL | Yellow (Black 1) | 17 | OB+ | Yellow (Red 2) | 26 | FG | Orange (Black 3) |
| 9 | ALM | Pink (Red 1) | 18 | OB- | Yellow (Black 2) | | | |

<Notes>

e. g. of Pin No. designation : Pin No. 1 Wire color is orange, and one red dot.
Pin No. 12 ... Wire color is orange, and two black dot.

<Remarks>

The shield of this cable is not connected to a connector pin. To connect the shield to FG or GND at the driver side, use a connector kit for external device connection.

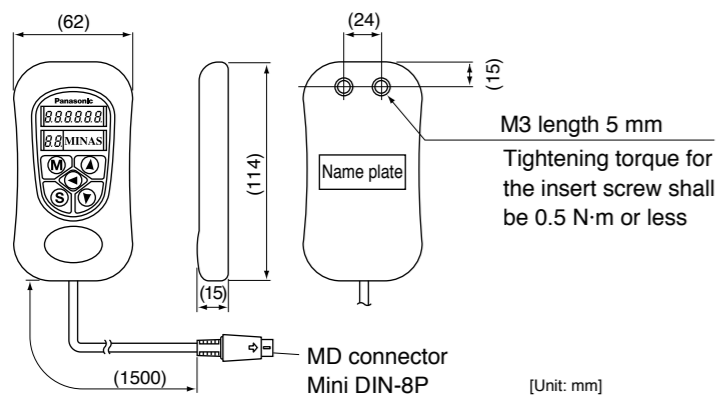

Communication Cable (For Connection with PC)

| | |
|----------|----------|
| Part No. | DV0P1960 |
|----------|----------|

Console

| | |
|----------|----------|
| Part No. | DV0P4420 |
|----------|----------|

DIN Rail Mounting Unit

| | |
|----------|----------|
| Part No. | DV0P3811 |
|----------|----------|

● Dimensions

<Notes>

2 mounting screws (M4 X L8, Pan head) are attached.
Rail stopper can be extended to max. 10 mm.

<Cautions>

Please read carefully operation manual before using this product.
In addition, please do not apply excessive stress to the product.

- Driver mounted to DIN rail

• How to Install

• Removing from DIN Rail

External Regenerative Resistor

| Part No. | Manufacturer's Part No. | Specifications | | | Note (Input Power of drive) |
|----------|-------------------------|-----------------|------------------|---|--------------------------------|
| | | Resistance Ω | Rated power W | Activation temperature of built-in fuse °C | |
| DV0P2890 | 45M03 | 50 | 10 | 137 ^{+0.3} _{-0.3} | Single phase, 100 V |
| DV0P2891 | 45M03 | 100 | 10 | 137 ^{+0.3} _{-0.3} | Single/3-phase, 200 V |

Manufactured by Iwaki Musen Kenkyusho Co., Ltd.

● Dimensions

<Caution of when using external regeneration resistor>

Since it becomes high temperature, external regeneration resistor must be installed according to the contents shown below.

- Attach to incombustibles, such as metal.
 - Install in the place which cannot touch directly by covering with incombustibles etc.
 - Do not install near the combustibles.
- Although the thermal cutoff is built in external regeneration resistor, the skin temperature of regeneration resistor may become high exceeding the operating temperature of thermal cutoff by the time the thermal cutoff operates in amplifier failure.
The thermal cutoff is for preventing ignition of the regeneration resistor in amplifier failure, and is not for controlling the skin temperature of resistor.

<Remarks>

Thermal fuse is installed for safety.
The thermal fuse may blow due to heat dissipating condition, working temperature, supply voltage or load fluctuation. Make it sure that the surface temperature of the resistor may not exceed 100 °C at the worst running conditions with the machine, which brings large regeneration (such case as high supply voltage, load inertia is large or deceleration time is short) Please carry out air cooling if needed.

Reactor

| Frame symbol of driver | Power supply specifications | Rated output | Part No. | Fig. |

Harmonic restraint on general-purpose inverter and servo driver

On September, 1994, Guidelines for harmonic restraint on heavy consumers who receive power through high voltage system or extra high voltage system and Guidelines for harmonic restraint on household electrical appliances and general-purpose articles established by the Agency for Natural Resources and Energy of the Ministry of Economy, Trade and Industry (the ex-Ministry of International Trade and Industry). According to those guidelines, the Japan Electrical Manufacturers Association (JEMA) have prepared technical documents (procedure to execute harmonic restraint: JEM-TR 198, JEM-TR 199 and JEM-TR 201) and have been requesting the users to understand the restraint and to cooperate with us. On January, 2004, it has been decided to exclude the general-purpose inverter and servo driver from the Guidelines for harmonic restraint on household electrical appliances and general-purpose articles. After that, the Guidelines for harmonic restraint on household electrical appliances and general-purpose articles was abolished on September 6, 2004.

We inform you that the procedure to execute the harmonic restraint on general-purpose inverter and servo driver will be modified as follows.

- All types of the general-purpose inverters and servo drivers used by specific users are under the control of the Guidelines for harmonic restraint on heavy consumers who receive power through high voltage system or extra high voltage system. The users who are required to apply the guidelines must calculate the equivalent capacity and harmonic current according to the guidelines and must take appropriate countermeasures if the harmonic current exceeds a limit value specified in a contract demand. (Refer to JEM-TR 210 and JEM-TR 225.)
- The Guidelines for harmonic restraint on household electrical appliances and general-purpose articles was abolished on September 6, 2004. However, based on conventional guidelines, JEMA applies the technical documents JEM-TR 226 and JEM-TR 227 to any users who do not fit into the Guidelines for harmonic restraint on heavy consumers who receive power through high voltage system or extra high voltage system from a perspective on enlightenment on general harmonic restraint. The purpose of these guidelines is the execution of harmonic restraint at every device by a user as usual to the utmost extent.

<Remarks>

When using a reactor, be sure to install one reactor to one servo driver.

EC Directives

The EC Directives apply to all such electronic products as those having specific functions and have been exported to EU and directly sold to general consumers. Those products are required to conform to the EU unified standards and to furnish the CE marking on the products.

However, our AC servos meet the relevant EC Directives for Low Voltage Equipment so that the machine or equipment comprising our AC servos can meet EC Directives.

