## Enclosed Switch

## D4C

## Sealed, Compact, and Slim-bodied Switch Offers Choice of Many Actuators

- Liquid- and dust-resistance conforms to IEC IP67 standard.
- Triple-sealed construction:

Plunger section sealed via nitrile rubber packing seal and diaphragm; switch section sealed via nitrile rubber cap; cable entrance sealed via encapsulating material.

- Standard cable (S-FLEX VCTF) in 2-, 3-, or 5-meter lengths offers high flexibility with outstanding oil and extreme temperature resistance.

- Low temperature models are available.

33: Sealed crossroller
41: Panel mount pin plunger
42: Panel mount roller plunger
43: Panel mount crossroller plunger
50: Plastic rod
60: Center roller lever plunger
Note 1: Some combinations of the above may not be supported.
2: With standard models, the operation indicator turns OFF when the switch operates. If models with operation indicators that turn ON when the switch operates are required, add "-B" to the end of the model number.

## Pre-wired Models (Use VCTF Oil-resistant Cable)

1. Operation Indicator Lamp

1: Without operation indicator
2: $\quad 1 \mathrm{~A}$ at 125 VAC (with operation indicator)
3: $\quad 1 \mathrm{~A}$ at 30 VDC (with operation indicator)
2. Actuator

01: Pin plunger
02: Roller plunger
31: Sealed plunger
32: Sealed roller plunger
24: Roller lever (high-sensitivity model)
3. Wiring Specifications

| Center roller lever | D4C-0060 | - |

Note 1: The model numbers for heads are of the form D4C-00 $\square \square$, with the numbers in the squares indicating the type of actuator.
2: Actuators for plunger models, plastic rod models, and center roller lever models cannot be ordered individually. They must be ordered together with the head.
3: Consult your OMRON representative for details on cold-resistant specifications.

## Mounting Plates

The WL model incorporated by equipment can be replaced with the D4C together with the Mounting Plate without changing the position of the dog or cam.

## List of Replaceable Models

Contact your OMRON representative for the period required for delivery.

| WL model (Actuator) | D4C model (Actuator) | Plate |
| :--- | :--- | :---: |
| WLD/WL01D (Top <br> plunger) | $\rightarrow$ D4C- $\square \square 01$ (Plunger) | D4C-P001 |
| WLD2/WL01D2 (Top- <br> roller plunger) | $\rightarrow$ D4C- $\square \square 02$ (Roller <br> plunger) | D4C-P002 |
| WLCA2/WL01CA2 <br> (Roller lever) | $\rightarrow$ D4C- $\square \square 20$ (Roller le- <br> ver) | D4C-P020 |

Note: The WL01 $\square$ is for micro loads.

## Application Example

Note: The position of the dog remains unchanged.

## Remarks

There is no difference in mounting pitch between the Mounting Plate and the WL. The mounting depth of the D4C with the Mounting Plate attached is, however, shorter than that of the panel-mounted WL.

## Special Mounting Plates (Plates are not provided with Limit Switches.)

Note: Four, M5 $\times 0.8$ hexagon pan-head bolts and two M5 x 0.8 Allen-head bolts are provided.

Note: 1. Tighten the $5.2_{-0}^{+0.2}$ dia. holes with the M5 x 10 hexagon pan-head screws.
2. Insert the M5 Allen-head bolts into the M5 tapping holes to tighten the Mounting Plate securely.

2. Insert the M5 Allen-head bolts into the M5 tapping holes to tighten the Mounting Plate securely.

## Precautions

## Correct Use

## Handling

The bottom of the Switch at the cable outlet is resin-molded. Secure the cable at a point 5 cm from the Switch bottom to prevent exertion of excess force on the cable.
When bending the cable, provide a bending radius of 45 mm min . so as not to damage the cable insulation or sheath. Excessive bending may cause fire or leakage current.

## Connections

Be sure to connect a fuse with a breaking current 1.5 to 2 times larger than the rated current to the Limit Switch in series in order to protect the Limit Switch from damage due to short-circuiting.
When using the Limit Switch for the EN ratings, use the gl or gG 10A fuse.

## Operation

Operation method, shapes of cam and dog, operating frequency, and overtravel have a significant effect on the service life and precision of a Limit Switch. For this reason, the dog angle must be $30^{\circ}$ max., the surface roughness of the dog must be 6.3 S min . and hardness must be Hv400 to 500.

To allow the plunger-type actuator to travel properly, adjust the dog and cam to the proper setting positions. The proper position is where the plunger groove fits the bushing top.

To allow the roller lever-type actuator to travel properly, adjust the dog and cam so that the arrow head is positioned between the two convex markers as shown below.

## Mounting

A maximum of 6 Switches may be group-mounted. In this case, pay attention to the mounting direction so that the convex part of the group-mounting guide on one Switch fits into the concave part of the guide on the other Switch as shown in the figure below. For group mounting, the mounting panel must have a thickness ( t ) of 6 mm min .

If the mounting panel is warped or has protruding parts, a malfunction may result. Make sure that the mounting panel is not warped and has even surfaces.

## Mounting Holes

Use a Switch with a rubber cap when using the plunger type in an environment where malfunction is possible due to environmental conditions such as dust or cutting chips which may not allow resetting.

Do not expose the Switch to water exceeding $70^{\circ} \mathrm{C}$ or use it in steam.
When the D4C is used in a circuit of a device to be exported to Europe, classified as Overvoltage Class III as specified in IEC664, provide a contact protection circuit.
Tighten each screw to a torque according to the following table.

| No. | Type | Torque |
| :--- | :--- | :--- |
| 1 | M5 Allen-head bolt | 4.90 to $5.88 \mathrm{~N} \cdot \mathrm{~m}$ |
| 2 | M3.5 head mounting screw | 0.78 to $0.88 \mathrm{~N} \cdot \mathrm{~m}$ |
| 3 | M5 Allen-head bolt | 4.90 to $5.88 \mathrm{~N} \cdot \mathrm{~m}$ |

Note: By removing the two screws from the head, the head direction can be rotated $180^{\circ}$. After changing the head direction, re-tighten to the torque specified above. Be careful not to allow any foreign substance to enter the Switch.