EMC Directives

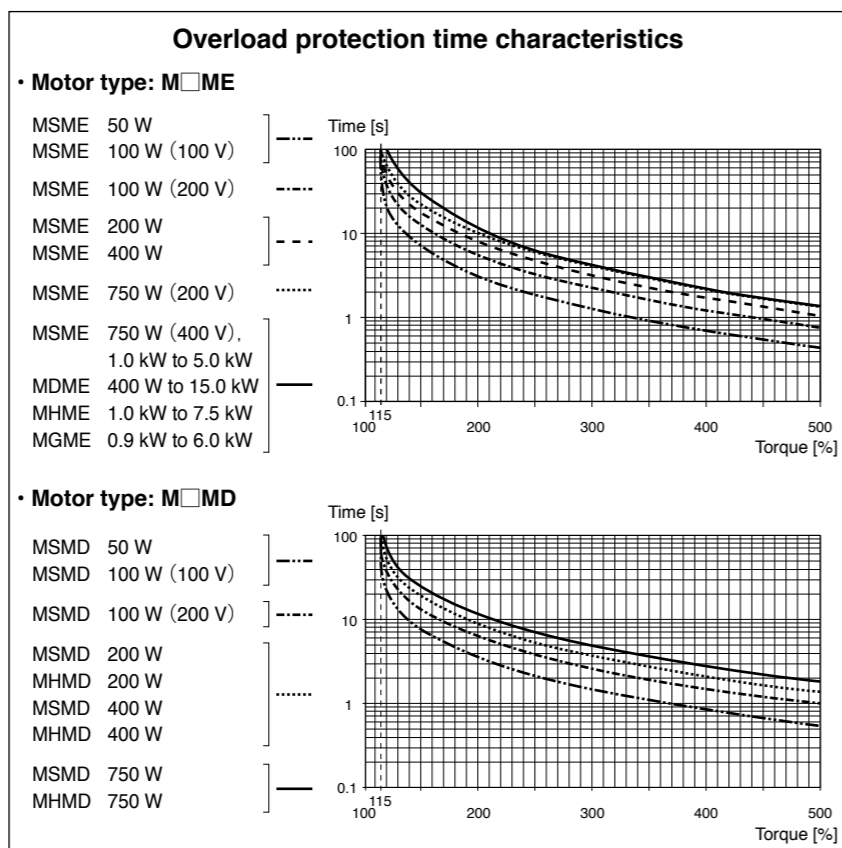

MINAS Servo System conforms to relevant standard under EMC Directives setting up certain model (condition) with certain locating distance and wiring of the servo motor and the driver. And actual working condition often differs from this model condition especially in wiring and grounding. Therefore, in order for the machine to conform to the EMC Directives, especially for noise emission and noise terminal voltage, it is necessary to examine the machine incorporating our servos.

Conformity to UL Standards

Observe the following conditions of (1) and (2) to make the system conform to UL508C (E164620).

- (1) Use the driver in an environment of Pollution Degree 2 or 1 prescribed in IEC60664-1.
(e.g. Install in the control box with IP54 enclosure.)
- (2) Make sure to install a circuit breaker or fuse which are UL recognized (Listed ) marked) between the power supply and the noise filter.
For rated current of circuit breaker and fuse, refer to P.19 "Driver and List of Applicable Peripheral Equipments".
Use a copper cable with temperature rating of 75 °C or higher.
- (3) Over-load protection level
Over-load protective function will be activated when the effective current exceeds 115 % or more than the rated current based on the time characteristics (see the graph). Confirm that the effective current of the driver does not exceed the rated current.

Set up the peak permissible current with Pr0.13 (Setup of 1st torque limit) and Pr5.22 (Setup of 2nd torque limit).

● When export this product, follow statutory provisions of the destination country.

*1 A5IIE and A5E series doesn't correspond to the functional safety standard.

*2 Information related to the Korea Radio Law

This servo driver is a Class A commercial broadcasting radio wave generator not designed for home use. The user and dealer should be aware of this fact.

A 급 기기 (업무용 방송통신기자재)
이 기기는 업무용(A 급) 전자파적합기기로서 판매자 또는 사용자는 이 점을 주의하시기 바라며, 가정외의 지역에서 사용하는 것을 목적으로 합니다.

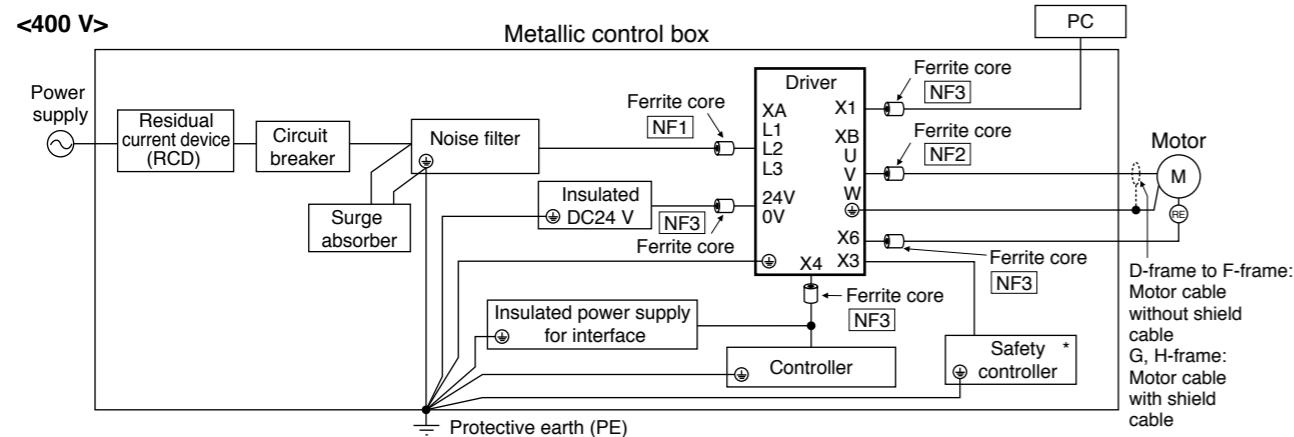

(대상기종 : Servo Driver)

Installation Environment

Use the servo driver in the environment of Pollution Degree 1 or 2 prescribed in IEC-60664-1 (e.g. Install the driver in control panel with IP54 protection structure.)

For [NF1] to [NF3], refer to the Table "Ferrite core" (P.254).
* A5IE, A5E is not provided with X3 terminal.

For [NF1] to [NF3], refer to the Table "Ferrite core" (P.254).
* A5IE, A5E is not provided with X3 terminal.

<Caution>

Use options correctly after reading Operating Instructions of the options to better understand the precautions. Take care not to apply excessive stress to each optional part.

Power Supply

| | | | |
|--|--|--------------------------|-------------|
| 100 V type (A-frame to C-frame) | Single phase, 100 V $+10\%$ to -15% | 120 V $+10\%$ to -15% | 50 Hz/60 Hz |
| 200 V type (A-frame to D-frame) | Single/3-phase, 200 V $+10\%$ to -15% | 240 V $+10\%$ to -15% | 50 Hz/60 Hz |
| 200 V type (E-frame to H-frame) | 3-phase, 200 V $+10\%$ to -15% | 230 V $+10\%$ to -15% | 50 Hz/60 Hz |
| 400 V type [Main power supply] (D-frame to H-frame) | 3-phase, 380 V $+10\%$ to -15% | 480 V $+10\%$ to -15% | 50 Hz/60 Hz |
| 400 V type [Control power supply] (D-frame to H-frame) | DC 24 V $\pm 15\%$ | | |

(1) This product is designed to be used in over-voltage category (installation category) III of EN 61800-5-1:2007.
(2) Use an insulated power supply of DC12 V to 24 V which has CE marking or complies with EN60950.

Circuit Breaker

Install a circuit breaker which complies with IEC Standards and UL recognized (Listed and marked) between power supply and noise filter.
The short-circuit protection circuit on the product is not for protection of branch circuit.
The branch circuit should be protected in accordance with NEC and the applicable local regulations in your area.

Noise Filter

When you install one noise filter at the power supply for multi-axes application, contact the manufacturer of the noise filter. If noise margin is required, connect 2 filters in series to emphasize effectiveness.

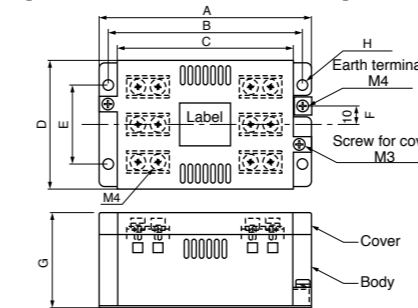

Options

| Option part No. | Voltage specifications for driver | Manufacturer's part No. | Applicable driver (frame) | Manufacturer |
|-----------------|-----------------------------------|-------------------------|---------------------------|---------------------|
| DV0P4170 | Single phase 100 V, 200 V | SUP-EK5-ER-6 | A-frame and B-frame | Okaya Electric Ind. |

| Option part No. | Voltage specifications for driver | Manufacturer's part No. | Applicable driver (frame) | Manufacturer |
|-----------------|-----------------------------------|-------------------------|---------------------------|---------------------|
| DV0PM20042 | 3-phase 200 V | 3SUP-HU10-ER-6 | A-frame and B-frame | Okaya Electric Ind. |
| DV0P4220 | Single phase 100 V, 200 V | | C-frame | |
| DV0PM20043 | 3-phase 200 V | 3SUP-HU30-ER-6 | D-frame | |
| | 3-phase 200 V | 3SUP-HU50-ER-6 | E-frame | |

[DV0PM20042, DV0P4220]

[DV0PM20043]

| [Size] | A | B | C | D | E | F | G | H |
|------------|-----|-----|-----|----|----|----|----|-----|
| DV0PM20042 | 115 | 105 | 95 | 70 | 43 | 10 | 52 | 5.5 |

| NF1 | Power cable | A, B, C, D | D, E, F | DV0P1460 | ZCAT3035-1330 | TDK Corp. | 4 |
| | | E, F | — | Recommended components | RJ8035 | KK-CORP.CO.JP | 1 |
| | | G, H | G, H | Recommended components | RJ8095 | KK-CORP.CO.JP | 1 |
| NF2 | Motor cable | A, B, C, D, E, F | D, E, F | DV0P1460 | ZCAT3035-1330 | TDK Corp. | 4 |
| | | G, H | G, H | Recommended components | T400-61D | MICROMETALS | 1 |
| NF3 | • 24 V Power cable • Encoder cable • Interface cable • USB cable • Control power cable | Common (to all frames) | | DV0P1460 | ZCAT3035-1330 | TDK Corp. | 4 |

*1 For symbols, refer to the Block Diagram "Installation Environment" (P.249).

<Remarks>

To connect the ferrite core to the connector XB connection cable, adjust the sheath length at the tip of the cable, as required.

<Caution>

Fix the ferrite core in order to prevent excessive stress to the cables.

Residual Current Device

Install a type B Residual current device (RCD) at primary side of the power supply.

Type B: Residual current device which detects a direct-current ingredient.

Grounding

(1) Connect the protective earth terminal (⊕) of the driver and the protective earth terminal (PE) of the control box without fail to prevent electrical shocks.

(2) Do not make a joint connection to the protective earth terminals (⊕). 2 terminals are provided for protective earth.

<Note>

For driver and applicable peripheral equipments, refer to P.19 "Driver and List of Applicable Peripheral Equipments".

Compliance to EC and EMC Directives

EC Directives

The EC Directives apply to all such electronic products as those having specific functions and have been exported to EU and directly sold to general consumers. Those products are required to conform to the EU unified standards and to furnish the CE marking on the products. MINAS AC Servos conforms to the EC Directives for Low Voltage Equipment so that the machine incorporating our servos has an easy access to the conformity to relevant EC Directives for the machine.

EMC Directives

MINAS Servo System conform to relevant standard under EMC Directives setting up certain model (condition) with certain locating distance and wiring of the servo motor and the driver. And actual working condition often differs from this model condition especially in wiring and grounding. Therefore, in order for the machine to conform to the EMC Directives, especially for noise emission and noise terminal voltage, it is necessary to examine the machine incorporating our servos.

Conformed Standards

| Subject | Conformed Standard | | |
|------------------|------------------------------------|---|--|
| Motor | IEC60034-1 | IEC60034-5 UL1004 CSA22.2 No.100 | Conforms to Low-Voltage Directives |
| | EN50178 | UL508C CSA22.2 No.14 | |
| Motor and driver | EN55011 | Radio Disturbance Characteristics of Industrial, Scientific and Medical (ISM) Radio-Frequency Equipment | Conforms to references by EMC Directives |
| | EN61000-6-2 | Immunity for Industrial Environments | |
| | IEC61000-4-2 | Electrostatic Discharge Immunity Test | |
| | IEC61000-4-3 | Radio Frequency Electromagnetic Field Immunity Test | |
| | IEC61000-4-4 | Electric High-Speed Transition Phenomenon/Burst Immunity Test | |
| | IEC61000-4-5 | Lightening Surge Immunity Test | |
| | IEC61000-4-6 | High Frequency Conduction Immunity Test | |
| IEC61000-4-11 | Instantaneous Outage Immunity Test | | |

IEC : International Electrotechnical Commission
EN : Europaischen Normen
EMC: Electromagnetic Compatibility
UL : Underwriters Laboratories
CSA : Canadian Standards Association

Composition of Peripheral Components

<Precautions in using options>

Use options correctly after reading operation manuals of the options to better understand the precautions. Take care not to apply excessive stress to each optional part.

Installation Environment

Use Minas driver in environment of Pollution Degree 1 or 2 prescribed in IEC-60664-1 (e.g. Install the driver in control panel with IP54 protection structure.)

Power Supply

| | | | | | | |
|--------------|---------------------|----------------|----|-------|----------------|-------------|
| 100 V system | Single phase, 100 V | +10 % -15 % | to | 115 V | +10 % -15 % | 50 Hz/60 Hz |
| 200 V system | Single phase, 200 V | +10 % -15 % | to | 240 V | +10 % -15 % | 50 Hz/60 Hz |
| 200 V system | 3-phase, 200 V | +10 % -15 % | to | 240 V | +10 % -15 % | 50 Hz/60 Hz |

- (1) Use the power supply under an environment of Overvoltage Category II specified in IEC60664-1.
- (2) For a interface power supply, use the insulated one with 12 VDC to 24 VDC which conforms to CE Marking or EN Standards (EN60950).

Circuit Breaker

Connect a circuit breaker which conforms to IEC standards and is UL recognized (UL Listed, marked), between the power supply and the noise filter.

Noise Filter

When you install one noise filter in the power supply for multi axis application, consult with the manufacture of the filter.

| Option part No. | Part No. | Manufacturer |
|-----------------|----------------|-------------------------------|
| DV0P4160 | 3SUP-HU10-ER-6 | Okaya Electric Industries Co. |

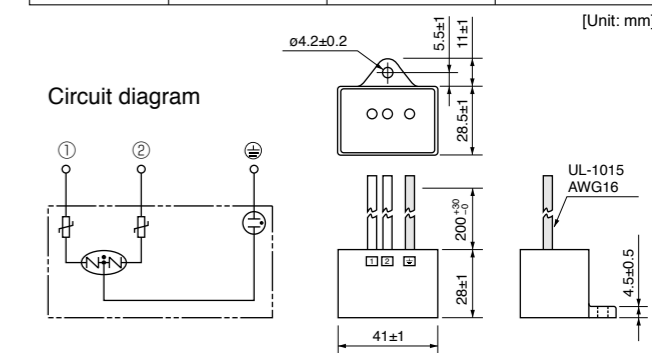

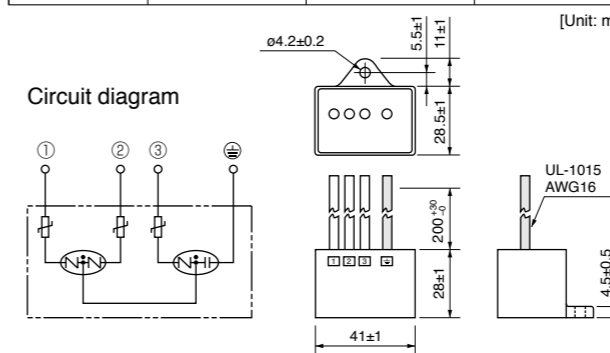

Surge Absorber

Install a surge absorber at primary side of the noise filter.

| Option part No. | Driver voltage spec | Part No. | Manufacturer |
|-----------------|---------------------|----------------|----------------|
| DV0P1450 | 3-phase, 200 V | R·A·V-781BXZ-4 | Okaya Electric |

| Option part No. | Driver voltage spec | Part No. | Manufacturer |
|-----------------|----------------------------|----------------|----------------|
| DV0P4190 | Single phase, 100 V, 200 V | R·A·V-781BWZ-4 | Okaya Electric |

<Remarks>

Remove this surge absorber when you perform dielectric test on the machine, or surge absorber might be damaged.

Ferrite Core

Install ferrite core to all cables (Power line, motor cable, encoder cable, interface cable)

<Caution>

- Please fix a ferrite core to avoid excessive stress to the cable.
 - When using multiple axes, noise generated from each driver might influence driver and peripheral equipment and result to malfunction.
- Please insert ferrite core between driver and motor wires (U, V, W but grounding).
(Please refer to P.255 "peripheral equipment configuration".)

| Option part No. | Part No. | Qty. | Manufacturer |
|-----------------|---------------|------|--------------|
| DV0P1460 | ZCAT3035-1330 | 4 | TDK Corp. |

Grounding

- (1) Connect the protective earth terminal of the driver () and protective earth terminal of the control panel (PE) without fail to prevent electrical shocks.
- (2) Do not co-clamp to the ground terminals (). Two ground terminals are provided.

Ground-Fault Breaker

Install a ground fault circuit breaker (RCD) to the primary side of the power supply.
Please use B-type (DC sensitive) ground fault circuit breakers defined in IEC60947-2, JISC8201-2-2.

Conformity to UL Standards

Observe the following conditions of (1) and (2) to make the system conform to UL508C (File No. E164620).

- (1) Use the driver in an environment of Pollution Degree 2 or 1 prescribed in IEC60664-1. (e.g. Install in the control box with IP54 enclosure.)
- (2) Install a circuit breaker or fuse which are UL recognized (LISTED marked) between the power supply and the noise filter without fail.

AC Servo Motor Capacity Selection Software

We have prepared PC software "M-SELECT" for AC servo motor capacity selection. Consult our sales representative or authorized distributor.

• Three-step selection

1. Select components and specified values

Select appropriate mechanical parameter items and fill them with parameter values derived from the real machine. To simulate the target machine as practical as possible, use maximum number of parameters available.

2. Enter operation pattern

Input the planned operation pattern that will contain [speed and rotation standard] or [absolute position standard] with optional settings such as S-acceleration/deceleration.

3. Select the motor

When the data required in step 1 and 2 above have been input, the software lists the motors, which will be appropriate to use with your machine. Select the motor that is best suitable for your machine application.

▶ Details of motor

Once the motor is selected, specifications of the motor and amplifier, and details of reason for determination are displayed and may be printed out.

Option Selection Software for AC Servo Motor

We have prepared PC software to enable fast, easy, and correct option selection, a complicated job without the software.

• Two procedures for option selection

1. Selection according to driver series and motor type

Suitable option can be selected by selecting driver series, motor type and motor specification through pulldown menu.

Driver series

Motor type

Motor specification

Model number input area

2. Entry of model number

If you know the model number based on the servo motor and driver currently used, enter the model number.

Tab

▶ Result of selection

Tab sheet specific to each of option model numbers is used for easier identification of the desired option.

* When you are using the motor capacity selection software, simply press [Option Selection] tab and the screen as shown right will appear.

Please download from our web site and use after install to the PC. <http://industrial.panasonic.com/ww/products/motors-compressors/fa-motors>

Organization of the System of Units

Table 1: Basic unit

| Quantity | Name of unit | Symbol of unit |
|---------------------------|--------------|----------------|
| Length | meter | m |
| Weight | kilogram | kg |
| Time | second | s |
| Current | ampere | A |
| Thermodynamic temperature | kelvin | K |
| Amount of substance | mol | mol |
| Luminous intensity | candela | cd |

Table 2: Auxiliary unit

| Quantity | Name of unit | Symbol of unit |
|-------------|--------------|----------------|
| Plane angle | radian | rad |
| Solid angle | steradian | sr |

Table 3: Major derived unit with proper name

| Quantity | Name | Symbol of unit | Derivation from basic unit, auxiliary unit or other derived unit |
|--|--------------------------------------|----------------|--|
| Frequency | hertz | Hz | 1 Hz = 1 s ⁻¹ |
| Force | newton | N | 1 N = 1 kg·m/s ² |
| Pressure, Stress | pascal | Pa | 1 Pa = 1 N/m ² |
| Energy, Work, Amount of heat | joule | J | 1 J = 1 N·m |
| Amount of work, Work efficiency, Power, Electric power | watt | W | 1 W = 1 J/s |
| Electric charge, Amount of electricity | coulomb | C | 1 C = 1 A·s |
| Electric potential, Potential difference, Voltage, Electromotive force | volt | V | 1 V = 1 J/C |
| Electrostatic capacity, Capacitance | farad | F | 1 F = 1 C/V |
| Electric resistance | ohm | Ω | 1 Ω = 1 V/A |
| Electric conductance | siemens | S | 1 S = 1 Ω ⁻¹ |
| Magnetic flux | weber | Wb | 1 Wb = 1 V·s |
| Magnetic flux density, Magnetic induction | tesla | T | 1 T = 1 Wb/m ² |
| Inductance | henry | H | 1 H = 1 Wb/A |
| Degree centigrade (Celsius) | degree centigrade (Celsius) / degree | °C | t °C = (t+273.15) K |
| Luminous flux | lumen | lm | 1 lm = 1 cd·sr |
| Illuminance | lux | lx | 1 lx = 1 lm/m ² |

Table 4: Unit combined with SI unit

| Quantity | Name | Symbol of unit |
|-------------|--------|----------------|
| Time | minute | min |
| | hour | h |
| | day | d |
| Plane angle | degree | ° |
| | minute | ' |
| | second | " |
| Volume | liter | l, L |
| Weight | ton | t |

Table 5: Prefix

| Multiples powered to unit | Prefix | |
|---------------------------|--------|--------|
| | Name | Symbol |
| 10 ¹⁸ | exa | E |
| 10 ¹⁵ | peta | P |
| 10 ¹² | tera | T |
| 10 ⁹ | giga | G |
| 10 ⁶ | mega | M |
| 10 ³ | kilo | k |
| 10 ² | hecto | h |
| 10 | deca | da |
| 10 ⁻¹ | deci | d |
| 10 ⁻² | centi | c |
| 10 ⁻³ | milli | m |
| 10 ⁻⁶ | micro | μ |
| 10 ⁻⁹ | nano | n |
| 10 ⁻¹² | pico | p |
| 10 ⁻¹⁵ | femto | f |
| 10 ⁻¹⁸ | atto | a |

| Quantity | Symbol of conventional unit | Symbol of SI unit and compatible unit | Conversion value |
|--|---------------------------------------|---|--|
| Length | μ (micron) | μm | 1 μ = 1 μm (micrometer) |
| Acceleration | Gal | m/s ² | 1 Gal = 10 ⁻² m/s ² |
| | G | m/s ² | 1 G = 9.80665 m/s ² |
| Frequency | c/s, c | Hz | 1 c/s = Hz |
| Revolving speed, Number of revolutions | rpm | s ⁻¹ or min ⁻¹ , r/min | 1 rpm = 1 min ⁻¹ |
| Weight | kgf | - | } Same value |
| Mass | - | kg | |
| Weight flow rate | kgf/s | - | } Same value |
| Mass flow rate | - | kg/s | |
| Specific weight | kgf/m ³ | - | } Same value |
| Density | - | kg/m ³ | |
| Specific volume | m ³ /kgf | m ³ /kg | Same value |
| Load | kgf | N | 1 kgf = 9.80665 N |
| Force | kgf | N | 1 kgf = 9.80665 N |
| | dyn | N | 1 dyn = 10 ⁻⁵ N |
| Moment of force | kgf·m | N·m | 1 kgf·m = 9.806 N·m |
| Pressure | kgf/cm ² | Pa, bar ⁽¹⁾ or kgf/cm ² | 1 kgf/cm ² = 9.80665 × 10 ⁴ Pa = 0.980665 bar |
| | at (Engineering atmospheric pressure) | Pa | 1 at = 9.80665 × 10 ⁴ Pa |
| | atm (Atmospheric pressure) | Pa | 1 atm = 1.01325 × 10 ⁵ Pa |
| | mH ₂ O, mAq | Pa | 1 mH ₂ O = 9.80665 × 10 ³ Pa |
| | mmHg Torr | Pa or mmHg ⁽²⁾ Pa | 1 mmHg = 133.322 Pa |
| Stress | kgf/mm ² | Pa or N/m ² | 1 kgf/mm ² = 9.80665 × 10 ⁶ Pa = 9.80665 × 10 ⁶ N/m ² |
| | kgf/cm ² | Pa or N/m ² | 1 kgf/cm ² = 9.80665 × 10 ⁴ Pa = 9.80665 × 10 ⁴ N/m ² |
| Elastic modulus | kgf/m ² | Pa or N/m ² | 1 kgf/m ² = 9.80665 Pa = 9.80665 N/m ² |
| | kgf/cm ² | Pa or N/m ² | 1 kgf/cm ² = 9.80665 × 10 ⁴ N/m ² |
| Energy, Work | kgf·m | J (joule) | 1 kgf·m = 9.80665 J |
| | erg | J | 1 erg = 10 ⁻⁷ J |
| Work efficiency, Power | kgf·m/s | W (watt) | 1 kgf·m/s = 9.80665 W |
| | PS | W | 1 PS = 0.7355 kW |
| Viscosity | PP | Pa·s | 1 P = 0.1 Pa·s |
| Kinetic viscosity | St | mm ² /s | 10 ⁻² St = 1 mm ² /s |
| Thermodynamic temperature | K | K (kelvin) | 1 K = 1 K |
| Temperature interval | deg | K ⁽³⁾ | 1 deg = 1 K |
| Amount of heat | cal | J | 1 cal = 4.18605 J |
| Heat capacity | cal/°C | J/K ⁽³⁾ | 1 cal/°C = 4.18605 J/K |
| Specific heat, Specific heat capacity | cal/(kgf·°C) | cal/(kgf·K) ⁽³⁾ | 1 cal/(kgf·°C) = 4.18605 J/(kg·K) |
| Entropy | cal/K | J/K | 1 cal/K = 4.18605 J/K |
| Specific entropy | cal/(kgf·K) | J/(kg·K) | 1 cal/(kgf·K) = 4.18605 J/(kg·K) |
| Internal energy (Enthalpy) | cal | J | 1 cal = 4.18605 J |
| Specific internal energy (Specific enthalpy) | cal/kgf | J/kg | 1 cal/kgf = 4.18605 J/kg |
| Heat flux | cal/h | W | 1 kcal/h = 1.16279 W |
| Heat flux density | cal/(h·m ²) | W/m ² | 1 kcal/(h·m ²) = 1.16279 W/m ² |
| Thermal conductivity | cal/(h·m·°C) | W/(m·K) ⁽³⁾ | 1 kcal/(h·m·°C) = 1.16279 W/(m·K) |
| Coefficient of thermal conductivity | cal/(h·m ² ·°C) | W/(m ² ·K) ⁽³⁾ | 1 kcal/(h·m ² ·°C) = 1.16279 W/(m ² ·K) |
| Intensity of magnetic field | Oe | A/m | 1 Oe = 10 ³ / (4π) A/m |
| Magnetic flux | Mx | Wb (weber) | 1 Mx = 10 ⁻⁸ Wb |
| Magnetic flux density | Gs, G | T (tesla) | 1 Gs = 10 ⁻⁴ T |

Note
 (1) Applicable to liquid pressure. Also applicable to atmospheric pressure of meteorological data, when "bar" is used in international standard.
 (2) Applicable to scale or indication of blood pressure manometers.
 (3) "C" can be substituted for "K".

Flow of Motor Selection

1. Definition of mechanism to be driven by motor.

Define details of individual mechanical components (ball screw length, lead and pulley diameters, etc.)

<Typical mechanism>

Ball screw mechanism

Belt mechanism

Rack & pinion, etc.

2. Definition of operating pattern.

Acceleration/deceleration time, Constant-velocity time, Stop time, Cycle time, Travel distance

Note) Selection of motor capacity significantly varies depending on the operating pattern. The motor capacity can be reduced if the acceleration/deceleration time and stop time are set as long as possible.

3. Calculation of load inertia and inertia ratio.

Calculate load inertia for each mechanical component. (Refer to "General inertia calculation method" described later.)

Divide the calculated load inertia by the inertia of the selected motor to check the inertia ratio. For calculation of the inertia ratio, note that the catalog value of the motor inertia is expressed as "x 10⁻⁴ kg·m²".

4. Calculation of motor velocity

Calculate the motor velocity from the moving distance, acceleration / deceleration time and constant-velocity time.

5. Calculation of torque

Calculate the required motor torque from the load inertia, acceleration/deceleration time and constant-velocity time.

6. Calculation of motor

Select a motor that meets the above 3 to 5 requirements.

Description on the Items Related to Motor Selection

1. Torque

(1) Peak torque

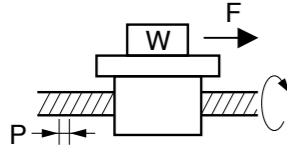

Indicate the maximum torque that the motor requires during operation (mainly in acceleration and deceleration steps). The reference value is 80% or less of the maximum motor torque. If the torque is a negative value, a regenerative discharge resistor may be required.

(2) Traveling torque, Stop holding torque

Indicates the torque that the motor requires for a long time. The reference value is 80% or less of the rated motor torque. If the torque is a negative value, a regenerative discharge resistor may be required.

Traveling torque calculation formula for each mechanism

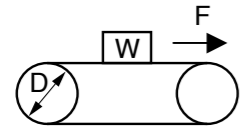

Ball screw mechanism

Traveling torque $T_f = \frac{P}{2\pi\eta} (\mu g W + F)$

W : Weight [kg] η : Mechanical efficiency
 P : Lead [m] μ : Coefficient of friction
 F : External force [N] g : Acceleration of gravity 9.8[m/s²]

Belt mechanism

Traveling torque $T_f = \frac{D}{2\pi\eta} (\mu g W + F)$

W : Weight [kg] η : Mechanical efficiency
 P : Pulley diameter [m] μ : Coefficient of friction
 F : External force [N] g : Acceleration of gravity 9.8[m/s²]

(3) Effective torque

Indicates a root-mean-square value of the total torque required for running and stopping the motor per unit time. The reference value is approx. 80% or less of the rated motor torque.

$$T_{rms} = \sqrt{\frac{T_a^2 \times t_a + T_f^2 \times t_b + T_d^2 \times t_d}{t_c}}$$

- T_a : Acceleration torque [N·m] t_a : Acceleration time [s] t_c : Cycle time [s]
- T_f : Traveling torque [N·m] t_b : Constant-velocity time [s] (Run time + Stop time)
- T_d : Deceleration torque [N·m] t_d : Deceleration time [s]

2. Motor velocity

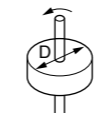

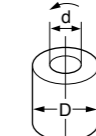

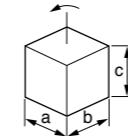

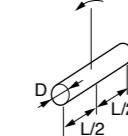

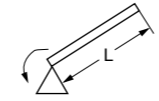

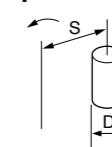

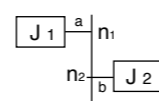

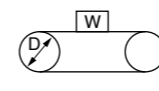

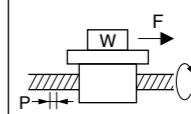

Maximum velocity

Maximum velocity of motor in operation: The reference value is the rated velocity or lower value. When the motor runs at the maximum velocity, you must pay attention to the motor torque and temperature rise. For actual calculation of motor velocity, see "Example of motor selection" described later.

3. Inertia and inertia ratio

Inertia is like the force to retain the current moving condition. Inertia ratio is calculated by dividing load inertia by rotor inertia. Generally, for motors with 750 W or lower capacity, the inertia ratio should be "20" or less. For motors with 1000 W or higher capacity, the inertia ratio should be "10" or less. If you need quicker response, a lower inertia ratio is required. (For example, when the motor takes several seconds in acceleration step, the inertia ratio can be further increased.)

General inertia calculation method

| Shape | J calculation formula | Shape | J calculation formula |
|--|---|---|--|
| Disk  | $J = \frac{1}{8} W D^2$ [kg·m ²] W : Weight [kg] D : Outer diameter [m] | Hollow cylinder  | $J = \frac{1}{8} W (D^2 + d^2)$ [kg·m ²] W : Weight [kg] D : Outer diameter [m] d : Inner diameter [m] |
| Prism  | $J = \frac{1}{12} W (a^2 + b^2)$ [kg·m ²] W : Weight [kg] a, b, c : Side length [m] | Uniform rod  | $J = \frac{1}{48} W (3D^2 + 4L^2)$ [kg·m ²] W : Weight [kg] D : Outer diameter [m] L : Length [m] |
| Straight rod  | $J = \frac{1}{3} W L^2$ [kg·m ²] W : Weight [kg] L : Length [m] | Separated rod  | $J = \frac{1}{8} W D^2 + W S^2$ [kg·m ²] W : Weight [kg] D : Outer diameter [m] S : Distance [m] |
| Reduction gear  | Inertia on shaft "a" $J = J_1 + \left(\frac{n_2}{n_1}\right)^2 J_2$ [kg·m ²] n ₁ : A rotational speed of a shaft [r/min] n ₂ : A rotational speed of b shaft [r/min] | | |
| Conveyor  | $J = \frac{1}{4} W D^2$ [kg·m ²] W : Workpiece weight on conveyor [kg] D : Drum diameter [m] * Excluding drum J | Ball screw  | $J = J_B + \frac{W \cdot P^2}{4\pi^2}$ [kg·m ²] W : Weight [kg] P : Lead J _B : J of ball screw |

If weight (W [kg]) is unknown, calculate it with the following formula:

Weight W[kg]=Density ρ [kg/m³] x Volume V[m³]
 Density of each material
 Iron ρ =7.9 x 10³ [kg/m³] Aluminum ρ =2.8 x 10³ [kg/m³]
 Brass ρ =8.5 x 10³ [kg/m³]

To Drive Ball Screw Mechanism

1. Example of motor selection for driving ball screw mechanism

- Workpiece weight WA = 10 [kg]
- Ball screw length BL = 0.5 [m]
- Ball screw diameter BD = 0.02 [m]
- Ball screw lead BP = 0.02 [m]
- Ball screw efficiency Bη = 0.9
- Travel distance 0.3[m]
- Coupling inertia Jc = 10 × 10⁻⁶ [kg·m²] (Use manufacturer-specified catalog value, or calculation value.)

2. Running pattern :

- Acceleration time ta = 0.1 [s]
- Constant-velocity time tb = 0.8 [s]
- Deceleration time td = 0.1 [s]
- Cycle time tc = 2 [s]
- Travel distance 0.3[m]

3. Ball screw weight

$$BW = \rho \times \pi \times \left(\frac{BD}{2}\right)^2 \times BL = 7.9 \times 10^3 \times \pi \times \left(\frac{0.02}{2}\right)^2 \times 0.5 = 1.24 \text{ [kg]}$$

4. Load inertia

$$JL = Jc + JB = Jc + \frac{1}{8}BW \times BD^2 + \frac{WA \cdot BP^2}{4\pi^2} = 0.00001 + (1.24 \times 0.02^2) / 8 + 10 \times 0.02^2 / 4\pi^2 = 1.73 \times 10^{-4} \text{ [kg}\cdot\text{m}^2\text{]}$$

5. Provisional motor selection

In case of MSME 200 W motor : JM = 0.14 × 10⁻⁴ [kg·m²]

6. Calculation of inertia ratio

JL / JM = 1.73 × 10⁻⁴ / 0.14 × 10⁻⁴ Therefore, the inertia ratio is "12.3" (less than "30")
(In case of MSME 100 W motor: JM = 0.051 × 10⁻⁴ Therefore, the inertia ratio is "33.9".)

7. Calculation of maximum velocity (Vmax)

$$\frac{1}{2} \times \text{Acceleration time} \times V_{\text{max}} + \text{Constant-velocity time} \times V_{\text{max}} + \frac{1}{2} \times \text{Deceleration time} \times V_{\text{max}} = \text{Travel distance}$$

$$\frac{1}{2} \times 0.1 \times V_{\text{max}} + 0.8 \times V_{\text{max}} + \frac{1}{2} \times 0.1 \times V_{\text{max}} = 0.3$$

$$0.9 \times V_{\text{max}} = 0.3$$

$$V_{\text{max}} = 0.3 / 0.9 = 0.334 \text{ [m/s]}$$

8. Calculation of motor velocity (N [r/min]) Ball screw lead per resolution: BP = 0.02 [m]

$$N = 0.334 / 0.02 = 16.7 \text{ [r/s]}$$

$$= 16.7 \times 60 = 1002 \text{ [r/min]} < 3000 \text{ [r/min]} \text{ (Rated velocity of MSME 200W motor)}$$

9. Calculation of torque

$$\text{Traveling torque } T_f = \frac{BP}{2\pi B\eta} (\mu g WA + F) = \frac{0.02}{2\pi \times 0.9} (0.1 \times 9.8 \times 10 + 0) = 0.035 \text{ [N}\cdot\text{m]}$$

$$\text{Acceleration torque } T_a = \frac{(JL + JM) \times 2\pi N[\text{r/s}]}{\text{Acceleration time [s]}} + \text{Traveling torque}$$

$$= \frac{(1.73 \times 10^{-4} + 0.14 \times 10^{-4}) \times 2\pi \times 16.7}{0.1} + 0.035$$

$$= 0.196 + 0.035 = 0.231 \text{ [N}\cdot\text{m]}$$

$$\text{Deceleration torque } T_d = \frac{(JL + JM) \times 2\pi N[\text{r/s}]}{\text{Deceleration time [s]}} - \text{Traveling torque}$$

$$= \frac{(1.73 \times 10^{-4} + 0.14 \times 10^{-4}) \times 2\pi \times 16.7}{0.1} - 0.035$$

$$= 0.196 - 0.035 = 0.161 \text{ [N}\cdot\text{m]}$$

10. Verification of maximum torque

Acceleration torque = Ta = 0.231 [N·m] < 1.91 [N·m] (Maximum torque of MSME 200 W motor)

11. Verification of effective torque

$$T_{\text{rms}} = \sqrt{\frac{T_a^2 \times t_a + T_f^2 \times t_b + T_d^2 \times t_d}{t_c}}$$

$$= \sqrt{\frac{0.231^2 \times 0.1 + 0.035^2 \times 0.8 + 0.161^2 \times 0.1}{2}}$$

$$= 0.067 \text{ [N}\cdot\text{m]} < 0.64 \text{ [N}\cdot\text{m]} \text{ (Rated torque of MSME 200 W motor)}$$

12. Judging from the inertia ratio calculated above, selection of 200 W motor is preferable, although the torque margin is significantly large.

Example of Motor Selection

Example of motor selection for timing belt mechanism

- 1. Mechanism Workpiece weight WA = 2[kg] (including belt)
- Pulley diameter PD = 0.05[m]
- Pulley weight WP = 0.5[kg] (Use manufacturer-specified catalog value, or calculation value.)
- Mechanical efficiency Bη = 0.8
- Coupling inertia Jc = 0 (Direct connection to motor shaft)
- Belt mechanism inertia JB
- Pulley inertia JP

2. Running pattern

- Acceleration time ta = 0.1[s]
- Constant-velocity time tb = 0.8[s]
- Deceleration time td = 0.1[s]
- Cycle time tc = 2[s]
- Travel distance 1[m]

3. Load inertia JL = Jc + JB + JP

$$= Jc + \frac{1}{4}WA \times PD^2 + \frac{1}{8}WP \times PD^2 \times 2$$

$$= 0 + \frac{1}{4} \times 2 \times 0.05^2 + \frac{1}{8} \times 0.5 \times 0.05^2 \times 2$$

$$= 0.00156 = 15.6 \times 10^{-4} \text{ [kg}\cdot\text{m}^2\text{]}$$

4. Provisional motor selection

In case of MSME 750 W motor : JM = 0.87 × 10⁻⁴ [kg·m²]

5. Calculation of inertia ratio

JL / JM = 15.6 × 10⁻⁴ / 0.87 × 10⁻⁴ Therefore, the inertia ratio is "17.9" (less than "20")

6. Calculation of maximum velocity (Vmax)

$$\frac{1}{2} \times \text{Acceleration time} \times V_{\max} + \text{Constant-velocity time} \times V_{\max} + \frac{1}{2} \times \text{Deceleration time} \times V_{\max} = \text{Travel distance}$$

$$\frac{1}{2} \times 0.1 \times V_{\max} + 0.8 \times V_{\max} + \frac{1}{2} \times 0.1 \times V_{\max} = 1$$

$$0.9 \times V_{\max} = 1$$

$$V_{\max} = 1 / 0.9 = 1.111 [\text{m/s}]$$

7. Calculation of motor velocity (N [r/min])

$$\text{A single rotation of pulley} : \pi \times PD = 0.157 [\text{m}]$$

$$N = 1.111 / 0.157 = 7.08 [\text{r/s}]$$

$$= 7.08 \times 60 = 424.8 [\text{r/min}] < 3000 [\text{r/min}] \text{ (Rated velocity of MSME 750 W motor)}$$

8. Calculation of torque

$$\begin{aligned} \text{Traveling torque} \quad T_f &= \frac{PD}{2\eta} (\mu g W_A + F) = \frac{0.05}{2 \times 0.8} (0.1 \times 9.8 \times 3 + 0) \\ &= 0.061 [\text{N}\cdot\text{m}] \end{aligned}$$

$$\begin{aligned} \text{Acceleration torque} \quad T_a &= \frac{(J_L + J_M) \times 2\pi N [\text{r/s}]}{\text{Acceleration time} [\text{s}]} + \text{Traveling torque} \\ &= \frac{(15.6 \times 10^{-4} + 0.87 \times 10^{-4}) \times 2\pi \times 7.08}{0.1} + 0.061 \\ &= 0.751 + 0.061 = 0.812 [\text{N}\cdot\text{m}] \end{aligned}$$

$$\begin{aligned} \text{Deceleration torque} \quad T_d &= \frac{(J_L + J_M) \times 2\pi N [\text{r/s}]}{\text{Deceleration time} [\text{s}]} - \text{Traveling torque} \\ &= \frac{(15.6 \times 10^{-4} + 0.87 \times 10^{-4}) \times 2\pi \times 7.08}{0.1} - 0.061 \\ &= 0.751 - 0.061 = 0.69 [\text{N}\cdot\text{m}] \end{aligned}$$

9. Verification of maximum torque

$$\text{Acceleration torque} \quad T_a = 0.812 [\text{N}\cdot\text{m}] < 7.1 [\text{N}\cdot\text{m}] \text{ (Maximum torque of MSME 750 W motor)}$$

10. Verification of effective torque

$$\begin{aligned} T_{\text{rms}} &= \sqrt{\frac{T_a^2 \times t_a + T_f^2 \times t_b + T_d^2 \times t_d}{t_c}} \\ &= \sqrt{\frac{0.812^2 \times 0.1 + 0.061^2 \times 0.8 + 0.69^2 \times 0.1}{2}} \\ &= 0.241 [\text{N}\cdot\text{m}] < 2.4 [\text{N}\cdot\text{m}] \text{ (Rated torque of MSME 750 W motor)} \end{aligned}$$

11. Judging from the above calculation result, selection of MSME 750W motor is acceptable.

Request for motor selection I : Ball screw drive

1. Driven mechanism and running data

1) Travel distance of the work load per one cycle mm

2) Cycle time s

(Fill in items 3) and 4) if required.)

3) Acceleration time s

4) Deceleration time s

5) Stopping time s

6) Max. velocity mm/s

7) External force N

8) Positioning accuracy of the work load mm

9) Total weight of the work load and the table kg

10) Power supply voltage

11) Diameter of the ball screw

12) Total length of the ball

13) Lead of the ball screw

14) Traveling direction (horizontal, vertical etc.)

2. Other data (Fill the details on specific mechanism and its configurations in the following blank.)

Company name : _____

Department/Section : _____

Name : _____

* When connecting, please be sure to use twisted-pair cable.

KV-5000/3000 Connection with the KEYENCE Corp.

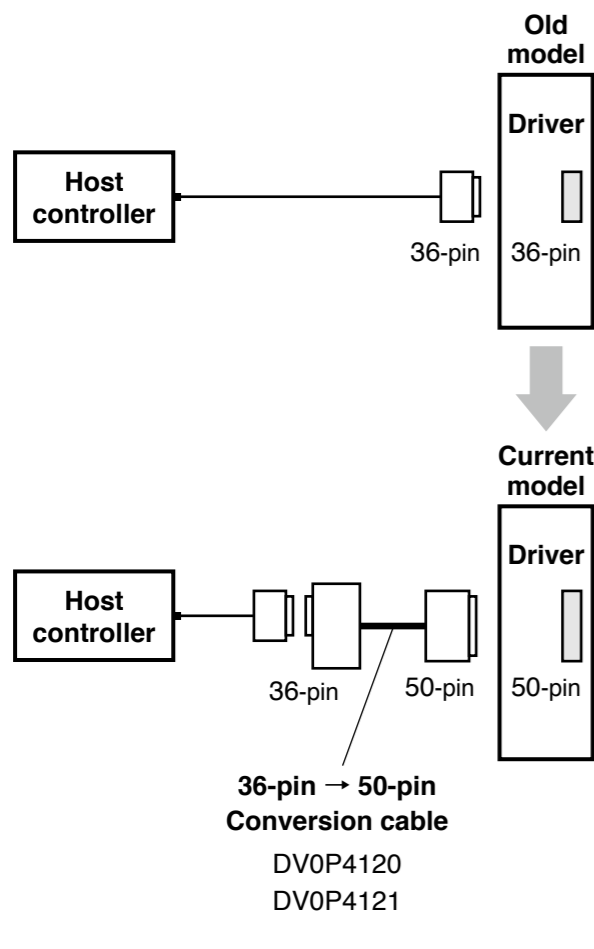

* When connecting, please be sure to use twisted-pair cable.

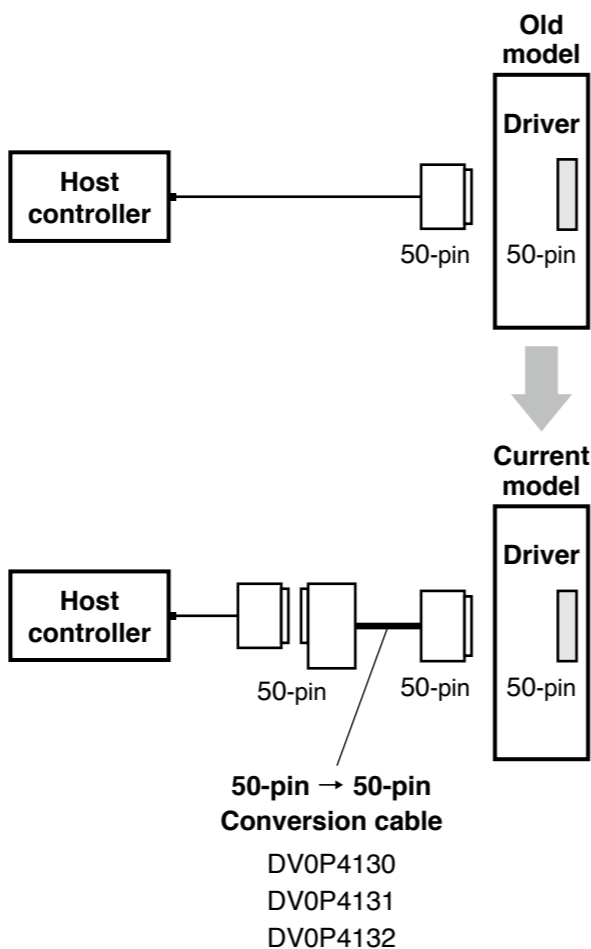

Replacing Old Model Servo Driver with MINAS A5II, A5 series

For easier replacement of old driver (MINAS X/XX/V series) with A5II, A5 series, use the interface conversion connector.

<36-pin → 50-pin>

<50-pin → 50-pin>

When selecting the cable, refer to the table below because the part number of the cable is specific to the control mode of the old model.

| Old model | Control mode | Conversion cable part No. | Conversion wiring table |
|-----------------------------------|---------------------------|---------------------------|-------------------------|
| X series XX series (36-pin) | Position/velocity control | DV0P4120 | P.280 |
| | Torque control | DV0P4121 | |
| V series (50-pin) | Position control | DV0P4130 | P.281 |
| | Velocity control | DV0P4131 | |
| | Torque control | DV0P4132 | P.282 |

* For external dimensions, refer to P.197.
